Washington Apple Health (Medicaid)

Prescription Drug Program Billing Guide

April 1, 2022

Disclaimer

Every effort has been made to ensure this guide's accuracy. If an actual or apparent conflict between this document and Health Care Authority (HCA) rule arises, HCA rules apply.

Billing guides are updated on a regular basis. Due to the nature of content change on the internet, we do not fix broken links in past guides. If you find a broken link, please check the most recent version of the guide. If this is the most recent guide, please notify us at **askmedicaid@hca.wa.gov.**

About this guide*

This publication takes effect **April 1, 2022** and supersedes earlier billing guides to this program. Unless otherwise specified, the program(s) in this guide are governed by the rules found in **chapter 182-530 WAC.**

The Health Care Authority is committed to providing equal access to our services. If you need an accommodation or require documents in another format, please call 1-800-562-3022. People who have hearing or speech disabilities, please call 711 for relay services.

> Washington Apple Health means the public health insurance programs for eligible Washington residents. Washington Apple Health is the name used in Washington State for Medicaid, the children's health insurance program (CHIP), and state-only funded health care programs. Washington Apple Health is administered by the Washington State Health Care Authority.

Refer also to HCA's **ProviderOne billing and resource guide** for valuable information to help you conduct business with the Health Care Authority.

How can I get HCA Apple Health provider documents?

To access provider alerts, go to HCA's **provider alerts webpage**.

To access provider documents, go to HCA's **provider billing guides and fee schedules webpage.**

Where can I download HCA forms?

To download an HCA form, see HCA's **Forms & Publications** webpage. Type only the form number into the Search box (Example: 13-835).

What has changed?

The table below briefly outlines how this publication differs from the previous one. This table is organized by subject matter. Each item in the *Subject* column is a hyperlink that, when clicked, will take you to the specific change summarized in that row of the table.

Subject	Change	Reason for Change
How do I bill for take-home naloxone?	Added a new section to provide billing instructions for distribution of prepackaged opioid reversal medication (naloxone) to clients at risk of an opioid overdose. The instructions are retroactive to dates of service on and after January 1, 2022.	The Washington State Legislature passed Senate Bill 5195 (chapter 273, Laws of 2021) requiring distribution of prepacked (take-home) naloxone to individuals at risk of an opioid overdose.
Client eligibility – Clients who are not enrolled in an HCA-contracted managed care plan for physical health services	Added clarification of who pays if a client received Medicaid-covered services before being automatically enrolled in a BHSO	Program enrollment clarification
Client eligibility – Integrated managed care	Revised paragraph to reflect enrollment in an integrated managed care plan	Clarification
Client eligibility – American Indian/Alaska Native (AI/AN) Clients	Created new subsection and move this information out of the Integrated managed care section.	Creating a stand-alone section for just AI/AN clients.

Troubleshooting

If your situation or question is about:	Then you must:
Claim rejection stating "prior authorization required" **Claim rejection starting with "pref" or "preferred"**	Use *Pharmacy Information Authorization* (HCA 13-835A) form. See **Where can I download HCA forms?** Fax form to 1-866-668-1214 or call 1-800-562-3022
Early refill, or refill too soon	Call the Medical Assistance Customer Service Center (MACSC) at 1-800-562-3022 When you call, you must know: • When was the last fill for this client? • Was this a change in dose from the last fill?
Find out which drugs are on the Apple Health Preferred Drug List	See the **Apple Health Preferred Drug List** webpage
Any of the following return messages: **Prior authorization required,** **Expedited code required and does not meet criteria, or** **Drug exceeds limits**	Use *Pharmacy Information Authorization* (HCA 13-835A) form. **Where can I download HCA forms**? See the **Pharmacy** webpage for: • **Expedited authorization criteria** • Special programs in this billing guide Fax form to 1-866-668-1214 or call 1-800-562-3022
Dispensed an emergency supply to a client with an emergency that could not wait	Use *Pharmacy Information Authorization* (HCA 13-835A) form Fax form to 1-866-668-1214 or call 1-800-562-3022
Claim rejection stating "client is restricted to one pharmacy"	Find out what pharmacy or doctor this client is restricted to by calling the Medical Assistance Customer Service Center (MACSC) at 1-800-562-3022. After selecting a language, say "dial now," then enter extension 15606. The MACSC will be able to help you determine the following: • How to get medically necessary medications to a client restricted to a different pharmacy • Where to report clients abusing their medications • Where to report suspected fraudulent activity

CPT® codes and descriptions only are copyright 2021 American Medical Association.

If your situation or question is about:	Then you must:
Lost or stolen medications	Find out if the client reported a lost or stolen prescription in the last six months by calling Pharmacy Authorization services at 1-800-562-3022, extension 15483.
Expedited Authorization criteria	See HCA's **Expedited Authorization List**
What is the appropriate use of NCPDP fields in response to claim edits?	Call MACSC at 1-800-562-3022 or visit the **Pharmacy** webpage
Is this client eligible?	Call MACSC at 1-800-562-3022 or visit the **Pharmacy** webpage
What program is this client on?	Call MACSC at 1-800-562-3022 or visit the **Pharmacy** webpage
Where can clients or doctors' offices call for questions about authorizations or drugs?	Call MACSC at 1-800-562-3022 or visit the **Pharmacy** webpage
What drugs are covered?	Call MACSC at 1-800-562-3022 or visit the **Pharmacy** webpage
What is the Therapeutic Interchange Program?	Call MACSC at 1-800-562-3022 or visit the **Pharmacy** webpage
How do I become an endorsing prescriber?	Call MACSC at 1-800-562-3022 or visit the **Pharmacy** webpage
Where do I find a list of over-the-counter family planning products?	Call MACSC at 1-800-562-3022 or visit the **Pharmacy** webpage

Definitions

This section defines terms and abbreviations, including acronyms, used in this billing guide. Refer to **chapter 182-500 WAC** and **WAC 182-530-1050** for a complete list of definitions for Washington Apple Health.

Active ingredient – The chemical component of a drug responsible for a drug's prescribed/intended therapeutic effect. HCA limits coverage of active ingredients to those with a national drug code (NDC) and those specifically authorized by HCA.

Actual acquisition cost (AAC) – Refers to one of the following:

- Provider ACC – The true cost a provider paid for a specific drug or drug product in the package size purchased, including discounts, rebates, charge backs that affect the provider's invoice price, and other adjustments to the price of the drug, device, or drug-related supply, excluding dispending fees

- 340B AAC – The true cost paid by a public health service (PHS)-qualifying entity for a specific drug, excluding dispensing fees

- POS AAC – HCA-determined rate paid to the pharmacies through the point-of-sale (POS) system, and intended to reflect pharmacy provider's actual acquisition cost

Administer – the direct application of a prescription drug by injection, inhalation, ingestion, or any other means to the body of a patient by a practitioner or at the direction of the practitioner.

Apple Health Preferred Drug List (PDL) - The list of preferred drugs and restrictions that is used by all HCA-contracted managed care plans and fee-for-service (FFS).

Appointing authority – For the evidence-based prescription drug program of the participating agencies in the state-operated health care programs, the following persons act jointly: the Director of the Health Care Authority (HCA or HCA), and the director of the Department of Labor and Industries (L&I).

Authorization number – A number assigned by HCA that identifies a specific request for approval for services or equipment.

Authorization requirement – A condition of coverage and reimbursement for specific services or equipment, when required by WAC or Medicaid billing guides.

Automated maximum allowable cost (AMAC) – The rate established by HCA or its designee for a multiple-source drug that is not on the maximum allowable cost (MAC) list and that is designated by two or more products, at least one of which must be under a federal drug rebate contract.

Automatic refills - Any prescription refill the pharmacy initiates without a request from the client.

Brand name – The proprietary or trade name selected by the manufacturer and placed upon a drug, its container, label, or wrapping at the time of packaging.

Closed pharmacy network – An arrangement made by an insurer, which restricts prescription coverage to an exclusive list of pharmacies. (See **WAC 182-530-7800**)

Code of Federal Regulations (CFR) – Rules adopted by the federal government.

Combination drug – A commercially available drug including two or more active ingredients.

Compliance packaging – Reusable or non-reusable drug packaging containers.

Compounding – The act of combining two or more active ingredients or adjusting therapeutic strengths in the preparation of a prescription.

Contract drugs – Drugs manufactured or distributed by manufacturers/labelers who have signed a drug rebate agreement with the federal Department of Health and Human Services (DHHS).

Covered outpatient drug – A drug approved for safety and effectiveness as a prescription drug under the federal Food, Drug, and Cosmetic Act, and used for a medically accepted indication.

Dispensing fee – See "Professional dispensing fee."

Drug Enforcement Agency (DEA) – the federal agency responsible for enforcing laws and regulations governing narcotics and controlled substances.

Drug file – A list of drug products, pricing, and other information provided to HCA's drug database and maintained by a drug file contractor.

Drug rebates – Payments provided by pharmaceutical manufacturers to state Medicaid programs under the terms of the manufacturers' agreements with the Department of Health and Human Services.

Drug-related supplies – Non-drug items necessary for the administration, delivery, or monitoring of a drug or drug regimen.

Drug use review (DUR) – A review of covered outpatient drugs that assures prescriptions are appropriate, medically necessary, and not likely to result in adverse medical outcomes.

Emergency kit – A set of limited pharmaceuticals furnished to a nursing facility by the pharmacy that provides prescription dispensing services to that facility. Each kit is specifically set up to meet the needs of each nursing facility's client population and is for use during those hours when pharmacy services are unavailable.

Endorsing practitioner – A provider who has reviewed the Washington Preferred Drug List (PDL), is enrolled in the Washington Prescription Drug Program, and agrees to allow therapeutic interchange (substitution) of a preferred drug for any non-preferred drug in a given therapeutic class on the Washington PDL.

Evidence-based practice center – A research organization designated by the federal Agency for Healthcare Research and Quality (AHRQ) to develop report and technology assessments on topics relevant to clinical and other health care organizations and delivery issues.

Federal upper limit (FUL) – The maximum allowable payment set by the Centers for Medicare and Medicaid Services (CMS) for a multiple-source drug.

Federally approved hemophilia treatment center – A hemophilia treatment center (HTC) which:

- Receives funding from the federal Department of Health and Human Services' Maternal and Child Health Bureau National Hemophilia Program.

- Is qualified to participate in 340B discount purchasing as an HTC.

- Has a federal Center for Disease Control (CDC) and prevention surveillance site identification number and is listed in the HTC directory on the CDC website.

- Is recognized by the Federal Regional Hemophilia Network that includes Washington State.

- Is a direct care provider offering comprehensive hemophilia care consistent with treatment recommendations set by the Medical and Scientific Advisory Council (MASAC) of the National Hemophilia Foundation in their standards and criteria for the care of persons with congenital bleeding disorders.

Immediate needs – An emergency situation when pharmacists use their professional judgment to determine the quantity to dispense to best meet the client's needs in the emergency.

Generic name – The official title of a drug or drug ingredients published in the latest edition of a nationally recognized pharmacopoeia or formulary.

Less-than-effective drug, or Drug Efficacy Study Implementation (DESI) – Drugs that lack substantial evidence of effectiveness as determined by the Food and Drug Administration (FDA).

Maximum allowable – The maximum dollar amount HCA will reimburse a provider for a specific service, supply, or piece of equipment.

Maximum allowable cost (MAC) – The maximum amount that HCA reimburses for a specific dosage form and strength of a multiple-source drug product.

Medically accepted indication – Any use for a covered outpatient drug:

- Which is approved under the federal Food, Drug, and Cosmetic Act.

- The use of which is supported by one or more citations included or approved for inclusion in any of the following compendia of drug information:

  o The American Hospital Formulary Service Drug Information

  o The United States Pharmacopoeia Drug Information

  o DRUGDEX Information System

Medically necessary – See WAC 182-500-0005

Modified Unit Dose Delivery System (also known as blister packs or bingo/punch cards) – A method in which each patient's medication is delivered to a nursing facility:

- In individually sealed, single-dose packages or "blisters".

- In quantities for one month's supply unless the prescriber specifies a shorter period of therapy.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Multiple source drug – A drug for which there is at least one other drug product sold in the United States that is pharmaceutically equivalent and bioequivalent, as determined by the Food and Drug Administration.

National average drug acquisition cost (NADAC) – A national benchmark published by the Centers for Medicare and Medicaid (CMS). The NADAC is based on a monthly survey of invoice costs paid by retail community pharmacies across the United States.

National drug code (NDC) –The eleven-digit numerical code that includes the labeler code, product code, and package code.

Non-contract drugs – Drugs manufactured or distributed by manufacturers/labelers who have not signed a drug rebate agreement with the federal Department of Health and Human Services (DHHS).

Non-formulary drug – Medications that are not on the primary insurance plan's formulary (preferred) drug list.

Non-preferred drug – A drug within a therapeutic class of drugs on the Apple Health preferred drug list (PDL) that has not been selected as a preferred drug.

Obsolete NDC – An NDC replaced or discontinued by the manufacturer or labeler.

Other Coverage Code – A billing code that indicates whether a client has other insurance coverage. If the client has coverage, use of the code identifies how the claim was processed by the insurance carrier.

Over-the-counter (OTC) drugs – Drugs that do not require a prescription under federal law before they can be sold or dispensed.

Pharmacist – A person licensed in the practice of pharmacy by the state in which the prescription is filled.

Pharmacy – Every location licensed by the State Board of Pharmacy in the state where the practice of pharmacy is conducted.

Point-of-sale (POS) – A pharmacy claims processing system capable of receiving and adjudicating claims online.

Poly-prescribing – Multiple prescribers duplicating drug therapy for the same client.

Practitioner – A person who has met the professional and legal requirements necessary to provide a health care service, such as a physician, nurse, dentist, physical therapist, pharmacist, or other person authorized by state law as a practitioner.

Preferred drug – Drug(s) of choice within a selected therapeutic class that are selected based on clinical evidence of safety, efficacy, and effectiveness.

Prepay plan – A type of insurance coverage that requires the client to pay at the time of service, and the insurance reimbursement is made to the subscriber/client.

Privately purchased HMO – Indicates a client with a privately purchased HMO insurance policy. ProviderOne indicates that the client is enrolled in a managed

health care plan. These clients must comply with the requirements of their plan and are required to use the HMO facilities for their pharmacy services.

Prescriber – A physician, osteopathic physician/surgeon, dentist, advanced registered nurse practitioner (ARNP), physician assistant, optometrist, pharmacist, or other person authorized by law or rule to prescribe drugs.

Prescription – An order for drugs or devices issued by a practitioner authorized by state law or rule to prescribe drugs or devices, during the practitioner's professional practice, for a legitimate medical purpose.

Prescription drugs – Drugs required by any applicable federal or state law or regulation to be dispensed by prescription only, or that are restricted to use by practitioners only.

Professional dispensing fee – The fee HCA or its designee pays pharmacists and dispensing providers for covered prescriptions. The fee pays for costs more than the ingredient cost of a covered outpatient drug when a covered outpatient drug is dispensed. (See WAC 182-530-1050 for full definition.)

Prospective drug use review (Pro-DUR) – A process in which a request for a drug product for a particular client is screened, before the product is dispensed, for potential drug therapy problems.

Reconstitution – The process of returning a single active ingredient previously altered for preservation and storage to its approximate original state. Reconstitution is not compounding.

Retrospective drug utilization review (Retro-DUR) – The process in which a client's drug use is reviewed on a periodic basis to identify patterns of fraud, abuse, gross overuse, or inappropriate or unnecessary care.

Service area – An area within 25 miles or 45 minutes from the client's residential address to the pharmacy.

Single-source drug – A drug produced or distributed under an original new drug application approved by the FDA.

Skilled nursing facility (SNF) – An institution or part of an institution which is primarily engaged in providing:

- Skilled nursing care and related services for residents who require medical or nursing care.

- Rehabilitation services for injured, disabled, or sick clients.

- Health-related care and services to people who require care which can only be provided through institutional facilities and which is not primarily for the care and treatment of mental diseases. (See Section 1919(a) of the Federal Social Security Act for specific requirements.)

Systematic review – A specific and reproducible method to identify, select, and appraise all the studies that meet minimum quality standards and are relevant to a particular question. The results of the studies are then analyzed and summarized into evidence tables to be used to guide evidence-based decisions.

Terminated national drug code (NDC) – An NDC that is discontinued by the manufacturer for any reason. The NDC may be terminated immediately due to health or safety issues, or it may be phased out based on the product's shelf life.

