

EXECUTIVE SUMMARY

Washington State's Foundational Community Supports Programs SUPPORTIVE HOUSING

January 21, 2022

FCS ENROLLMENT

As of November 2021, 69% of all Foundational Community Supports (FCS) participants were enrolled to receive Supportive Housing (SH) services only or both SH and Supported Employment (SE) services.

Participants enrolled to receive SH services were a smaller share of FCS enrollees through the first two years of the program (in part due to the lag in available SH providers).

ENROLLMENT LENGTH

FCS enrollees are authorized to receive services for a six-month period. Services may be reauthorized if a participant continues to need services. We observe at least one reauthorization for 62% of current SH enrollees.

MH/SUD

Penetration Rate

While the FCS program does not provide Mental Health (MH) or Substance Use Disorder (SUD) services, Supportive Housing FCS Enrollees have a higher use of MH and SUD services than the general Medicaid population.

COVID-19 IMPACT

Due to COVID-19 related challenges, the number of participants newly enrolling to receive Supportive Housing services decreased slightly during the first half of 2020, after having peaked in January 2020. The Health Care Authority has strongly encouraged shifting from in-person services to virtual telehealth services by providers, including assessments, which was allowed under the waiver prior to the pandemic.

- **HUD Chronic Homelessness Criteria.** Criteria can be met in two ways. For the **Lengthy criteria** an enrollee is determined to be experiencing 12 continuous months of homelessness within the past year. For the **Frequent criteria** an enrollee is determined to have experienced 4 episodes of homelessness over the past 3 years, which equal 12+ total months spent homeless. The Lengthy and Frequent criteria are not mutually exclusive. Note that the results are a proxy for the HUD criteria based on ACES data, and not Homeless Management Information System (HMIS).
