P&T Archived Drug Classes Motion

Drug Classes	Motion	Date Reviewed	Decision
Diabetes – TZD Macrolides Skeletal Muscle Relaxers	After considering the scans presented today, I move to archive the following drug classes from further regular review by the P&T Committee: Diabetes – TZD 6/15/2016* Macrolides 6/15/2016* Skeletal Muscle Relaxers 6/15/2016* *(date = last motion) The drug classes will remain on the PDL and the committee's last motion will remain in effect until changed by the committee. The agencies may conduct updated cost analyses of these drug classes without additional committee approval so long as any resulting changes in the preferred status of a drug remains consistent with the committee's last motion for that drug class. The committee may review the archive status of a drug class upon its own initiative, or by request of the participating agencies at any time. Motion: Rowe 2nd: Figueroa	June 15, 2016	Passed unanimous