Therapeutic alternative – A drug product that contains a different chemical structure than the drug prescribed but is in the same pharmacologic or therapeutic class and can be expected to have a similar therapeutic effect and adverse reaction profile when administered to patients in a therapeutically equivalent dosage.

Therapeutic interchange – To dispense a therapeutic alternative to a prescribed drug when permitted by an endorsing practitioner. See Therapeutic Interchange Program (TIP).

Therapeutic Interchange Program (TIP) – The process developed by participating state agencies under RCW 69.41.190 and 70.14.050 to allow prescribers to endorse the Washington Preferred Drug List, and in most cases, to require pharmacists to automatically substitute a preferred equivalent drug from the list.

Therapeutically equivalent – Drug products that contain different chemical structures but have the same efficacy and safety when administered to a person, as determined by:

- Information from the Food and Drug Administration (FDA).

- Published and peer-reviewed scientific data.

- Randomized controlled clinical trials.

- Other scientific evidence.

True unit dose delivery – A method in which each patient's medication is delivered to the nursing facility in quantities sufficient only for the day's required dosage.

Washington Preferred Drug List (Washington PDL) – The list of drugs selected by the appointing authority to be used by applicable state agencies as the basis for purchasing drugs in state-operated health care programs.

About the Program

What is the purpose of the Prescription Drug Program?

The purpose of the Prescription Drug Program is to pay providers for outpatient drugs, devices, and drug-related supplies. The program is governed by federal and state regulations. This billing guide is intended to help providers comply with the rules and requirements of the program.

Basic things to know:

HCA reimburses for medically necessary drugs, devices, and supplies according to rules in Washington Administrative Code (WAC) and the Reimbursement section of this billing guide.

HCA covers outpatient drugs, including over-the-counter drugs listed in HCA's Apple Health Preferred Drug List, when:

- The manufacturer has a signed drug rebate agreement with the federal Department of Health and Human Services (DHHS). Exceptions to this rule are described in this billing guide's Compounded Prescriptions section.

- Approved by the Food and Drug Administration (FDA).

- Prescribed by a provider within the scope of the provider's prescribing authority and whose core provider agreement has not been terminated or denied.

- Prescribed for a medically accepted indication.

- Prescribed for an eligible client.

- Not excluded from coverage under WAC 182-501-0050, 182-530-2100, and the Program Restrictions section of this billing guide, specifically the subsection What drugs, devices, and supplies are not covered?

HCA does not cover:

- Drugs used to treat sexual or erectile dysfunction, in accordance with section 1927(d)(2)(K) of the Social Security Act, unless these drugs are used to treat a condition other than sexual or erectile dysfunction and these uses have been approved by the FDA.

- Drugs not approved by the FDA.

- Drugs prescribed for a non-medically accepted indication or dosing level.

- Drugs from a manufacturer without a federal rebate agreement.

- Drugs and indications excluded from coverage by WAC, such as drugs prescribed for the following:

  o Weight loss or gain

  o Infertility, frigidity, or impotence

  o Sexual or erectile dysfunction

  o Cosmetic purposes or hair growth

CPT® codes and descriptions only are copyright 2021 American Medical Association.

What are the provider requirements?

To be reimbursed by HCA, the pharmacy must:

- Be properly licensed.

- Have a signed core provider agreement (CPA).

- Follow the guidelines in this billing guide and applicable WAC.

- Retain documentation demonstrating that all other possible payers have been billed appropriately.

HCA may require a pharmacy to:

- Obtain authorization for a drug or product.

- Determine and document that certain diagnosis requirements are met.

- Meet other requirements for client safety and program management.

Abuse of the program

The following practices constitute an abuse of the program and a misuse of taxpayer dollars:

- **Prescription splitting** – Billing inappropriately to obtain additional dispensing fees, for example:

  o Supplying medication in amounts less than necessary to cover the days prescribed

  o Supplying medications in strengths less than those prescribed to gain more than one dispensing fee

- **Excessive filling** – Excessive filling consists of billing for an amount of a drug or supply greater than the prescribed quantity (except when HCA specifies a mandatory minimum of an OTC drug)

- **Prescription shorting** – Billing for a drug or supply greater than the quantity actually dispensed

- **Substitution to achieve a higher price** – Billing for a higher priced drug than prescribed even though the prescribed lower priced drug is available (except when HCA identifies a higher-priced drug as preferred)

Client Eligibility

Most Apple Health clients are enrolled in an HCA-contracted managed care organization (MCO). This means that Apple Health pays a monthly premium to an MCO for providing preventative, primary, specialty, and other health services to Apple Health clients. Clients in managed care must see only providers who are in their MCO's provider network, unless prior authorized or to treat urgent or emergent care. See HCA's Apple Health managed care page for further details.

> **It is important to always check a client's eligibility prior to providing any services because it affects who will pay for the services.**

How do I verify a client's eligibility?

Check the client's services card or follow the two-step process below to verify that a client has Apple Health coverage for the date of service and that the client's benefit package covers the applicable service. This helps prevent delivering a service HCA will not pay for.

Verifying eligibility is a two-step process:

Step 1. **Verify the patient's eligibility for Apple Health**. For detailed instructions on verifying a patient's eligibility for Apple Health, see the *Client Eligibility, Benefit Packages, and Coverage Limits* section in HCA's ProviderOne Billing and Resource Guide.

If the patient is eligible for Apple Health, proceed to **Step 2**. If the patient is **not** eligible, see the note box below.

Step 2. **Verify service coverage under the Apple Health client's benefit package**. To determine if the requested service is a covered benefit under the Apple Health client's benefit package, see HCA's Program Benefit Packages and Scope of Services webpage.

Note: Patients who are not Apple Health clients may submit an application for health care coverage in one of the following ways:

1. By visiting the Washington Healthplanfinder's website.

2. By calling the Customer Support Center toll-free at: 855-WAFINDER

   (855-923-4633) or 855-627-9604 (TTY)

3. By mailing the application to:

   Washington Healthplanfinder
   PO Box 946
   Olympia, WA 98507

CPT® codes and descriptions only are copyright 2021 American Medical Association.

In-person application assistance is also available. To get information about in-person application assistance available in their area, people may visit the Washington Healthplanfinder's website or call the Customer Support Center.

What types of identification prove eligibility?

Valid types of eligibility identification:

- A copy of the benefit inquiry screen from ProviderOne

- A printout of a medical identification screen from the client's local DSHS Community Services Office (CSO), Home and Community Service (HCS) office, or HCA

- An award letter from the CSO or HCS

- Medical eligibility verification (MEV) receipt provided by an authorized MEV vendor with an "as of" date within the same month as the date of service

> **Note**: Providers enrolled with ProviderOne can check eligibility by accessing the Provider Portal and choosing eligibility inquiry from the main menu. For information on enrolling, visit the Enroll as a Provider webpage.

The computer printout or award letter may be used as valid identification since both list the eligibility information that appears in ProviderOne.

HCA recommends that providers make a photocopy of valid identification when it is presented, to have a copy for the file.

Check the identification for the following information:

- Beginning and ending eligibility dates

- The ProviderOne Client ID

- Other specific information (e.g., Medicare, Medicare Part D, private insurance, or managed care coverage, hospice, patient requiring regulation, etc.)

- Retroactive or delayed certification eligibility dates, if any

> **Note**: Do not accept any form of identification that appears to have been altered. Request to see another form of identification.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

What if a claim is denied by the point-of-sale (POS) system?

The POS system does not solve the problem of identifying clients who are not currently in HCA's eligibility file. For clients who show as eligible in ProviderOne, but the POS system denies their claims for lack of eligibility, do one of the following:

- **FAX** a copy of the client's benefit inquiry screen in ProviderOne to 1-360-586-1403.

- Mail a photocopy of the client's benefit inquiry screen in ProviderOne attached.

HCA will update eligibility information from the copies of the client benefit inquiry screen in ProviderOne within two working days so that claims may be resubmitted.

Are clients enrolled in an HCA-contracted managed care organization (MCO) eligible?

Yes. Most Apple Health (Medicaid) clients are enrolled in one of HCA's contracted managed care organizations (MCOs). For these clients, managed care enrollment is displayed on the client benefit inquiry screen in ProviderOne.

All medical services covered under an HCA-contracted MCO must be obtained through the MCO's contracted network. The MCO is responsible for:

- Payment of covered services

- Payment of services referred by a provider participating with the plan to an outside provider

Newborns of clients enrolled in an HCA-contracted MCO are the responsibility of the mother's MCO for the first 60 days of life. If the mother changes MCOs, the baby follows the mother's MCO.

> **Note**: A client's enrollment can change monthly. Providers who are not contracted with the MCO must receive approval from **both** the MCO and the client's primary care provider (PCP) prior to serving a managed care client.

Send claims to the client's MCO for payment. Call the client's MCO to discuss payment prior to providing the service. Providers may bill clients only in very limited situations as described in WAC 182-502-0160.

Managed care enrollment

Most Apple Health (Medicaid) clients are enrolled in HCA-contracted MCO the same month they are determined eligible for managed care as a new or renewing client. Some clients may still start their first month of eligibility in the FFS program because their qualification for MC enrollment is not established until the month following their Medicaid eligibility determination. Providers must check eligibility to determine enrollment for the month of service.

New clients are those initially applying for benefits or those with changes in their existing eligibility program that consequently make them eligible for Apple Health managed care.

Checking eligibility

- Providers must check eligibility and know when a client is enrolled and with which MCO. For help with enrolling, clients can refer to the Washington Healthplanfinder's Get Help Enrolling page.

- MCOs have retroactive authorization and notification policies in place. The provider must know the MCO's requirements and be compliant with the MCO's policies.

Clients have a variety of options to change their plan:

- **Available to clients with a Washington Healthplanfinder account**:

  Go to Washington Healthplanfinder website.

- **Available to all Apple Health clients:**

  o Visit the ProviderOne Client Portal website:

  o Request a change online at ProviderOne Contact Us (this will generate an email to Apple Health Customer Service). Select the topic "Enroll/Change Health Plans."

  o Call Apple Health Customer Service at 1-800-562-3022. The automated system is available 24/7.

For online information, direct clients to HCA's Apple Health Managed Care webpage.

Clients who are not enrolled in an HCA-contracted managed care plan for physical health services

Some Medicaid clients do not meet the qualifications for managed care enrollment. These clients are eligible for services under the FFS Medicaid program. In this situation, each Integrated Managed Care (IMC) plan will have Behavioral Health Services Only (BHSO) plans available for Apple Health clients who are not in managed care. The BHSO covers only behavioral health treatment for those clients. Eligible clients who are not enrolled in an HCA-contracted managed care plan are automatically enrolled in a BHSO except for American Indian/Alaska Native clients. If the client receives Medicaid-covered services before being automatically enrolled in a BHSO, the FFS Medicaid program will reimburse providers for the covered services. Some examples of populations that may be exempt from enrolling into a managed care plan are Medicare dual-

CPT® codes and descriptions only are copyright 2021 American Medical Association.

eligible, American Indian/Alaska Native, Adoption support and Foster Care alumni.

Integrated managed care

Clients qualified for enrollment in an integrated managed care plan receive all physical health services, mental health services, and substance use disorder treatment through their HCA-contracted managed care organization (MCO).

For full details on integrated managed care, see HCA's Apple Health managed care webpage and scroll down to "Changes to Apple Health managed care."

Integrated Apple Health Foster Care (AHFC)

Children and young adults in the Foster Care, Adoption Support and Alumni programs who are enrolled in Coordinated Care of Washington's (CCW) Apple Health Foster Care program receive both medical and behavioral health services from CCW.

Clients under this program are:

- Under the age of 21 who are in foster care (out of home placement)

- Under the age of 21 who are receiving adoption support

- Age 18-21 years old in extended foster care

- Age 18 to 26 years old who aged out of foster care on or after their 18th birthday (alumni)

> These clients are identified in ProviderOne as "**Coordinated Care Healthy Options Foster Care**."

The Apple Health Customer Services staff can answer general questions about this program. For specific questions about Adoption Support, Foster Care or Alumni clients, contact HCA's Foster Care Medical Team at 1-800-562-3022, Ext. 15480.

Fee-for-service Apple Health Foster Care

Children and young adults in the fee-for-service Apple Health Foster Care, Adoption Support and Alumni programs receive behavioral health services through the regional Behavioral Health Services Organization (BHSO). For details, see HCA's Mental Health Services Billing Guide, under *How do providers identify the correct payer*?

CPT® codes and descriptions only are copyright 2021 American Medical Association.

American Indian/Alaska Native (AI/AN) Clients

American Indian/Alaska Native (AI/AN) clients have two options for Apple Health coverage:

- Apple Health Managed Care

- Apple Health coverage without a managed care plan (also referred to as fee-for-service [FFS])

If an AI/AN client does not choose a managed care plan, they will be automatically enrolled into Apple Health FFS for all their health care services, including comprehensive behavioral health services. See the Health Care Authority's American Indian/Alaska Native webpage.

Program Restrictions

How does HCA determine which drugs to cover?

Coverage determinations for HCA are decided by:

- HCA in consultation with federal guidelines.
- The Drug Use Review (DUR) Board.
- HCA's medical consultants and pharmacists.

If a product is determined to be covered, it will be assigned an authorization status (see Authorization.)

> **Note:** HCA evaluates a request for a drug that is listed as noncovered under the provisions of WAC 182-501-0160 related to noncovered services. The request for a noncovered drug is called a **request for an exception to rule**. See WAC 182-501-0160 for information about exception to rule.

What drugs, devices, and supplies are covered?

HCA covers:

- Outpatient drugs, including over-the-counter drugs listed on HCA's Apple Health Preferred Drug List, as defined in WAC 182-530-1050, subject to the limitations and requirements within this billing guide, when:
  - The drug is approved by the Food and Drug Administration (FDA).
  - The drug is for a medically accepted indication as defined in WAC 182-530-1050.
  - The drug is not excluded from coverage (see What drugs, devices, and supplies are not covered?).
  - The manufacturer has a signed drug rebate agreement with the federal Department of Health and Human Services (DHHS). Exceptions to the drug rebate requirement are described in WAC 182-530-7500, which details the drug rebate program.
- Family planning drugs, devices, and drug-related supplies per chapter 182-532 WAC such as:
  - Over-the-counter (OTC) family planning drugs, devices, and drug-related supplies without a prescription when HCA determines it necessary for client access and safety.
  - Family planning drugs that do not meet the federal drug rebate requirement in WAC 182-530-7500 on a case-by-case basis.
- Contraceptive patches, contraceptive rings, and oral contraceptives, only when dispensed in at least a 12-month supply, unless otherwise indicated by the prescriber or requested by the client. If less than a 12-month supply is requested, providers may use an expedited authorization (EA) code from the

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Apple Health EA list to dispense less than a 12-month supply. There is no minimum quantity of emergency contraception required to be dispensed.

- Prescription vitamins and mineral products, only as follows:
  - o When prescribed for clinically documented deficiencies
  - o Fluoride varnish for children under the early and periodic screening, diagnosis, and treatment (EPSDT) program
- Drug-related devices and supplies as an outpatient pharmacy benefit when they are:
  - o Prescribed by a provider with prescribing authority.
  - o Essential for the administration of a covered drug.
  - o Not excluded from coverage under WAC **182-530-2100**.
  - o A product covered under **chapter 182-543 WAC** that HCA determines should be available at retail pharmacies.

> **Note**: For exceptions to the prescription (prescriber's order) requirement, see **Exceptions to the Prescription Requirement**.

- Preservatives, flavoring, or coloring agents, only when used as a suspending agent in a compound.
- Nicotine replacement products, over-the-counter and prescription drugs to promote tobacco/nicotine cessation, *with a prescription*, when prescribed by a provider with prescriptive authority.

What drugs, devices, and supplies are not covered?

HCA does not reimburse under the Prescription Drug Program for drugs and drug-related supplies administered by health care professionals as a component of hospital services, physician-related services, or billed in conjunction with home health services. Reimbursement for drugs and drug-related supplies in these situations may be available when billed under the rules of the related program.

HCA does not reimburse for any of the following under the Prescription Drug Program:

- Nutritional supplements such as shakes, bars, puddings, powders, medical foods, etc. (These products may be reimbursable under the conditions of the Nondurable Medical Supplies and Equipment and Enteral Nutrition programs.)
- Drugs for which the manufacturer has **not signed a rebate agreement** with the federal Department of Health and Human Services (DHHS)
- Drugs considered **less than effective** and withdrawn by the Food and Drug Administration (FDA) because of the Drug Efficacy Study Implementation (DESI) review
- Free pharmaceutical samples

CPT® codes and descriptions only are copyright 2021 American Medical Association.

