

P&T Motion History Quick Relief Asthma Drugs

Asthma Drugs Reviewed	Motion	Date Reviewed	Scan Update Accepted as Adequate	Reiteration of Prior Motion	Decision
Inhaled Short Acting Beta 2 Agonists albuterol <ul style="list-style-type: none"> • (Proair Respiclick®)* levalbuterol pirbuterol fenoterol	After considering the evidence of safety, efficacy and special populations of using short acting beta agonists for quick relief of Asthma, I move that albuterol, levalbuterol, and pirbuterol are safe and efficacious. The Washington Preferred Drug List must include a nebulizer and metered dosed formulation. No single short acting beta agonist is associated with fewer adverse events in special populations. The short acting beta agonists can be subject to therapeutic interchange in the Washington preferred drug list for the quick relief of Asthma.	October 19, 2016	Yes Johnson Rowe	Yes Johnson Klingel	Passed unanimous