- Over-the-counter (OTC) drugs and drug-related supplies that have not been prescribed by a provider with prescriptive authority (except for OTC family planning products)

- OTC drugs and drug-related supplies that have been prescribed by a provider whose application for a Core Provider Agreement (CPA) has been denied or whose CPA has been terminated with cause

- Drugs prescribed for:

  o Weight loss or gain

  o Infertility, frigidity, or impotence

  o Sexual or erectile dysfunction

  o Cosmetic purposes or hair growth

- Over-the-counter drugs listed as noncovered on HCA's **Apple Health Preferred Drug List**

- Drugs and drug-related supplies for multiple patient use

- Any drug regularly supplied as an integral part of program activity by other public agencies (such as drugs, vaccines, or biological products available without charge to the client from the Department of Health)

- Products or items that do not have an 11-digit national drug code (NDC)

- Drugs with NDCs which have been designated as obsolete for more than two years

- Drugs with a shelf life that has expired prior to being dispensed

- Drugs purchased under section 340B of the Public Health Service (PHS) Act when dispensed by contract pharmacies

- Drugs which have been terminated or removed from the market

- More than a 34-day supply of any product except:

  o Drugs when the smallest package size exceeds a 34-day supply

  o Drugs with special packaging instructions which would require dispense of a quantity that exceeds a 34-day supply

  o Contraceptive patches, contraceptive rings, and oral contraceptives not used for emergency contraception. These products must be dispensed at a minimum of a 12-month supply, unless otherwise indicated by the prescriber or requested by the client.

  o When the drug is specifically identified as exempt from the 34-day limit

- Any vitamin product other than:

  o Vitamins determined by HCA to be the least costly therapeutic alternative for the treatment of a client's diagnosed condition

  o When HCA agrees that the vitamin product is the least costly alternative in treating documented vitamin deficiency which has been confirmed by laboratory testing

CPT® codes and descriptions only are copyright 2021 American Medical Association.

- Fluoride preparations other than as prescribed for children under the **Early and Periodic Screening, Diagnosis, and Treatment (EPSDT)** program

- Non-preferred drugs in drug classes as described in the **Apple Health Preferred Drug List (PDL)**

- Drugs, biological products, insulin, supplies, appliances, and equipment included in other reimbursement methods including, but not limited to:
  - Diagnosis-related group (DRG)
  - Ratio of costs-to-charges (RCC)
  - OTC products supplied to skilled nursing facility (SNF) residents (unless included in the Apple Health PDL)
  - Managed care capitation rates
  - Block grants
  - Drugs prescribed for clients who are in HCA's hospice program when the drugs are related to the client's terminal condition

- Drugs prescribed for an indication that is not evidence-based as determined by:
  - HCA in consultation with federal guidelines
  - The Drug Use Review (DUR) Board
  - HCA medical consultants and pharmacist(s)

- Drugs that are:
  - Not approved by the Food and Drug Administration (FDA)
  - Prescribed for non-FDA approved indications or dosing, which is not otherwise supported by quality evidence in the recognized compendia of drug information
  - Unproven for efficacy or safety

- Outpatient drugs for which the manufacturer requires as a condition of sale that associated tests or monitoring services be purchased exclusively from the manufacturer or manufacturer's designee

- Preservatives, flavoring, or coloring agents

- Prescriptions written on pre-signed prescription blanks completed by SNF operators or pharmacists. HCA may terminate the CPA of pharmacies involved in this practice

- Drugs used to replace those taken from SNF emergency kits

- The cost differential between the least costly dosage form of a drug and a more expensive dosage form within the same route of administration, unless the prescriber designated the costlier dosage form as medically necessary

CPT® codes and descriptions only are copyright 2021 American Medical Association.

What are the exceptions to the prescription requirement?

HCA reimburses specific OTC family planning drugs, devices, and supplies without a prescription. The following OTC contraceptives may be dispensed without a prescription to any HCA client with a current Services Card:

- Condoms (including female condom)
- Vaginal spermicidal foam with applicator and refills
- Vaginal spermicidal jelly with applicator
- Vaginal spermicidal creams and gels
- Vaginal spermicidal suppositories
- OTC emergency contraception

> **Point-of-sale billers must**: Bill HCA fee-for-service using the Product ID Qualifier of 03 in field 436-E1, and the product-specific NDC number in field 407-D7. Use Prescriber ID Qualifier (466-EZ) 01 and Prescriber ID (407-D7) of **5123456787**. Regardless of the contraceptive, bill the NDC as stated on the package.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Prescription Monitoring Program (PMP)

Providers must check the Prescription Monitoring Program (PMP), as required by WAC 182-530-1080.

How do providers and facilities register, access, and use the PMP?

See the Department of Health's Prescription Monitoring Program webpage for information about PMP registration, access, and use. This webpage also includes information about integration for facilities, pharmacies, and electronic health records (EHR) systems.

When is a provider required to check the PMP?

Prescribers must check the PMP before prescribing any controlled substance. This check must be completed no more than ten days before prescribing a controlled substance.

Dispensing pharmacists must check the PMP no later than two days after dispensing a controlled substance.

May a delegate complete the PMP review?

The prescriber or dispensing pharmacist may delegate the retrieval of the client's PMP information to anyone in their practice setting with authorization to access the PMP. The prescriber or dispensing pharmacist must be the person to review the client's current prescriptions, including any prescriptions not paid for by Apple Health.

How is the PMP retrieval and review documented?

The prescriber and dispensing pharmacist must document in the client's medical record (the client's chart notes and pharmacy profile) the date and time the information was retrieved and the date and time it was reviewed. If the prescriber and dispensing pharmacist work together in the same facility, the client's clinical and pharmacy records must document the date and time of the PMP information retrieval and the date and time both the prescriber and the dispensing pharmacist reviewed the PMP information.

Are there exceptions to reviewing the PMP?

Providers or their delegates must make a good faith effort to retrieve the PMP information. If, after a good faith effort, retrieval is not possible, the provider or delegate must document the date and time of the attempt(s) and reason they were unable to retrieve the information.

Is the PMP review required for all clients?

. The PMP review is required for clients enrolled in an Apple Health managed care organization (MCO) or fee-for-service (FFS) program. This includes dual-eligible clients (those with Medicare and Medicaid) and clients with third-party liability (TPL), where Apple Health is the secondary payer.

The PMP review is **not** required when a client is:

- Receiving hospice or palliative care

- Receiving treatment for cancer

- A resident of a long-term care facility

- A resident of a facility where frequently abused drugs are dispensed through a contract with a single pharmacy

Can the PMP reviews be audited?

Yes. HCA may audit prescribers' and pharmacists' compliance with the PMP review requirements as authorized by Section 5042 of the Support Act and WAC 182-530-1080.

Compliance Packaging

HCA, the Home Care Association of Washington (HCAW), and the Washington State Pharmacy Association (WSPA) developed the following guidelines in a cooperative effort to improve drug therapy outcomes for the most at-risk segment of the medical assistance population.

What is included in compliance packaging?

Compliance packaging includes both of the following:

- Reusable, hard plastic containers of any type (e.g., Medisets, weekly minders, etc.)

- Non-reusable compliance packaging (e.g., blister packs, bingo cards, bubble packs, etc.)

How is it determined that a client is eligible for compliance packaging?

Prescribers are encouraged to communicate to high-risk clients the need for compliance packaging if, in their professional judgment, such packaging is appropriate.

Clients are considered high-risk and eligible to receive compliance packaging if they:

- **Do not reside** in a skilled nursing facility or other inpatient facility.

- Have one or more of the following representative disease conditions:

    o Alzheimer's disease

    o Blood clotting disorders

    o Cardiac arrhythmia

    o Congestive heart failure

    o Depression

    o Diabetes

    o Epilepsy

    o HIV/AIDS

    o Hypertension

    o Schizophrenia

    o Tuberculosis

AND

- Concurrently consume two or more prescribed medications for chronic medical conditions that are dosed at three or more intervals per day.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

- Demonstrate a pattern of noncompliance that is potentially harmful to the client's health. The client's pattern of noncompliance with the prescribed drug regimen must be fully documented in the provider's file.

Prefilling a syringe is not considered compliance packaging. See **Special Programs/Services** for syringe filling guidelines.

Managed care clients who meet these criteria are eligible to have compliance packaging paid for under fee-for-service (FFS) when one or more medications packaged are covered under the FFS benefit. Packaged medications may include a combination of medications paid for by the client's managed care organization and medications paid under FFS, as long as a paid FFS claim exists for at least one medication included in the packaging. To bill HCA through FFS for compliance packaging that meets these conditions, enter the appropriate expedited authorization (EPA) code on the claim. See **What is required when billing for compliance packaging?** for additional requirements and guidelines.

What is required when billing for compliance packaging?

To bill for compliance packaging:

- Bill electronically on an approved professional claim. See HCA's **ProviderOne Billing and Resource Guide** for general billing instructions.

- Include the NPI of the ordering practitioner in the 'referring' field. The ordering practitioner is the prescriber or pharmacist who determined the client meets compliance packaging criteria.

- Bill your usual and customary charge. Reimbursement will be the billed charge or the maximum allowable fee, whichever is less.

- Use the following procedure codes in combination with the appropriate modifier. HCA will deny claims for these procedure codes without the accompanying modifier.

Short Description	HCPCS Code	Modifier	Maximum Allowable Units*
Reusable compliance device or container	T1999	UE	Limit of 4 per client, per year May be billed in combination but not to exceed a total of 4 per year
Reusable compliance device or container, extra-large capacity	T1999	SC	Limit of 4 per client, per year May be billed in combination but not to exceed a total of 4 per year
Filling fee for a reusable compliance device or container	T1999	TS	Limit of 4 fills per client, per month
Non-reusable compliance device or container	T1999	NU	Limit of 4 fills per client, per month Includes reimbursement for materials and filling time. Bill one unit each time non-reusable compliance packages are filled.

* See the Pharmacy **Special Services, Vaccine Administration, and Compliance Packaging fee schedule**

HCA does not pay for compliance packaging more than the limits listed above. Requests for limitation extensions will not be approved.

> **Note**: For MCO clients who are eligible for compliance packaging through FFS, pharmacies must enter expedited authorization (EA) code 870001421 on the billing form in the *Authorization Number* field, or in the *Authorization* or *Comments* section when billing electronically.

Billing for single-dose vials

When a drug is packaged in a single-dose vial that cannot be used for multiple injections, HCA reimburses for the entire quantity of the drug or biological contained in the vial. HCA requires providers to use the smallest vial size available from the manufacturer(s) containing the amount necessary for administration. Unused product discarded as waste is covered in addition to the quantity administered, up to the maximum number of allowed units for the vial size used. HCA considers the entire vial to have been used in providing services to the client and will reimburse accordingly.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

> **Note**: The actual National Drug Code (NDC) that was dispensed must be used when submitting a claim. The number of units contained within each vial must be billed as a single claim. (See WAC 182-530-5000(1)(b).)

For information on billing for single-dose vials on medical claims, see Billing for single-dose vials (SDV) in the Physician-Related Services/Health Care Professional Services Billing Guide.

Does a provider need HCA approval to bill for splitting single-dose vials?

Yes. Providers must obtain HCA approval to bill for splitting single-dose vials. To receive HCA approval, submit the following documentation by fax to the attention of the Pharmacy Administrator at 1-360-725-1328:

- Documentation showing all requirements of the United States Pharmacopeia General Chapter 797, Pharmaceutical Compounding - Sterile Preparations regulations are met, including the date of the last laminar flow hood inspection and through date of the certification

- The policy the provider has established regarding IV admixture preparations

- The policy the provider has established regarding when single-dose vials are split and how the remainder is to be used

- The billing NPI(s) of the requesting provider

HCA will provide an approval or denial of the provider's request within 10 business days.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Compounded Prescriptions

What is compounding?

Compounding is the act of combining two or more active ingredients or the medically necessary adjustment of therapeutic strengths and/or forms by a pharmacist for a single active ingredient. HCA does not consider drug reconstitution to be compounding. HCA reimburses pharmacists for compounding drugs only if the client's drug therapy needs are unable to be met by commercially available dosage strengths and forms of the medically necessary drug.

> **Note**: All compound ingredients must be billed on one claim. Each ingredient must be separately detailed using the National Council for Prescription Drug Programs (NCPDP) Compound Segment. HCA's point-of-sale (POS) system does not accept **highest cost ingredient** compound billing.
>
> The pharmacist must document in the client's file the need for the adjustment of the drug's therapeutic strength or form, or both.

Which ingredients are not reimbursed in compounds?

- Coloring agents, preservatives, and flavoring agents used in compounded prescriptions **except** when they are necessary as a complete vehicle for compounding (e.g., simple syrup)

- Any product which would not be reimbursable when used outside of a compound, except as detailed on the following page

What additional ingredients are reimbursable in compounds?

- Bulk chemicals which are active ingredients and are considered non-drug items when used outside of a compound

- Vehicles or suspending agents necessary for the completion of the compound

HCA reimburses for compounding ingredients from the following chemical supply companies who have not signed Federal Rebate agreements:

Labeler Code	Company
00395	Humco Labs
00802	Emerson Labs

CPT® codes and descriptions only are copyright 2021 American Medical Association.

> **Note**: Other chemical suppliers' products are reimbursable only if they have been reported to HCA's current drug file contractor with a valid 11-digit national drug code (NDC) and the manufacturer has signed a Federal Rebate agreement.

Is authorization required to compound prescriptions?

No. HCA does not require authorization to compound prescriptions.

Individual ingredients requiring authorization still require authorization when used in a compound, except as previously noted.

The need for authorization of any single ingredient within a compound will cause the entire compound claim to be rejected until authorized, but only the individual ingredient actually requires authorization.

Billing for compounded prescriptions

- Pharmacies must bill each ingredient used in compounded prescriptions using the 11-digit NDC for each ingredient.

- Bill the **appropriate** quantity used for each ingredient on one claim. **Do not bill the combined total quantity**.

- HCA pays a dispensing fee for each payable ingredient. HCA does not pay separate fees for compounding time or preparation fees.

> **Note**: If a compound is rejected, pharmacies may elect to accept reimbursement for any payable ingredient within the compound by entering an **8** in the Submission Clarification Code field (420-DK).
>
> **Point-of-sale billers must**:
>
> - Enter a Compound Code (field 406-D6) of 2 in the Claim Segment.
>
> - Enter a Product/Service ID Qualifier (436-E1) of 03 in the Claim Segment.
>
> - Enter a Product/Service ID (407-D7) of **00000-0000-00** in the Claim Segment.
>
> - Enter the separate ingredient details using the Compound Segment.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Special Programs and Services

Can pharmacists or pharmacies bill for COVID-19 testing for Apple Health (Medicaid) clients?

Yes, as follows:

- A pharmacist may be a servicing or billing provider for COVID-19 testing.

- A pharmacy may bill for COVID-19 testing performed by a pharmacist in a pharmacy.

For updated information regarding COVID-19, see HCA's Information about novel coronavirus (COVID-19) webpage.

Tobacco/Nicotine Cessation Program

For eligibility and coverage requirements, see the *Behavior change intervention-tobacco/nicotine cessation* section in HCA's Physician-Related Services/Health Care Professional Services Billing Guide.

Pharmacists with a collaborative practice agreement may provide tobacco/nicotine cessation counseling and prescribe for clients. For counseling requirements, limitations, billing information, and resources, see the *Physician-Related Services/Health Care Professional Services Medicaid Billing Guide*.

How does a pharmacy bill HCA for Clozaril/Clozapine and related services?

HCA reimburses pharmacies for Clozaril/Clozapine plus pays a dispensing fee. Bill Clozaril/Clozapine using the appropriate national drug code (NDC) on either the point-of-sale (POS) system or electronically through ProviderOne. See HCA's ProviderOne Billing and Resource Guide for general billing instructions.

Any licensed or registered pharmacy with clinical experience in monitoring patient mental and health status may provide and bill for case coordination (medication management) for clients receiving Clozaril/Clozapine.

Persons providing case coordination serve as a focal point for the client's Clozaril/Clozapine therapy. All services must be documented and are subject to quality assurance review. When providing case coordination, providers must:

- Coordinate a plan of care with the:
  - Client
  - Client's caregiver
  - Prescriber
  - Pharmacy
- Assure services are provided to the client as specified in the plan of care.
- Assure blood samples are drawn according to the Food and Drug Administration (FDA) labeling, blood counts are within normal range, and the client is compliant with the plan of care.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

- Follow-up with the client on missed medical appointments.

- Maintain detailed, individual client records to document the client's progress.

- Provide feedback to the prescriber on the client's progress, immediately report abnormal blood counts, and client noncompliance.

- Assure smooth transition to a new case coordinator, when necessary.

See HCA's ProviderOne Billing and Resource Guide for general billing instructions. Use the following procedure codes to bill for Clozaril/Clozapine related services on an approved electronic professional claim:

Procedure Code	Modifier	Description	Reimbursement
36415		Routine venipuncture	Per the Resource-Based Relative Value Scale (RBRVS) fee schedule
99605	HE		See the Pharmacy Special Services, Vaccine Administration, and Compliance Packaging fee schedule
99606	HE		See the Pharmacy Special Services, Vaccine Administration, and Compliance Packaging fee schedule

> **Note**: Due to close monitoring requirements, HCA allows up to five fills per month.

Emergency contraceptive pills (ECP)

HCA reimburses for emergency contraceptive pills (ECP) through the POS system for female clients in eligible programs. ECP that is not over-the-counter (OTC) requires a prescription to be dispensed. OTC ECP may be dispensed with or without a prescription.

Levonorgestrel (OTC) does not require a prescription.

Ulipristal requires a prescription.

To receive reimbursement for OTC ECP that does not require a prescription and was not prescribed, pharmacies must bill HCA fee-for-service (FFS) using the specific NDC and Prescriber ID number **5123456787**. It is common practice to dispense two packages at a time, especially for clients using barrier contraceptive methods. Pharmacies are instructed to dispense the quantity requested by the client. Pharmacies that are members of, or subcontract with, an HCA-contracted managed care organizations (MCO) and are serving an MCO must bill the prescription cost to the plan. HCA reimburses pharmacists for ECP plus pays a dispensing fee. Bill for ECP using the appropriate NDC.

See the Family Planning Billing Guide for more information on covered products and services.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Emergency contraception (EC) counseling

When a pharmacist with an EC protocol approved by the Board of Pharmacy prescribes ECPs, the pharmacy may bill HCA for the counseling portion.

Pharmacists performing EC counseling must ensure that a copy of the pharmacist's current approved protocol certificate from the Board of Pharmacy is on file at the pharmacy where the service was performed. Performing EC Counseling without a currently approved protocol is subject to sanction by the Board of Pharmacy. Billing HCA for EC Counseling without a current, approved protocol **on file** is subject to recoupment of payment.

The counseling is a service-related item, not a drug, and must be billed on an approved electronic professional claim. See HCA's **ProviderOne Billing and Resource Guide** for general billing instructions.

> **BILLING ON A PROFESSIONAL CLAIM**
>
> - Use diagnosis code Z30.09 (contraceptive management).
>
> - Use the following procedure code and modifier to bill for EC counseling:

Procedure Code	Modifier	Description	Maximum Allowable Fee
99605	FP	EC Counseling	See the Pharmacy Special Services, Vaccine Administration, and Compliance Packaging fee schedule

What is the Patient Review and Coordination (PRC) Program?

PRC is a health and safety program for fee-for-service (FFS) and managed care clients needing help in the appropriate use of medical services.

Clients assigned to the PRC program are identified as such in ProviderOne.

When a client is initially placed in the PRC program, HCA or managed care organization (MCO) places the client for no less than 24 months with one or more of the following types of health care providers:

- Primary care provider (PCP)

- Pharmacy for all prescriptions

- Prescriber of controlled substances

- Hospital for nonemergency services unless referred by the assigned PCP or a specialist. A client may receive covered emergency services from any hospital

- Another qualified provider type, as determined by HCA or MCO staff on a case-by-case basis

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Assignment in the PRC program is for an initial period of 2 years. After 2 years, a review is conducted to determine if the restriction will be lifted. If the restriction is lifted, the client is no longer on the PRC program. If the restriction is NOT lifted, the client stays on the PRC program for another 3 years. After 3 years, a review is conducted to determine if the restriction will be lifted. If this restriction is lifted, the client is no longer on the PRC program. If this restriction is NOT lifted, the client stays on the PRC program for another 6 years. All further restriction periods are for an additional 6 years.

PRC criteria

HCA or MCO staff use the following usage guidelines to initiate a review for PRC placement. A client may be placed in the PRC program when either the client's medical history or billing history, or both, documents any of the following:

- Any two or more of the following conditions occurred for the client in a period of 90 consecutive calendar days in the previous 12 months:

    o Received services from four or more different providers, including physicians, ARNPs, and PAs not located in the same clinic or practice

    o Had prescriptions filled by four or more different pharmacies

    o Received ten or more prescriptions

    o Had prescriptions written by four or more different prescribers not located in the same clinic or practice

    o Received similar services on the same day not located in the same clinic or practice

    o Had ten or more office visits

-OR-

- Any one of the following occurred for the client within a period of 90 consecutive calendar days in the previous 12 months:

    o Made two or more emergency agency visits

    o Exhibits **at-risk** usage patterns

    o Made repeated and documented efforts to seek health care services that are not medically necessary

    o Was counseled at least once by a health care provider, or an agency or an MCO staff member with clinical oversight, about the appropriate use of health care services

-OR-

- The client received prescriptions for controlled substances from two or more different prescribers not located in the same clinic or practice in any one month within the 90-day review period.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

-OR-

- The client has either a medical history or billing history, or both, that

  demonstrates a pattern of the following at any time in the previous 12 months:

  - o Using health care services in a manner that is duplicative, excessive, or contraindicated

  - o Seeking conflicting health care services, drugs, or supplies that are not within acceptable medical practice

  - o Being on substance abuse programs such as the alcohol and drug abuse treatment and support act (ADATSA)

(See WAC 182-501-0135(6)(a)-(d))

What is the pharmacy's role in the PRC Program?

The assigned pharmacy is a key player in managing the client's prescriptions. The pharmacist will be able to alert the client's primary care physician (PCP), narcotic prescriber, or HCA's PRC staff of misuse or potential problems with the client's prescriptions.

Since pharmaceuticals are an HCA-covered service, do not accept cash from clients except for drugs not covered by HCA under WAC 182-502-0160.

A major focus of the PRC Program is education. Educating the client on appropriate use of prescriptions, drug interactions, the importance of maintaining one PCP and pharmacy to manage and monitor one's care are key elements in helping the client appropriately use services.

Clients who have been in the PRC program have shown a 33% decrease in emergency room use, a 37% decrease in physician visits, and a 24% decrease in the number of prescriptions.

What happens if a restricted client goes to a non-assigned pharmacy?

If a restricted client goes to a **non-assigned pharmacy**, the POS system will reject the claim. In the case of a non-emergency situation, the client should be referred to their assigned pharmacy.

Washington State has the **prudent layman's** law, in which clients can go to the emergency room **if they think** they have a problem and must be seen by the emergency room staff. However, emergency room prescriptions cannot be overridden in the POS system by a non-assigned PRC pharmacy. In this situation, the pharmacist may call the PRC referral line during regular business hours (Monday-Friday, 8 a.m. – 5 p.m.) at 1-800-562-3022 extension 15606 to request an override.

At their discretion in an emergency situation, pharmacists may fill all medications except scheduled drugs, unless verification is made with the prescriber that there is a legitimate medical necessity. Justification for the emergency fill must be

provided to the PRC Program the next business day for an override to be completed.

For more information, or to report over-utilization of services, contact:

Patient Review and Coordination (PRC) Program
PO Box 45530
Olympia, Washington 98504-5532

Phone: 1-800-562-3022, ext. 15606
FAX: 1-360-725-1969

Visit HCA's Patient Review and Coordination (PRC) Program webpage.

How are HCA-covered vaccines and vaccine administration fees billed?

- All covered vaccines other than influenza, pneumonia, and shingles must be billed on a professional claim. See HCA's ProviderOne Billing and Resource Guide for general billing instructions.

- Administration fees must be billed on a professional claim (including influenza, pneumonia, and shingles vaccines). The POS system does not have the capability to reimburse for professional services other than dispensing fees.

- HCA reimburses qualified pharmacists for the administration of all HCA-covered vaccines for clients on eligible programs.

Clients age 18 and younger

HCA does not reimburse for any vaccine that is available free from the Department of Health (DOH) through the Universal Vaccine Distribution Program and the federal Vaccines for Children program.

HCA pays **only the administration fee** for any vaccine available at no cost from DOH.

Which vaccines are covered and are they available free from DOH?

To check which vaccines are **free from DOH**, refer to the Professionally Administered Drug Fee Schedule.

Billing for the administration of a vaccine available free from DOH

Bill for the administration of these vaccine(s) with the appropriate procedure code for the vaccine and use modifier SL (e.g., 90707 SL).

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Billing for vaccines that are not free from DOH

- Bill for the cost of the vaccine with the appropriate procedure code for the vaccine.

- Bill for the vaccine administration using CPT® codes 90471 (first vaccination) and 90472 (additional vaccinations). HCA limits reimbursement to a maximum of one unit of 90471 and one unit of 90472 per client, for the same date of service.

- The administration codes must be billed on the same claim as the procedure code for the vaccine.

- DO NOT use modifier SL with these vaccines.

How must a pharmacy bill HCA for influenza, pneumonia, and shingles vaccines?

Pharmacists must bill for influenza, pneumonia, and shingles vaccines (unless the vaccine is free from the Washington State Department of Health (DOH)) with national drug codes (NDCs) through the point-of-sale (POS) system, and for the administration on a professional claim. Influenza and pneumonia vaccines are covered for clients age 19 and older. Shingles vaccines are covered for clients age 50 and older.

Billing for vaccine administration

HCA pays pharmacists for administering influenza, pneumonia, and shingles vaccinations only if they have an immunization collaborative practice protocol on file with the Washington State Department of Health (DOH), State Board of Pharmacy. When billing for the administration of an HCA-covered vaccine, the pharmacist's NPI must be entered in the **Prescriber ID** field (411-DB).

> **Note**: Pharmacies may **not** use their Pharmacy Location NPI as the Provider NPI.

Procedure Code	Description	Maximum Allowable Fee
G0008	Administration of influenza virus vaccine	See the **Pharmacy Special Services, Vaccine Administration, and Compliance Packaging fee schedule**
G0009	Administration of pneumococcal vaccine	See the **Pharmacy Special Services, Vaccine Administration, and Compliance Packaging fee schedule**
90471	Administration of shingles vaccine	See the **Pharmacy Special Services, Vaccine Administration, and Compliance Packaging fee schedule**

CPT® codes and descriptions only are copyright 2021 American Medical Association.

HCA pays pharmacies for procedure codes G0008, G0009 and 90471 (administration codes) when billed with place of service 01 (pharmacy).

Bill HCA for the vaccine administration using only an approved electronic professional claim. See HCA's ProviderOne Billing and Resource Guide for general billing instructions. Vaccine administrations **cannot** be billed through the pharmacy POS system.

> **Note**: When billing on an electronic professional claim, use the NPI – do not use the NCPDP number. Continue to bill the influenza, pneumonia, or shingles vaccine itself through the POS system using the NDC.

What diabetic supplies does HCA cover?

HCA covers diabetic supplies through the pharmacy point-of-sale system as follows:

- Omnipods for diagnosis of type 1 diabetes. PA is required. Limited to 15 units per 30 days.
- Diabetic test strips and lancets:
  - For children, age 20 and younger, as follows:
    - ➢ Insulin dependent, 300 test strips and 300 lancets per client, per month. EPA is required.
    - ➢ Noninsulin dependent, 100 test strips and 100 lancets per client, per month.
  - For adults age 21 and older:
    - ➢ Insulin dependent, 100 test strips and 100 lancets per client, per month. For pharmacy POS, EPA is required.
    - ➢ For noninsulin dependent, 100 test strips and 100 lancets per client, every 3 months.
  - For pregnant women with gestational diabetes or had diabetes prior to pregnancy, HCA pays for the quantity necessary to support testing as directed by the client's physician, up to 60 days postpartum. For pharmacy POS providers, Expedited Authorization required.
- Syringes and needles.
- Alcohol wipes.
- For other covered diabetic supplies, see the Medical Equipment and Supplies Billing Guide for more information on covered products and services related to diabetic supplies.

For expedited codes and criteria, see HCA's Expedited Authorization List.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Does HCA reimburse for human papillomavirus (HPV) vaccine?

GARDASIL®

HCA reimburses for GARDASIL® (HPV (Types 6,11,16,18) Recombinant Vaccine). See the Immunizations in Physician-Related Services/Healthcare Professional Services Billing Guide.

Does HCA reimburse for flu prevention medication?

HCA reimburses for oseltamivir, without prior authorization (PA).

PA is required for all other flu prevention medications.

What form is used to bill for pre-filling syringes?

Fees for pre-filling syringes may be billed on an approved electronic claim professional claim.

These fees are not billable on POS.

- Each unit billed must be for a two-week supply

- The maximum number of units allowed per month is three

Use the following HCPCS code:

Description	HCPCS Code	Maximum Allowable Fee
Pharmacy compounding and dispensing services (to be used for pre-filling syringes)	S9430	See the Pharmacy Special Services, Vaccine Administration, and Compliance Packaging fee schedule

ADHD (attention deficit hyperactivity disorder) safety edits

HCA promotes the safe and effective use of attention deficit hyperactivity disorder (ADHD) medication. HCA requires PA for prescriptions for clients receiving ADHD drugs when exceeding the recommended maximum dosage limits or when ADHD therapy duplications occur.

For clients age 17 and younger, see HCA's Second Opinion Program webpage for more information on additional PA requirements.

Second Opinion Program

The Second Opinion Program is designed to improve prescribing practices for children ages 17 and younger. In collaboration with The Pediatric Mental Health Advisory Group and the Drug Utilization Review Board, HCA established pediatric mental health guidelines to identify children who may be at high risk due to off-label use of prescription medication, use of multiple medications, high medication dosage, or lack of coordination among multiple prescribing providers.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

The guidelines include, but are not limited to, the following:

- Alpha-agonist age and dose limits
- Antidepressant therapy duplications
- Antipsychotic age and dose limits
- Antipsychotic therapy duplications
- Attention deficit hyperactivity disorder (ADHD) age and dose limits
- ADHD therapy duplications
- Insomnia medications
- Mental Health Polypharmacy (medication therapy includes five or more mental health drugs)

As part of the authorization process, a prescriber must engage in a telephone consultation with an HCA-designated mental health specialist from the Second Opinion Network (SON). A SON representative will contact the prescriber to schedule the required phone consultation. To receive payment for the telephone consultation with SON, bill HCA using procedure code 99441 on the claim.

At the time of the authorization request, HCA will approve continuation of pre-existing drug therapy until the SON consultation process is complete. HCA authorization decisions will be based on the recommendations to HCA by the SON mental health specialist.

For more information on the second opinion program and the pediatric mental health guidelines, see HCA's Second Opinion Program webpage.

Oral, Transdermal, and Intra-Vaginal Hormonal Contraceptives

HCA requires oral, intra-vaginal, and transdermal hormonal contraceptives to be dispensed in a 12-month supply (See WAC 182-530-2000 (1)(b)(iii)), unless otherwise indicated by the prescriber or requested by the client. For the purposes of dispensing these contraceptive products, **12-month** means a 365-day supply. If less than a 12-month supply is indicated or requested, providers may use an expedited authorization code from the Apple Health EA list to dispense less than a 12-month supply. There is no minimum quantity of emergency contraception required to be dispensed.

> **Note**: When submitting a claim with an EA code, you must document on the prescription the code that was used and the reason.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Cough and cold drug coverage

HCA restricts coverage of drugs used to treat cough and colds to those drugs listed as covered on the Apple Health Preferred Drug List. HCA bases its decision on which drugs to place on this list using evidence of efficacy and safety and current best practices.

OTC drugs used to treat cough and colds, listed as noncovered on the Apple Health Preferred Drug List, may be billed directly to the client as a non-prescribed OTC.

Prescription drugs used to treat cough and colds, listed as noncovered on the **Apple Health Preferred Drug List,** may be purchased by the client with a signed waiver. (See Billing the Client, WAC 182-502-0160 and Coordination of Benefits.)

Generics first (GF)

HCA requires that a preferred generic drug be used as a client's first course of treatment within specific drug classes on the Apple Health Preferred Drug List (PDL). Only clients who are new to a drug class will be required to start on a preferred generic product. When a client has not received a drug in one of these drug classes within 180-days prior to the date of the fill, HCA's POS system will reject claims for both non-preferred and preferred brand name drugs as well as non-preferred generic drugs.

If the brand name drug has been prescribed by a non-endorsing practitioner, or by an endorsing practitioner who has not indicated Dispense As Written (DAW), the brand will **not** be covered by HCA. If the prescriber is an endorsing practitioner, and Therapeutic Interchange is allowed in the drug class, the product should be switched to a preferred drug. Otherwise, when requested to do so by POS return messaging, contact the prescriber to request a change of the prescription to a preferred generic drug.

If the prescription is signed "DAW" by an endorsing practitioner for a drug within a GF drug class, contact HCA to request authorization. HCA will provide the endorsing practitioner with an opportunity to justify the medical necessity for starting the client on a brand name drug or a non-preferred generic as their first course of therapy.

HCA will cover only preferred generic drugs as a client's first course of therapy within the following drug classes:

- ACE inhibitors
- Attention Deficit Hyperactivity Disorder (ADHD) drugs
- Beta blockers
- Estrogens
- Estrogen – progestin combinations
- Long-acting opioids
- Nasal corticosteroids
- Newer antihistamines

CPT® codes and descriptions only are copyright 2021 American Medical Association.

- Newer sedative/hypnotics

- Nonsteroidal anti-inflammatory drugs (NSAIDS)

- Overactive bladder/urinary incontinence

- Proton pump inhibitors (PPI)

- Second generation antidepressants

- Second generation antipsychotics

- Skeletal muscle relaxants

- Statin-type cholesterol-lowering agents

Medication assisted treatment (MAT)

HCA's Clinical Guidelines and Coverage Limitations for Medication Assisted Treatment (MAT) and links to the Medication Assisted Treatment request forms can be found on HCA's **Apple Health (Medicaid) Drug Coverage Criteria** webpage.

Voluntary treatment

For clients eligible in a voluntary recipient aid category (RAC), some prescriptions for related treatment will require retro-authorization. To request payment for prescriptions related to voluntary treatment that require authorization, contact **applehealthpharmacypolicy@hca.wa.gov** and include the following information:

- Client name (first and last)

- Client date of birth

- Client ProviderOne ID

- Date of service

- Drug name

- Drug NDC

- Drug quantity, days' supply, and directions for use

- Prescriber name and NPI

- Pharmacy name and NPI

For more information on voluntary treatment and voluntary RAC, please see HCA's **Mental Health Services Billing Guide**.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Authorization for proton pump inhibitors (PPIs)

HCA limits proton pump inhibitors (PPIs) to one tablet/capsule per day for 60 days during any 12-month period. HCA may authorize more than 60 days per 12-month period and/or more than one tablet/capsule per day for patients taking certain medications or who have one of the following chronic medical conditions:

Chronic medical conditions include:

- Pathological gastric acid hypersecretion, such as Zollinger-Ellison syndrome

- Barrett's esophagus

- Esophageal stenosis/stricture or Schatzki ring

- Recent erosive/ulcerative esophagitis or duodenal/gastric ulcer

Concurrent medications include:

- Chronic NSAID use (including aspirin greater than or equal to 325 mg per day)

- Chronic low-dose aspirin with history of a GI bleed

- Chronic high-dose systemic steroid

- Antiplatelet or anticoagulant

- Bisphosphonate where there are pre-existing esophageal disorders

- Pancreatic enzyme

- Cancer Therapies

Prescribers should:

- Re-evaluate therapy for patients diagnosed with GERD.

- Gradually reduce the dose of the PPI over 30 days and discontinue, using an H2RA, to reduce the occurrence of rebound acid reflux.

- Discuss with their patients the guidelines on the management and treatment of GERD.

- Consider endoscopy for patients unable to control symptoms caused by GERD after 8 weeks of PPI treatment followed by a 30-day cross-taper to an H2RA.

The American College of Gastroenterology (ACG) guidelines recommend the following for the treatment of GERD:

- Weight loss

- Head of bed elevation

- Avoidance of meals 2-3 hours before bedtime

- PPI for 8 weeks

For the complete Apple Health (Medicaid) PPI policy and sample taper plan, please visit the Apple Health (Medicaid) Drug Coverage Criteria webpage.

What is HCA's clinical policy for opioid prescriptions?

For information and resources regarding HCA's Apple Health (Medicaid) opioid clinical policy, refer to HCA's Opioid webpage.

Does HCA cover over-the-counter (OTC) drugs?

HCA has reviewed and determined that the covered OTC drugs on the Apple Health Preferred Drug List are the least costly therapeutic alternatives for medically accepted indications. (See WAC 182-530-2000(1)(d))

OTC drugs listed on HCA's Apple Health Preferred Drug List as not covered OTC may be billed directly to the client as a non-prescribed OTC.

Where is information available for Synagis®?

For information on Synagis, see the *Drugs Professionally Administered* section in HCA's current Physician Related Services/Health Care Professional Services Billing Guide.

What does emergency fill mean?

Emergency fill means that the dispensing pharmacist used their professional judgment to meet a client's urgent medical need and dispensed the medication to the client prior to receiving reimbursement from HCA.

HCA guarantees payment on claims for emergency fills. HCA will authorize rejected claims upon request if the medication was dispensed as an emergency fill.

For more information and guidelines on emergency fills, see HCA's Emergency Fill Policy.

Does HCA pay for hemophilia- and von Willebrand-related products for home administration?

HCA does not pay for hemophilia- and von Willebrand-related products for administration in the home when dispensed through and billed by retail or specialty pharmacies. HCA pays for hemophilia- and von Willebrand-related products shipped to fee-for-service clients **only** when the products are provided through a qualified hemophilia treatment center of excellence (COE).

> **Note**: If a client has not yet established a care relationship with a qualified hemophilia COE, but an initial appointment has been scheduled, specialty pharmacy providers may contact HCA to request an authorization to continue to dispense product to the client. The pharmacy must call HCA's Pharmacy Authorization Section at 800-562-3022, extension 15483.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

What is the criteria to become a Qualified Hemophilia Center of Excellence (COE)?

To become a qualified hemophilia COE, a hemophilia center must meet all the following:

- Have a current core provider agreement in accordance with WAC 182-502-0005

- Be a federally approved hemophilia treatment center (HTC) as defined in Definitions and meet or exceed all Medical and Scientific Advisory Council (MASAC) standards of care and delivery of services

- Participate in the public health service 340B provider drug discount program and be listed in the Medicaid exclusion files maintained by the federal Health Resources and Services Administration (HRSA) Office of Pharmacy Affairs (OPA)

- Submit a written request to HCA to be a qualified hemophilia treatment center of excellence and include proof of the following:

  o U.S. Centers for Disease Control (CDC) and prevention surveillance site identification number

  o Listing in the hemophilia treatment center (HTC) directory

  o Receive written approval including the conditions of payment and billing procedures from HCA

To be recognized as a qualified hemophilia COE, submit a written request to:

Hemophilia Treatment COE
Health Care Authority – Health Care Services
PO Box 45506
Olympia WA 98504-5506

What annual documentation is required to remain a qualified hemophilia COE?

To remain a qualified hemophilia COE, the hemophilia COE must annually submit both of the following to HCA:

- Copies of grant documents and reports submitted to the Maternal and Child Health Bureau/Human Resources and Services Administration/Department of Health and Human Services, or to their designated subcontractors

- Proof of continued federal funding by the National Hemophilia Program and listing with the regional hemophilia network and the CDC

To view the list of qualified Centers of Excellence (COE) for hemophilia treatment, see HCA's current Physician-Related Services/Health Care Professional Services Billing Guide.

Where is information available for Alpha Hydroxyprogesterone (17P) and Makena?

For information on Alpha Hydroxyprogesterone (17P) and Makena, see the Drugs Professionally Administered section in HCA's current Physician Related Services/Health Care Professional Services Billing Guide.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Authorization

> **Note**: Authorization does not guarantee payment. All administrative requirements (client eligibility, claim timeliness, etc.) must be met before HCA can reimburse a claim.

When does HCA require authorization?

Pharmacists are required to obtain authorization for some drugs and drug-related supplies **before** providing them to the client. Other drugs require authorization only when specific limits on dosage, quantity, usage, or duration of use are exceeded. HCA may also require **situational** authorization that is not directly related to the product being dispensed. These situations include, but are not limited to:

- Early refills

- Therapeutic duplications

- Client's whose usage patterns are under review

- More than four prescriptions or prescription refills per calendar month for the same product in any of the following categories:

  o Antibiotics

  o Anti-asthmatics

  o Schedule II and III drugs

  o Anti-neoplastic agents

  o Topical preparations

  o Propoxyphene, propoxyphene napsylate, and all propoxyphene combinations

- More than two prescriptions or prescription refills per calendar month for any other product

HCA reviews authorization requests for medical necessity. The requested service or item must be covered within the scope of the client's program.

> **Exception**: In emergency situations, pharmacists may fill prescription drugs that require authorization without receiving an authorization number prior to dispensing.
>
> **Note**: To receive reimbursement, justification for the emergency fill must be provided to HCA no later than seven days after the fill date.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

How do I obtain authorization?

To obtain authorization for drug products requiring authorization, providers may:

- Fax a *Pharmacy Information Authorization* form 13-835A to HCA at 1-866-668-1214. (See **Where can I download HCA forms**?)

- Call HCA at 1-800-562-3022.

What information must be provided to HCA for an authorization number?

When calling or faxing to request authorization, the following information must be provided:

- Previous authorization number, if available

- Pharmacy NCPDP #

- Pharmacy NPI#

- Rx #

- Quantity and day's supply

- Tried and failed

- Client's ProviderOne Client ID

- National Drug Code (NDC) being dispensed

- Prescriber's name and specialty (if known)

- Prescriber's phone and fax number

- Date(s) of dispense

- Justification for the requested service:

    o The medical need for the drug and/or dosing (sig)

    o The diagnosis or condition of the client

    o Other therapies that have been tried and failed in the treatment of the same condition

HCA may request additional information, depending on the drug product.

If the request for authorization is missing any required information, it will be considered invalid, and HCA may not process the request.

Who determines authorization status for drugs in HCA's drug file?

For drugs included in the **Apple Health Preferred Drug List (PDL)**, authorization status is determined by, but not limited to, its designation as preferred or non-preferred.

For drugs **not** included in the PDL or drugs that require authorization beyond PDL requirements, HCA pharmacists, medical consultants, and the Drug Use

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Review Team evaluate drugs to determine authorization status of the drug file. HCA may consult with an evidence-based practice center, the Drug Use Review (DUR) Board, or participating HCA providers in this evaluation.

How is authorization status determined for drugs in HCA's drug file?

Drug manufacturers who wish to facilitate the evaluation process for a drug product may send HCA pharmacist(s) a written request and all the following supporting documentation:

- Background data about the drug

- Product package information

- Any pertinent clinical studies

- Outcome and effectiveness data using the Academy of Managed Care Pharmacy's drug review submission process

- Any additional information the manufacturer considers appropriate

HCA evaluates a drug based on, but not limited to, the following criteria:

- Whether the manufacturer has signed a federal drug rebate contract agreement

- Whether the drug is a less-than-effective drug

- The drug's risk/benefit ratio

- Whether like drugs are on HCA's drug file and a less costly therapeutic alternative

- Whether the drug falls into one of the categories authorized by federal law to be excluded from coverage

- The drug's potential for abuse

- Whether outcome data demonstrate that the drug is cost effective

What authorization status may be assigned to a drug?

HCA may determine that a covered drug is:

- Covered without restriction

- Requires authorization

- Requires authorization when exceeding HCA-determined limitations

Decisions regarding restrictions are based on, but are not limited to:

- Client safety

- FDA-approved indications

- Quantity

CPT® codes and descriptions only are copyright 2021 American Medical Association.

- Client age and/or gender
- Cost

> **Note**: For drugs with age or dose limitations, physicians and pharmacists should monitor the use of these drugs and counsel patients when they exceed limits. Authorization is required to exceed age and dose limits.

How are drugs added to HCA's drug file?

HCA's drug file is maintained by Medi-Span® (a drug file contractor). Manufacturers must report their products to Medi-Span® for them to be included in HCA's drug file for potential coverage and reimbursement.

When can a medication be dispensed more than twice per month or filled early?

HCA allows medications to be dispensed more than twice per month under the following circumstances:

- Up to four prescription fills or refills per calendar month for the same product in any of the following categories:
  - Antibiotics
  - Anti-asthmatics
  - Schedule II and III
  - Anti-neoplastic agents
  - Topical preparations

- Up to six prescription fills or refills per calendar month of products containing buprenorphine which are FDA indicated for treatment of opioid dependence.

- The prescription is written for short days-supply because the client's prescriber is monitoring the client (examples: a client is suicidal, at-risk for potential drug abuse, suffers cognitive impairment that makes medication management difficult, or has compliance issues)

A pharmacy may allow multiple fills or early refills under the following circumstances:

- A client's prescription has been lost, stolen, or destroyed (only once every six months, per medication)

- A client needs a supply of medication due to travel (up to a 34-day supply once every 6 months, per medication). For more information on early fills for medication travel supplies, see **Can clients receive early refills or extended days' supply for travel**?

- A client needs a take-home supply of medication for school or camp, or for skilled nursing facility clients

CPT® codes and descriptions only are copyright 2021 American Medical Association.

- A client needs a refill sooner than originally scheduled due to a dosage change by the prescriber, and it does not require a third fill in the month, a pharmacist may override a "refill too soon" reject using DUR codes. The pharmacist must document the dosage change. For more information on the use of DUR codes, see **What is the prospective drug use review (pro-DUR) used for**?

For any other circumstance, the provider must contact HCA's Pharmacy Authorization Section to request approval and an authorization number. (See **Resources Available**.)

Pharmacy providers have the right to ask clients for documentation relating to reported theft or destruction, (e.g., fire, earthquake, etc.). If clients residing in a skilled nursing facility (SNF) have their prescription lost or stolen, the replacement prescription is the responsibility of the SNF. Clients who have trouble managing their drug therapy should be considered for the use of compliance devices (e.g., Medisets).

Point-of-Sale billers must enter one of the following codes in both the **Claims Segment, Prior Authorization Type** Code (461-EU) field and the **Claims Segment, Prior Authorization Number Submitted** Code (462-EV) field.

Justification Description	Code
Lost or Stolen Drug Replacement	5
School or Camp	8
Monitoring	8
Suicidal Risk (SR)	8
Take Home Supply (Skilled Nursing Facility Client)	8

Can clients receive early refills or extended days' supply for travel?

HCA will allow an early refill up to a 34-day supply once every six months, per medication. The pharmacy must contact HCA's Pharmacy Authorization Section to request approval and an authorization number. (See **Resources Available**)

It is also possible to help clients who will be out of the area to receive refills covered by HCA at a time they are due for a regular refill. Providers may assist clients with any of the following options:

- If clients will not be out of state, they may have their prescription filled at any HCA-contracted pharmacy throughout Washington or border areas of Idaho and Oregon.

- A pharmacist or a dispensing medical practitioner may mail medications that are not considered to be controlled substances to clients under their care. (See **Title 21, Section 802(6) U.S.C**. for the definition of controlled substances

CPT® codes and descriptions only are copyright 2021 American Medical Association.

and the U.S. Postal Service website for additional restrictions and guidelines for mailing medications.) HCA does not cover the cost of shipping. The pharmacy is responsible for the cost of shipping. Clients must not be billed for shipping or postage costs. (WAC 182-502-0160(9)(c)).

- Some chain stores can "transfer stock," billing the prescription from a local Washington pharmacy, while having the medication dispensed from a store in another part of the country.

Is authorization required for brand name drugs?

Prescribers and pharmacies should prescribe and dispense the generic form of a drug whenever possible. Authorization is required for brand name drugs when any generic therapeutic equivalent is available. If the brand name drug is prescribed instead of a generic therapeutic equivalent, the prescriber must provide medical justification for the use of the brand name drug. Authorization is based on medical need, such as clinically demonstrated, observed, and documented adverse reactions which have occurred when generic therapeutic equivalents have been used.

Substitute generic drugs for listed brand name drugs when both of the following are true:

- They are approved by the FDA as therapeutically equivalent drugs.

- They are permitted by the prescribing physician under current state law.

To request authorization, call HCA at: 1-800-562-3022.

What is an exception to rule (ETR)?

The process used by HCA to consider the appropriateness of a noncovered item when that service is specifically needed for that client because their clinical needs are so different than the rest of the population.

Providers may request an ETR to request coverage for a noncovered service by contacting HCA and providing the necessary information for the program to make a decision in each client's individual case.

For detailed requirements regarding ETR requests for a noncovered product (see WAC 182-501-0160).

What is expedited authorization (EA)?

HCA's EA process is designed to eliminate the need to request authorization from HCA. The intent is to establish authorization criteria and associate these criteria with specific codes, enabling providers to create an "EA" number when appropriate.

How is an EA number created?

To bill HCA for drugs that meet the expedited authorization criteria on the following pages, the pharmacist must create an 11-digit EA number. The first 8 digits of the EA number must be **85000000**. The last 3 digits must be the code number of the diagnosis/condition that meets the EA criteria.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

> **Point of Sale billers** must enter the EA Number in the **Claims Segment, Prior Authorization Number Submitted** field.
>
> **Example**: The 11-digit EA number for Accutane (for the treatment of "severe, recalcitrant acne rosacea in adults unresponsive to conventional therapy") would be **85000000002** (85000000 = first eight digits, 002 = diagnosis/condition code).

Reminder: EA numbers are only for products listed in the Expedited Authorization Code and Criteria Table. EA numbers are not valid for any of the following:

- Other drugs requiring authorization through the Prescription Drug Program.

- Waiving the State Maximum Allowable Cost (MAC) or Automated Maximum Allowable Cost (AMAC) price.

- Authorizing the third or fifth fill in the month.

> **Note**: Use of an EA number does not exempt claims from edits, such as per-calendar-month prescription limits or early refills.

EA guidelines:

- **Diagnoses** - Diagnostic information may be obtained from the prescriber, client, client's caregiver, or family member to meet the conditions for EA. Drug claims submitted without an appropriate diagnosis/condition code for the dispensed drug are denied.

- **Unlisted Diagnoses** - If the drug is prescribed for a diagnosis/condition, or age that does not appear on the EA list, additional justification is required. The pharmacist must request authorization by either one of the following:
  - Phone 1-800-562-3022
  - Fax 1-866-668-1214

- **Documentation** - Dispensing pharmacists must write both of the following on the original prescription:
  - The full name of the person who provided the diagnostic information
  - The diagnosis/condition and/or the criteria code from the attached table

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Reimbursement

What in general does HCA need to process a reimbursement for services?

- Remember HCA is a taxpayer-funded program and the payer of last resort - meaning providers must pursue all other possible medical coverage first. See Coordination of Benefits for more information.

- HCA is required to be a prudent purchaser on behalf of the taxpayer. Drug reimbursements are subject to federal upper limit (FUL) payment rules (see Reimbursement), and HCA is permitted to pay for outpatient drugs only when the manufacturer has a signed drug rebate contract with the federal Department of Health and Human Services (DHHS). See Drug Rebate Program for more information.

- Bill HCA the usual and customary charge using the complete 11-digit national drug code (NDC) from the dispensing container.

- Accurately report the quantity dispensed, using the appropriate metric or metric decimal quantity for the product.

- Delivery of a service or product does not guarantee payment. For example, HCA does not reimburse when:

  o The request for payment is not presented within the 365-day billing limit. (See Billing)

  o The service or product is not medically necessary or is not reimbursable by HCA.

  o The client has third party coverage, and the third party pays as much as, or more than, HCA allows for the service or product.

  o The service or product is covered in the managed care capitation rate.

  o The service or product is included in the Nursing Home per diem rate.

  o The client is no longer eligible or isn't eligible for the drug being dispensed.

  o A prescription has been used to meet a client's financial obligation towards spenddown.

How does the point-of-sale (POS) system establish reimbursement rates?

The point-of-sale (POS) actual acquisition cost (AAC) is adjudicated by the payment system based upon the available prices in the drug file. Depending on the status of the drug, POS reimburses at the lowest of the available rates using the following price points:

- National average drug acquisition cost (NADAC)

- Maximum allowable cost (MAC)

- Federal upper limit (FUL)

CPT® codes and descriptions only are copyright 2021 American Medical Association.

- Automated maximum allowable cost (AMAC)

- Provider's usual and customary charge to the non-Medicaid population

- AAC for drugs purchased under section 340 B of the Public Health Services (PHS) Act and dispensed to medical assistance clients.

- Provider actual acquisition cost for drugs listed in **What drugs require prior authorization and are reimbursed at AAC?**

> **Note**: If the pharmacy provider offers a discount, rebate, promotion, or other incentive that directly relates to the reduction of the price of a prescription to the individual non-Medicaid customer, the provider must similarly reduce its charge to HCA for the prescription. (Example: A $5.00 off coupon for purchases elsewhere in the store.)
>
> Any drug or product provided free to the general public must also be provided free to the Medicaid customer.

How does HCA determine the point-of-sale actual acquisition cost (AAC)?

HCA uses the following sources to determine point-of-sale actual acquisition cost (POS AAC) including, but not limited to:

- National average drug acquisition cost (NADAC) published by the Centers for Medicare and Medicaid Services (CMS)

- Acquisition cost data made available to HCA by audits from state or federal agencies, other state health care purchasing organizations, pharmacy benefit managers, individual pharmacy providers, other third-party payers, drug file databases, actuaries, and other consultants.

What drugs require prior authorization and are reimbursed at provider actual acquisition cost (AAC)?

HCA reimburses providers for drugs on the **Drugs Administered to Managed Care Clients but Reimbursed Through Fee-for Service** list at provider AAC only. An invoice showing the pharmacy purchase price of the medication from the billing pharmacy is required when submitting prior authorization. When HCA approves the PA request, providers must submit an invoice to HCA every three months showing the pharmacy purchase price of the medication for the duration of the authorization. To submit an invoice for an existing authorization, use the **barcode cover sheet for pharmacy PA requests**, add the authorization reference number to the box titled "pharmacy Rx Auth reference #," and follow the instructions the form.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

How are federal upper limits calculated?

Federal upper limits (FUL) for multiple source drugs are calculated by DHHS, Centers for Medicare and Medicaid (CMS). HCA is required to comply with the federal limits.

FUL rules are being revised in response to the federal Deficit Reduction Act and are currently in draft circulation for comment.

Note: For more information, see CMS Federal Upper Limits.

Drugs subject to FUL may also be subject to other HCA pricing methodologies. HCA reimburses the lower of AAC, MAC, AMAC, FUL, or usual and customary charges.

How is the automated maximum allowable cost (AMAC) calculated?

HCA establishes the automated maximum allowable cost (AMAC) reimbursement for all products within a generic code number sequence at the actual acquisition cost (AAC) of the lowest priced rebate-eligible product in the sequence. AMAC is recalculated each time there is a pricing update to a product in the sequence.

When is the maximum allowable cost (MAC) applied?

The maximum allowable cost (MAC) may be applied to specific, equivalent multiple-source drugs. If applied, HCA reimburses both the brand name and generic drugs at the MAC price.

The MAC may be waived for:

- Preferred drugs
- Some **Dispense as Written** (DAW) prescriptions
- Limited other circumstances

Visit the most up-to-date MAC list.

How is tax computed?

Tax is computed by the point-of-sale (POS) system for items that the Washington State Department of Revenue determines to be taxable.

What are HCA's dispensing fees?

HCA uses a three-tier dispensing fee structure with an adjusted fee allowed for pharmacies that participate in the Unit Dose programs. Listed below are HCA's dispensing fee allowances for pharmacies:

Pharmacy Type	Amount	Dispensing Fee
High-volume pharmacies	Over 35,000 Rx per year	$4.24/Rx
Mid-volume pharmacies	15,001-35,000 Rx per year	$4.56/Rx
Low volume pharmacies	15,000 Rx per year and under	$5.25/Rx
Unit dose systems		$5.25/Rx

A provider's dispensing fee is determined by the volume of prescriptions the pharmacy dispenses for all customers, not just Apple Health (Medicaid) clients.

Providers are required to respond to an annual prescription count survey.

Return the annual prescription count survey to:

Provider Enrollment Unit
PO Box 45562
Olympia, WA 98504-5562

Does HCA pay dispensing fees for non-drug items?

HCA does not pay a dispensing fee for non-drug items, devices, or supplies unless HCA determines that the drug file is not maintaining prices sufficient to cover product cost.

How is the drug rebate program used?

The Omnibus Budget Reconciliation Act (OBRA) of 1990 mandates that states claim federal financial participation (FFP) **only** for outpatient prescription drugs supplied by a drug manufacturer who has entered into a **drug rebate contract** with the Department of Health and Human Services.

> **Note**: Providers must bill the actual and complete 11-digit NDC for the drug dispensed and the actual quantity, using the appropriate unit of measure.

Using an incorrect NDC or inaccurate reporting of a drug quantity will cause HCA to report false drug rebate calculations to manufacturers.

> **Note**: To download HCA's version of the Federal List of Drug Manufacturers Participating in the Centers for Medicare and Medicaid (CMS), visit HCA's Pharmacy webpage and download the Participating Drug Rebate Manufacturers List.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Billing

All claims must be submitted electronically to HCA, except under limited circumstances. For more information about this policy change, see Paperless Billing at HCA. For providers approved to bill paper claims, see HCA's Paper Claim Billing Resource.

What are the general instructions for billing?

- Providers must follow the billing requirements found in HCA ProviderOne Billing and Resource Guide.

- Bill HCA your usual and customary charge using the complete 11-digit NDC from the dispensing container.

- Report the actual quantity dispensed using the appropriate metric or metric decimal quantity for the product.

- Remember that HCA is the payer of last resort. See "Coordination of Benefits" later in this section. (**Claims paid inappropriately when other coverage is available may be recouped**.)

- Clients who are enrolled in an HCA-contracted managed care organization (MCO) are eligible for pharmacy services under their designated plan. **Bill the client's MCO first**.

Note: When another insurer or an HCA-contracted MCO requires authorization for a drug, perform all steps necessary to obtain the authorization. Requiring authorization is not the same as a denial of coverage.

How do I bill electronically for services?

Instructions on how to bill Direct Data Entry (DDE) claims can be found on HCA's Billers and Providers webpage, under Webinars.

See HCA's ProviderOne Billing and Resource Guide for general billing instructions.

What is point-of-sale (POS)?

HCA's POS system is a real-time pharmacy claims processing system which uses the National Council for Prescription Drug Programs (NCPDP) version D.0 format. Each claim submission, reversal, or re-bill that is successfully transmitted via a switch vendor is captured and appears on the weekly Remittance and Status Report (RA). Track each transaction and reconcile the RA completely before contacting HCA.

What do the POS rejection codes mean?

HCA's POS system uses NCPDP D.0 reject codes. Although these codes have meaning within the NCPDP standard, HCA's POS system returns a message of explanation with any claim rejection. As the complexity of prescription drug benefit management increases, it is important for HCA to provide clear explanations of claim rejections in real time. It is also important for pharmacies to read these messages so they can take appropriate action when serving mutual clients. HCA returns reject messages up to 80 characters in length, viewable within most POS applications. If providers do not know how to access these reject messages, they must contact their software vendor for assistance.

HCA providers cannot accept payment from clients for any service potentially covered under the client's HCA benefit. See the **Billing** section within this guide. **It is important for providers to understand that a claim rejection through the POS system is not necessarily a denial of service**. Some claim rejections represent a final denial by HCA, while others may indicate additional steps are necessary to determine coverage for the product or service.

The chart below outlines categories of potential reasons for claim rejection, rather than specific rejection messages.

Rejection Message Description	Reason	Required Action	Service Denial by HCA?
The message starts with 'TIP'	Therapeutic Interchange Program is required under Senate Bill 6088; Chapter 29, Laws of 2003 See the **Therapeutic Interchange Program** and the **Apple Health Preferred Drug List** section in this guide	The pharmacist must substitute a preferred drug for the non-preferred drug prescribed, unless the prescription is ordered Dispense As Written (DAW)	Not a denial of service If the prescription is a DAW, resubmit claim with Product Selection Code of 1 If not DAW, dispense a preferred therapeutic alternative within the same drug class
The message starts with "NonPreferred or NonPref"	Product prescribed is nonpreferred for HCA clients	See the **Apple Health Preferred Drug List** Consult prescriber to determine whether a preferred alternative can be prescribed If the medication cannot be changed to a preferred alternative, contact Pharmacy Authorization	Not a denial of service, unless authorization is requested and denied in writing by HCA

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Rejection Message Description	Reason	Required Action	Service Denial by HCA?
Detail of missing or invalid codes. (Any standard NCPDP D.0 reject code which states "M/I")	A required field has been left blank, or an invalid value has been submitted in a field that could affect claim adjudication	Correct claim and resubmit	Not a denial of service. A claim must be re-submitted with valid values to determine coverage
Drug Use Review (DUR) edits (NCPDP D.0 reject code 88)	Pro-DUR editing has found a potential therapy problem	If claim information is correct, the pharmacist should use professional judgment or confer with the prescriber to determine the appropriateness of therapy If therapy is appropriate, NCPDP pro-DUR codes can be used to indicate what professional intervention occurred	Dependent on result of professional services If appropriate, DUR codes have been entered, and the claim is still rejected, call Pharmacy Authorizations at 1-800-562-3022 to request assistance An HCA representative will determine whether authorization is required, or if service has been denied
Labeler Has No Federal Rebate Agreement	The manufacturer has not chosen to make its products available for dispense to HCA clients	Dispense an equivalent product from a manufacturer who participates in the Federal Rebate Program	Not a denial of service An equivalent product must be substituted, and the claim resubmitted with the new NDC

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Rejection Message Description	Reason	Required Action	Service Denial by HCA?
States 'Maximum' or 'Minimum' in relation to quantity, days supplied, client age, fills per month, etc.	HCA has established therapeutic parameters for the use of the product. Claims may be authorized outside of those conditions	Verify accuracy of the submitted claims information. If all information is accurate, contact prescriber to consider alternate therapies within FDA indications. If prescriber still feels that the product should be dispensed as prescribed, contact Pharmacy Authorization	Not a denial of service, unless authorization is requested and denied in writing by HCA
States that a product is 'not billable through POS', states 'Bill as a professional service'; or 'Refer to DME/Non-DME Washington Apple Health billing guides	The product is a potentially covered benefit, but not considered part of the client's prescription drug benefit	Consult appropriate Washington Apple Health billing guide and bill as a professional service on a professional claim, or comparable HIPAA compliant electronic claim format	Not a denial of service Benefit may be payable as Durable Medical Equipment, Enteral Nutrition, or a professional service
Expedited Authorization Code Required	See Authorization. The product has an expedited code available for authorization if specific criteria are met	Consult Expedited Authorization List in Authorization. If criteria are met, resubmit claim with appropriate EA code in the Prior Authorization Number Submitted field (462-EV). If criteria are not met, contact Pharmacy Authorization	Not a denial of service, unless authorization is requested and denied in writing by HCA

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Rejection Message Description	Reason	Required Action	Service Denial by HCA?
States that a product or situation is NONCOVERED and does not provide a toll-free number	The product or situation is not a covered benefit for the client	Work with the client's prescriber to find an alternate covered therapy which meets the client's medical needs	Yes. The requested service is denied. If originally prescribed therapy has not been changed, POS denial as noncovered can be considered final
States PA required.	Product or situation requires authorization or other review by HCA	Pharmacy calls the toll-free number indicated to request authorization or assistance	Not a denial of service, unless the request for authorization is denied in writing by HCA

What is the prospective drug use review (pro-DUR) used for?

HCA provides pro-DUR screening as a feature of the POS system. Early Refill, High Dose, Low Dose, and Therapeutic Duplication edits post and claims are rejected when potential drug therapy problems are identified. Once pharmacists have conducted their professional review, the HCA-recognized NCPDP DUR Reason for Service, Professional Service, and Result of Service codes can be used to respond to the pro-DUR edits.

When appropriate, enter one of the NCPDP DUR codes from each of the categories in the appropriate POS field. Entering DUR codes will not automatically bypass DUR screening. HCA considers different codes to be appropriate for different situations. Only a combination of codes appropriate to address the potential therapy problem will satisfy the DUR screening process.

By placing the information on the claim, the provider is certifying that the indicated DUR code is true and documentation is on file. POS claim coding is subject to review and audit by HCA.

HCA does not provide additional reimbursement for DUR services. DUR coding is supported for the purpose of ensuring potential drug therapy problems are addressed by a health care professional.

What is the national drug code (NDC)?

The NDC is an 11-digit code assigned to all pharmaceutical products by the labeler or distributor of the product under FDA regulations. (See WAC 182-530-1050.)

CPT® codes and descriptions only are copyright 2021 American Medical Association.

> **Note**: When submitting claims to HCA the provider must use the actual, complete 11-digit NDC from the dispensing container. (See WAC 182-530-5000(1)(b))

HCA accepts only the 5-4-2 NDC format. **All 11 digits, including zeros, must be entered**. The three segments of the NDC are:

SAMPLE NDC: 12345-6789-10

12345 = labeler code

6789 = product code

10 = package size

NCPDP Version D.0 claim format

To comply with the Health Insurance and Accountability Act (HIPAA) requirements, **HCA requires all pharmacy providers to use NCPDP Version D.0 claim format** when submitting point-of-sale (POS) claims. See the Payer Specification Sheet for more information.

General information

The NCPDP Version D.0 claim format:

- Defines the record layout for real-time prescription claim transactions between providers and processors.

- Is a variable format.

- Accepts up to four transactions per transmission (except when billing compounds, only one transaction is allowed per transmission).

What transaction segments are supported?

Transaction header segment

The transaction header segment is mandatory on all transactions and all fields within the segment are mandatory. The transaction header segment tells the system where to send the claim, what type of submission it is, how many transactions, who is submitting the claim, date of service, and the vendor certification number.

Patient segment

The patient segment is mandatory for all transaction types. The NCPDP standard requires the submission of Date of Birth (304-C4) and Patient Gender Code (305-C5) fields. HCA requires submission of the Patient Residence (384-4X) field depending on the situation. When appropriate and necessary for claim adjudication, use the following values in the Patient Residence field:

01 - To indicate the client resides at home, in an assisted living facility, group home, or adult family home

02 - To indicate the client resides in a skilled nursing facility

11 - To indicate a hospice patient whose claim is unrelated to their terminal condition

12 - To indicate an ITA claim

Insurance segment

The insurance segment is mandatory on all transactions except reversals (B2).

This segment contains data describing the ProviderOne Client ID. The client's ProviderOne Client ID is required in the Cardholder ID field, and Patient Relationship Code should be set to 1.

Claim segment

The claim segment is mandatory on all billing (B1, B2, B3), and some authorization (P1, P2) transactions. This segment contains data relating to the dispensing of the actual prescription, or when authorization is requested. Some fields are required only for billing transactions. The claim segment is also used to identify a partially filled prescription, and some fields are required only when submitting a partial fill.

Prescriber segment

The prescriber segment contains data describing the prescriber and is required on all authorization (P1, P2, P3, P4) or billing transactions except for Reversals (B1, B3). The mandatory/required fields are the Segment Identification, Prescriber ID Qualifier, and Prescriber ID. For authorization transactions, prescriber last name and phone number are also required.

COB/other payment segment

This segment may be required in some situations when billing or rebilling if the pharmacist or HCA indicates other coverage. The COB/Other Payments Segment contains information indicating the presence of other payers or insurers.

Use the Other Coverage Code field in the Claim Segment to indicate insurance coverage information. Refer to **Other Coverage Codes**.

DUR/PPS segment

The DUR/PPS segment contains data for the resolution of DUR rejections.

Pricing segment

The pricing segment is required on all incoming billing and rebilling transactions (B1, B3). This segment contains data describing how the product is to be priced. The mandatory fields are: Segment Identification, Ingredient Cost Submitted, Usual and Customary Charge, and Gross Amount Due.

Compound segment

This segment is required for the multi-line submission of compounds. The compound segment may only be submitted on billing or rebilling. This segment is not sent on claim reversals. Information describing the compound ingredients is included here. If the segment is submitted the following fields are required: Segment Identification, Compound Dosage Form Description Code, Compound Dispensing Unit Form Indicator, Compound Ingredient Component Count, Compound Ingredient Drug Cost, and Compound Ingredient Basis of Cost Determination. The following fields are also required, and may be repeated for multiple ingredients: Compound Product ID Qualifier, Compound Product ID, and Compound Ingredient Quantity. HCA will reimburse a dispensing fee for each payable ingredient. Each line will be adjudicated separately and will be subject to all applicable edits, including authorization. Compounds may not be submitted as a partial fill. If a pharmacy chooses to receive reimbursement only for the payable ingredients within a compound, a value of 8 in the Submission Clarification Code field from the claim segment must be entered.

Prior authorization segment

The prior authorization segment is situational and only required on authorization transactions (P1, P2, P3, P4). When submitting an authorization transaction, the following fields are required: Segment Identification, Request Type, Request Period Date-Begin, Request Period Date-End, and the Basis of Request. No other fields within this segment are captured or supported.

What is the requirement regarding tamper-resistant prescription pads?

(**RCW 18.64.500**)

All written prescriptions, including OTC medications, must be written on a tamper-resistant prescription pad or paper that has been approved by the Pharmacy Quality Assurance Commission for use. Both RCW 18.64.500 and 42 U.S.C. 1936b(i)(23) require prescription pads and paper to have at least one feature from **each** of the below characteristics to be considered tamper-resistant to prevent the prescription from being changed:

- **No copying**: For example, pantographs that reveal the word "VOID" when copied

- **No altering**: For example, chemical stains or an altered background reveal attempts at ink or toner removal

- **No counterfeiting**: For example, pads have a watermark and cannot be reproduced

Prescription pads and paper that have met all industry-recognized characteristics have a seal of approval affixed to the paper. This requirement must be met for all written prescriptions, regardless if the client is enrolled in an HCA-contracted managed care organization.

Prescriptions that are telephoned, faxed, or sent electronically to the pharmacy are exempt from the state and federal requirements. Pharmacists receiving non-compliant, written prescriptions are encouraged to verify the prescription with the prescriber.

What about emergency dispensing?

Pharmacists are allowed to dispense a prescription written on noncompliant paper if the pharmacy receives verification from the prescriber by telephone, fax, or email within 72-hours of filling the prescription. Federal controlled substance laws must continue to be met when prescribing or dispensing Schedule II drugs.

What about Medicaid clients with retroactive certification?

To submit a claim for a Medicaid client retroactively certified for Medicaid, a pharmacy must reimburse the client in accordance with WAC 182-502-0160.

What are the documentation and records retention requirements?

The pharmacist must document that the prescriber was contacted by telephone, fax, or email to verify that the legitimacy of the prescription written on non-compliant paper **before** it was dispensed. Prescription records, including documentation for non-compliant prescriptions, must be kept for six years according to WAC 182-502-0020.

Are pharmacies allowed to automatically refill prescriptions?

No, automatic refills are not permitted unless the client meets one of the exceptions below. Clients must request a prescription refill before the pharmacy may submit a claim and fill the prescription.

Automatic refills are permitted for clients who:

- Receive compliance packaging; or

- Reside in a skilled nursing facility or other inpatient facility.

What is needed for prescription transfers between pharmacies?

The pharmacy accepting a prescription transfer from another pharmacy only needs to obtain a telephone call or fax from the transferring pharmacy to confirm the authenticity of the tamper-resistant prescription.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

What is the time limit for billing?

HCA requires providers to submit initial claims and adjust prior claims in a timely manner. The following are HCA's timeliness standards for initial claims, resubmitted claims, and for claim adjustments in the Prescription Drug Program. For more information on timelines for billing, refer to HCA ProviderOne Billing and Resource Guide.

Medicare Part B crossover claims

If Medicare Part B allows the claim, it is no longer billable as a Prescription Drug Program claim through the point-of-sale (POS) system. A claim allowed by Medicare Part B is billable as a crossover claim on a professional claim within six months of the date that Medicare processes the claim. Providers can rebill or resubmit a crossover claim up to two years from Medicare's process date. If Medicare denies payment of the claim, HCA requires the provider to meet HCA's initial 365-day requirement for the initial claim. If a provider has billed Medicare but has not received a response, the provider must still bill HCA within 365 days of the date of service to establish timeliness.

Resubmitted claims and adjustments

HCA allows providers to resubmit, modify, or adjust any prescription drug claim with a timely TCN within 15-months of the date the service was provided to the client. Claims may be resubmitted, modified, or adjusted by the pharmacy electronically for 456 days from the date dispensed. After 15-months, HCA does not accept a prescription drug claim for resubmission, modification, or adjustment.

Reversals

HCA allows pharmacies to reverse any prescription drug claim with a timely TCN within 15 months of the date the service was provided to the client. Claims may be reversed electronically for 456 days from the date the claim was dispensed. If a pharmacy wishes to reverse a transaction that can no longer be reversed electronically from the pharmacy's own system, a request may be submitted to HCA for reversion only under the following circumstances:

- "Lost" transactions (paid claim not found in the pharmacy's own system)
- Claims older than the pharmacy's own system will allow them to reverse

If one of the above circumstances applies, a pharmacy may request a reversal by submitting a help ticket via email to MMIShelp@hca.wa.gov, with a subject line: POS claim reversal. The email must include:

- Client name and ProviderOne ID number
- Drug name and NDC
- Claim number
- Date of fill
- Provider NPI
- Prescription number

CPT® codes and descriptions only are copyright 2021 American Medical Association.

If unable to submit a help ticket via email, pharmacies may also fill out a Pharmacy Adjustment Request (HCA 13-715) form and fax it to 360-507-9074. See **Where can I download HCA forms**?

Overpayments that must be refunded to HCA

The 15-month period allowed for resubmission of claims above **does not apply** to overpayments that a prescription drug provider must refund to HCA. After 15 months, a provider must refund overpayments by a negotiable financial instrument, such as a bank check. Questions regarding overpayments may be directed to the MPA Cash Control at 360-725-1279.

Client's responsibility

HCA does not allow a provider or any provider's agent to bill a client or a client's estate when the provider fails to meet the requirements, resulting in the claim not being paid by HCA. (See **When is a pharmacy allowed to bill a client**?)

What is the national provider identifier (NPI) requirement?

Pharmacy providers are required to provide the pharmacy and prescriber National Provider Identifiers (NPIs) on all prescription drug claims.

HCA requires a prescriber to provide its individual NPI (Type 1) with prescription drug orders that are written, transmitted, called in, or faxed. This NPI requirement applies to all providers who write prescription orders for drugs.

The prescriber NPI must be for an individual (Type 1) rather than an organization (Type 2). The ProviderOne POS does not recognize Type 2 NPIs for organizations (such as hospitals) as valid prescribers.

The following are examples of how to report the practitioner's individual NPI (Type 1) with prescription orders:

- An emergency room practitioner must report his or her individual NPI (Type 1), not the supervising practitioner's NPI with a prescription order.

- Each practitioner in a teaching hospital must report his or her individual NPI (Type 1) with a prescription order that is submitted to the dispensing pharmacy.

> **Point-of-Sale billers**:
>
> - Enter 01 in the Service Provider ID Qualifier field (202-B2)
>
> - Enter your NPI in the Service Provider ID field (201-B1)
>
> - Enter 01 in the Prescriber ID Qualifier field (466-EZ)
>
> - Enter the prescribers NPI in the Prescriber ID field (411-DB)

What is needed to bill for filling a newborn prescription?

Pharmacies can submit prescription claims for newborns using the mom's ProviderOne Client ID and the mom's birthdate.

> **Point-of-Sale billers**: Enter "**2**" in the **Insurance Segment, Eligibility Clarification Code field**.

When is a pharmacy allowed to bill a client?

A pharmacy may bill a fee-for-service client for a noncovered prescription if the client and provider complete and sign an *Agreement to Pay for Healthcare Services* (HCA 13-879) form. See Where can I download HCA forms?

The provider may NOT bill the client for any service which is potentially covered with prior authorization unless that authorization has been requested and denied.

HCA asks that pharmacists use their professional judgment when accepting cash for noncovered services. If the pharmacist believes that a prescription may not be medically necessary for the client (such as a noncovered early refill for large volumes of narcotics), the pharmacist has no obligation to accept cash payment and may refuse service to the client.

> **Note**: A common billing complaint is the pharmacist misinterpreting a POS message as a denial and charging the client instead of calling HCA for authorization. Remember that it is the pharmacist's responsibility to call HCA for authorization when the pharmacist receives an authorization message from the POS system.

Who is eligible?

The POS system does not solve the problem of identifying clients who are not currently in HCA's eligibility file. It is not appropriate to charge a client cash if the client is currently eligible on the Benefit Inquiry Screen in ProviderOne. For a client whose benefit inquiry screen in ProviderOne shows that the client is eligible, but claims deny in the POS system for lack of eligibility, **FAX** a copy of the client's benefit screen from ProviderOne to Claims Entry at 866-668-1214. The benefit inquiry screen in ProviderOne will be updated within two working days for claims to be resubmitted. Do not fax **claims** to this number.

See Billing the Client in WAC 182-502-0160

How do I bill for take-home naloxone?

In response to the increase in opioid overdose-related deaths in Washington State, the legislature passed Senate Bill 5195 (chapter 273, Laws of 2021). This law helps to increase access to naloxone for all individuals at risk of an opioid overdose. The law requires distribution of prepackaged (take-home) naloxone to individuals at risk of an opioid overdose at:

- Hospital emergency departments (EDs)

- Pharmacies

- Opioid treatment programs

- Certified or licensed behavioral health agencies (BHAs) that provide any of the following services:

    o Treatment for mental health or substance use disorders

    o Secure withdrawal management

    o Evaluation and treatment

Retroactive to dates of service on and after January 1, 2022, hospital EDs, opioid treatment programs, and certified or licensed BHAs may be reimbursed for prepackaged opioid overdose reversal medication, naloxone, distributed to clients at risk of an opioid overdose. Naloxone distributed to Apple Health fee-for-service (FFS) clients may be billed as a separate line item with one of the following HCPCS codes and the National Drug Code (NDC) of the product distributed:

HCPCS Code	Drug
J2310	Naloxone injection
G2215	Naloxone 4mg nasal spray
G1028	Naloxone 8mg nasal spray

- When provided in the ED, take-home naloxone must be billed as a separate line item. HCA does not package naloxone when provided in the ED.

- When provided by a Behavioral Health Agency, take-home naloxone must be billed as a separate claim.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

What services are billed for hospice clients?

Clients enrolled in the Hospice program **waive** services outside the Hospice program that are directly related to their terminal illness. All services related to their terminal illness must be coordinated by the designated hospice agency (be sure to call the hospice agency to find out what must be billed under hospice) and attending physician **only**.

Services **not** related to their terminal illness may be provided to clients on a fee-for-service basis. When billing for hospice clients and the service is **not** related to the terminal illness (be sure to call the hospice agency to find out what medications are not related to the hospice diagnosis or end-of-life care needs), use the following billing procedures:

> **Point-of-Sale billers** must enter "**11**" in the **Patient Segment, Patient Residence** (384-4X) field.

Do not use this procedure for dates the client is not on hospice services. Be sure to check with the hospice agency before using the "11."

Does HCA reimburse for a client's prescriptions when enrolled in an HCA-contracted managed care organization?

Eligible medical assistance clients enrolled in an HCA contracted managed care organization (MCO) must have their prescriptions filled at a pharmacy contracted with the MCO. If a pharmacy is not contracted with the MCO, the client must be referred to an MCO-contracted pharmacy.

HCA reimburses for drugs dispensed to clients enrolled in an HCA-contracted MCO **only** when a managed care contract excludes the drug or pharmaceutical supply, and the product is otherwise reimbursable fee-for-service (FFS). The following may be billed FFS to HCA:

- Antibiotics, anti-infectives, non-narcotic analgesics, and oxytocics prescribed **following a voluntary termination of pregnancy**;

- Hemophilia and von Willebrand-related products when used for administration in the home;

- Immune modulators and anti-viral medications to treat chronic Hepatitis C virus (HCV) infection;

- Compliance packaging when one or more medications packaged are paid under the fee-for-service benefit. Refer to Compliance Packaging for more information.

- Dojolvi (triheptanoin);

- Evrysdi (risdiplam);

- Professionally administered drugs. See the Physician-Related Services Billing Guide for a full list.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

- Prescriptions written by practitioners working for a non-MCO-contracted health department, or a non-MCO-contracted Family Planning agency with the therapeutic classifications listed below:

Family planning clinics may prescribe contraceptives, drugs for sexually-transmitted diseases (STD), excluding HIV, when related to the client's family planning method, and drugs related to a sterilization procedure within the following therapeutic drug classes:

- Analgesics
- Antibiotics
- Anti-emetics
- Antifungals
- Anti-infectives
- Anti-inflammatories
- Contraceptive drugs/devices

Health departments may prescribe drugs for STD (excluding HIV), tuberculosis, and prescription contraceptives within the following therapeutic drug classes:

- Antibiotics
- Anti-emetics
- Anti-infectives
- Contraceptive drugs/devices
- Tuberculosis drugs

Billing for managed care clients

> **Point-of-Sale billers** must enter "**2**" in the **Claim Segment, Prior Authorization Type Code** (461-EU) field.

Pharmacists must document on the original prescription the reason for billing fee-for-service. All fee-for-service rules apply, including authorization requirements.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

What drugs and supplies are covered under the Family Planning Only Programs?

The following drugs and supplies related to family planning and contraceptives are covered for Family Planning Only Program clients:

- Prescription contraceptives
- Over-the counter nonprescribed contraceptive drugs and supplies (for example: emergency contraception, condoms)
- Antibiotics for the treatment of chlamydia and gonorrhea

HCA also covers anti-anxiety medications when they are administered before a sterilization procedure and pain medications when they are administered after a sterilization procedure, as follows:

Anti-anxiety Medication Before Sterilization Procedure

Medication	Maximum Number of Doses
Diazepam	2
Alprazolam	2

Pain Medications After Sterilization Procedure

Medication	**Maximum Number of Doses**
Acetaminophen with Codeine #3	12
Oxycodone HCI/Acetaminophen 5/500	12
Hydrocodone Bit/Acetaminophen	12
Oxycodone Hcl/Acetaminophen	12

> When billing for covered preoperative anti-anxiety medications and postoperative pain medications for the Family Planning Only Program – Pregnancy Related or Family Planning Only clients:
>
> **Point-of-sale billers** must enter "**6**" in the **Claim Segment, Prior Authorization Type Code** (461-EU) field

See the Family Planning Billing Guide for more information on covered products and services for family Planning Only – Pregnancy-Related and Family Planning Only clients.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Does HCA reimburse for skilled nursing facility (SNF) clients?

HCA reimburses covered prescription drugs for SNF clients, (See **What drugs, devices, and supplies are covered?**). Reimbursement for OTC drugs is included in the SNF per diem.

How are medications filled for SNF clients on leave?

SNF clients on leave should have their additional maintenance prescriptions filled for the duration of the leave. If the client leaves weekly, prescriptions should be filled for a one-month supply.

SNFs should determine which one of the following methods will be followed when a SNF client goes on leave:

- The client may take the prescription medication home and keep it there for use during SNF absences.

- The client may return the prescription medication to the SNF following each leave so that it may be stored for safekeeping. The prescription medication is the client's personal property.

Both practices are in accordance with state pharmaceutical regulations.

> **Point-of-sale billers**: Enter **8** in the **Claim Segment, Prior Authorization Type Code** (461-EU) field.

What is a skilled nursing facility (SNF) emergency kit?

The **emergency kit** is a set of limited pharmaceuticals furnished to an SNF by the pharmacy that provides prescription dispensing services to that facility. Each kit is specifically set up to meet the emergency needs of each SNF's client population and is for use during those hours when pharmacy services are unavailable.

Medications supplied from the emergency kit are the responsibility of the SNF.

What unit dose delivery systems are recognized by HCA for SNFs?

HCA recognizes two types of **Unit Dose Delivery Systems** for SNFs:

- True Unit Dose Delivery System

- Modified Unit Dose Delivery System

Eligible unit dose providers receive the unit dose dispensing fee when dispensing **in-house unit dose** prescriptions. The term in-house unit dose applies to bulk pharmaceutical products that are packaged by the pharmacy for unit dose delivery. Providers receive the regular pharmacy dispensing fee for drugs that are manufacturer packaged in unit dose form.

Refer to **Reimbursement** for HCA Dispensing Fee Allowances for pharmacies.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

How do pharmacies become eligible for a unit dose dispensing fee?

To be eligible for a unit dose dispensing fee from HCA, a pharmacy must:

- Notify HCA in writing of its intent to provide unit dose service
- Specify the type of unit dose service to be provided
- Identify the SNF or facilities to be served
- Indicate the approximate date unit dose service to the facility or facilities will commence
- Sign an agreement to follow HCA requirements for unit dose reimbursement

For information on becoming a unit dose provider, contact Provider Enrollment (see Resources Available).

How do pharmacies bill HCA under a unit dose delivery system?

Under a unit dose delivery system, a pharmacy must bill HCA only for the number of drug units actually used by HCA client in the skilled nursing facility (SNF).

It is the unit dose pharmacy provider's responsibility to coordinate with the SNFs to ensure that the unused drugs the pharmacy dispensed to the facility for distribution to an HCA client are returned to the pharmacy for credit.

The pharmacy must submit an adjustment form or claims reversal of the charge to HCA for the cost of all unused drugs returned to the pharmacy from the SNF on or before the 60th day following the date the drug was dispensed. This adjustment must conform to the SNF's monthly log.

Exception:

Unit dose providers are not required to credit HCA for federally designated schedule II drugs that are returned to the pharmacy. These returned drugs must be disposed of according to federal regulations.

> **Point-of-sale billers**: Enter "**3**" in the **Claim Segment, Unit Dose Indicator** (429-DT) field.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Who is responsible for the cost of repackaging a client's bulk medications?

The cost of repackaging is the responsibility of the SNF when repackaging is done for either of the following reasons:

- To conform to the SNF's delivery system

- For the SNF's convenience

Pharmacies may not charge clients or HCA a fee for repackaging a client's bulk medications in unit dose form.

What records do SNF pharmacies need to keep?

The pharmacy must maintain detailed records of medications dispensed under unit dose delivery systems. The pharmacy must keep a monthly log for each SNF served, including, but not limited to the following information:

- Facility name and address

- Client's name and ProviderOne Client ID

- Drug name/strength

- National Drug Code (NDC)

- Quantity and date dispensed

- Quantity and date returned

- Value of returned drugs or amount credited

- Explanation for no credit given or nonreusable returns

- Prescription number

Upon request, the pharmacy must submit copies of these monthly logs to HCA. HCA may request the pharmacy submit such logs on a monthly, quarterly, or annual basis.

What needs to be submitted annually to HCA?

When the pharmacy submits the completed annual prescription volume survey to HCA, it must include an updated list of SNFs served under unit dose systems.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

What additional records do pharmacies need to keep?

In addition to the record keeping requirements found in the **ProviderOne Billing and Resource Guide**, pharmacies must comply with the following:

Provision of prescription drugs

Keep any specifically required documents for the provision of prescription drugs, including but not limited to:

- Authorizing an order (prescription)
- Name of person performing the service (dispensing pharmacist)
- Details of medications and/or supplies prescribed or provided including NDC, name, strength, and manufacturer
- Drug Use Review (DUR), intervention, and outcome documentation
- Expedited authorization (EA) documentation
- Proof of fill

Proof of delivery

- When a pharmacy **delivers an item** directly to or for pick-up by the client, the client's authorized representative, or the prescriber, the pharmacy must be able to furnish proof of delivery, including:
    - The signature of either the client, the client's authorized representative, or the prescriber receiving the delivery;
    - The client's name; and
    - A detailed description of the item(s) delivered.

- When a provider **mails an item** to the client, the provider must be able to furnish proof of delivery, including a mail log.

- When a provider **uses a delivery/shipping service** to deliver items, the provider must be able to furnish the following proof of delivery documentation:
    - The delivery service tracking slip with the client's name or a reference to the client's packages, the delivery service package identification number, and the delivery address
    - The supplier's shipping invoice with the client's name, the shipping service package identification number, and a detailed description

- The provider must make proof of delivery records available to HCA upon request.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Coordination of Benefits

How are client resources applied?

HCA is required by federal regulation to determine the liability of third-party resources available to HCA clients. All resources available to the client that are applicable to the costs of medical care must be used. Once the applicable resources are applied, HCA may make reimbursement for the balance if the insurance payment is less than HCA's allowed amount.

It is the provider's responsibility to bill HCA appropriately after pursuing any potentially liable third-party resource when:

- Health insurance is indicated in ProviderOne.

- The point-of-sale (POS) system alerts the provider to a client's insurance.

- The provider believes insurance is available.

    (See WAC 182-501-0200)

The Insurance Carrier List and carrier information is available in the ProviderOne Billing and Resource Guide. The information can be downloaded and printed or used as a reference.

HCA's billing time limit is 365 days, but an insurance carrier's time limit to bill may be different. It is the provider's responsibility to meet the insurance carrier's billing time limit prior to receiving any payment by HCA. The provider should not bill HCA with an **Other Coverage Code** if the claim was denied by the insurance carrier for late filings.

Other Coverage Codes

Why are Other Coverage Codes important?

HCA POS system alerts a provider when a client has other insurance. When a provider submits a claim through the POS system, and HCA files indicate that a client has insurance, **HCA will deny the claim**. **Then the provider must bill the client's insurance before using the Other Coverage Codes**.

The provider's weekly Remittance and Status Report (RA) show that the claim is denied with the Explanation of Benefits (EOB) 090. The EOB states **"Bill your claim to the insurance company as instructed. For questions call 800-562-3022."** The insurance carrier information is printed on the RA for the provider's reference.

When may providers use Other Coverage Codes?

The following chart lists situations in which other insurance is available, gives some direction to the provider, and explains which **Other Coverage Codes** to enter. In all the situations described below, the pharmacy must bill the other insurance **before** using an **Other Coverage Code**.

The chart also provides information about documentation. Pharmacy providers who submit their claims through the POS system are not required to submit third-party documents. However, the provider must have these documents available for audit purposes. **Examples of the documentation that would justify the provider's use of an Other Coverage Code are listed below**.

Contact Coordination of Benefits (COB) at 800-562-3022 for any situations that are not listed below. See POS for values and definitions of the **Other Coverage Codes**.

A removable summary of the following table is available at the end of the Coordination of Benefits Frequently Asked Questions section.

Situations	Explanation/Solution	Other Coverage Code
The insurance has made payment to the pharmacy **(An EOB or electronic transmission from insurance identifying the insurance paid amount)**	Bill balance to HCA	2
Insurance allowed amount of the prescription is less than or equal to the copay **(An EOB or an electronic transmission from insurance identifying both the insurance allowed and co-pay amounts)**	Bill HCA	4

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Situations	Explanation/Solution	Other Coverage Code
The prescription must be filled by mail order **(Contract verification that the prescription must be filled by mail order; or denial from insurance stating mail order)**	Bill HCA	3
The plan only covers a new prescription **(An EOB or electronic transmission from insurance showing only new prescriptions covered)**	Bill refills to HCA	3
The insurance carrier applied the claim charges to the client's deductible **(An EOB or electronic transmission from insurance identifying the claim amount was applied to the deductible)**	Bill HCA	4
The client's insurance plan maximum annual benefit has been met **(An EOB or electronic transmission from insurance identifying the annual benefit has been met)**	Bill HCA	4
The insurance denied the medication as a noncovered drug. Clarify if denial is for noncovered or non-formulary drugs. If non-formulary, third-party payment procedures must be followed **(An EOB or electronic transmission identifying the drug is noncovered or include a copy of the contract drug exclusion list)**	Bill HCA	3
The client has a discount card **(Verification of discount card or denial from insurance stating "discount card")**	Bill HCA	3
Capitated service agreement with insurance carrier **(Group Health and Kaiser pharmacies only)**	Bill HCA	8

Medicare Part D copay

HCA does not provide coverage for Medicare Part D medication copayments. Medicare Part D copayments is the responsibility of the client

(For questions, call HCA Customer Service Center at 1-800-562-3022)

CPT® codes and descriptions only are copyright 2021 American Medical Association.

> **Note**: For questions on the use of **Other Coverage Codes** or acceptable documentation, call Coordination of Benefits at 1-800-562-3022.

If one of the previously listed situations occurs, providers may resubmit the claim entering an **Other Coverage Code** into the POS system to bypass the edit for other insurance coverage.

Inappropriate use of Other Coverage Codes may result in an audit of your POS claims and recoupment of improper payments.

> **Note**: In instances where the primary insurance has made payment, the normal 34-day supply limit may be exceeded.

Clients with privately purchased HMO insurance

A client with privately purchased health maintenance organization (HMO) insurance will have an **HI, HO, or HM** identifier on the client benefit inquiry screen in ProviderOne. The client is required to use the HMO facilities for pharmacy services. If services are provided that are not covered by the HMO plan, the claim may be submitted to HCA for processing.

Situations may occur when a client is out of the HMO service area or HMO coverage is not accessible, a pharmacy provider may proceed to meet the client's immediate needs.

Billing

Pharmacy providers who submit their claims through the POS system are not required to submit insurance EOB documents. **However, documentation must be retained and kept by the provider for audit purposes**. (See WAC 182-502-0020)

Primary insurance billing exceptions

Primary insurance billing exceptions listed below are examples of third-party situations and how they are processed in the POS system. All amounts billed to the insurance and to HCA must be usual and customary charges, except for capitated copayments.

What does the provider do if a third-party liability question arises after COB hours?

Situations may occur when a client is asking to fill a prescription, a question arises, and it is outside of COB's regular business hours. After making reasonable attempts to access the primary insurance coverage, proceed with filling what is necessary to meet the client's immediate needs. "Immediate needs" means pharmacists using their professional judgment to determine the quantity to dispense to best meet the client's needs in an emergency. The pharmacy must contact COB within seven days for billing assistance.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Examples may include:

- HCA indicates that the patient has insurance, but the coverage cannot be identified, and the patient does not provide it.

- The patient has HMO private insurance or has a closed pharmacy network.

What does the provider do if the client's coverage is prepay?

Contact COB for billing assistance if the client's coverage is prepay. Prepay means the client's identified insurance coverage policy requires the client to pay at the time of service, and the insurance reimbursement is made only to the subscriber. Do not bill the insurance and do not bill HCA with an **Other Coverage Code**. Prepay is defined on a case-by-case basis.

How is authorization obtained for non-formulary or noncovered drugs?

Pharmacists are required to obtain prior authorization from the insurance carrier for non-formulary drugs before providing the drugs to the client. When the denial reason is related to a non-formulary drug, the pharmacy may need to coordinate with the prescriber and/or the insurer to authorize an alternative drug or get the insurer to cover the prescription as prescribed. **Do not use an Other Coverage Code**. The pharmacy must meet all third-party billing requirements prior to billing HCA.

Noncovered drugs are not to be confused with non-formulary drugs. It is the provider's responsibility to correctly determine if the drug is noncovered or non-formulary with the primary insurance carrier. Noncovered drugs may be billed to HCA using the **Other Coverage Code 3**.

Coordination of Benefits Frequently Asked Questions

How is prescription drug coverage verified and who processes the prescriptions?

Ask the client for an insurance card, Services Card, or both. If the client benefit inquiry screen indicates the client has an insurance carrier and you do not know where to submit the claims, contact the insurance carrier. Verify there is retail prescription coverage with the insurance carrier and ask where to submit claims. When you submit a claim through the POS system and no **Other Coverage Code** has been entered, you will be notified if the client has prescription coverage.

To find insurance carrier contact information, see the **ProviderOne Billing and Resource Guide**.

What if a client's insurance states there is no coverage, or the insurance coverage has ended?

If there is no coverage or the coverage has ended, notify COB at 800-562-3022.

What if a client's insurance plan cannot identify the client?

If the insurance carrier cannot identify the client, contact COB at 800-562-3022 to verify the cardholder identification and the plan being billed are the same as on file with COB. We will assist you with verifying the client's prescription coverage or update COB records if the client does not have coverage.

What is discount only or mail order only coverage?

Discount only or mail order only coverage means insurance does not reimburse for any prescriptions filled at retail pharmacies.

- If a client has **discount only or mail order** only benefits, HCA does not consider this a primary insurance. Bill HCA.

- If you bill HCA and we deny the claim to bill the insurance carrier, and you believe the client has **discount only** coverage, contact COB.

> Note: Some clients have **mail order only** on certain prescriptions, requiring them to use mail order when they refill prescriptions on an ongoing or regular basis.
>
> Insurance carriers may refer to mail order as "maintenance". For example, some plans consider mail order to be maintenance when a certain prescription is refilled more than two times. Bill the insurance carrier first. If the claim is denied by insurance to use mail order, then bill HCA with an **Other Coverage Code 3**.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Why would a claim be paid at zero or denied by insurance?

If the reason the claim was paid at zero cannot be verified, contact the insurance carrier, and find out why the claim was paid at zero or denied. If there are questions about why the claim was denied or paid at zero after contacting the insurance carrier, contact COB.

What if the insurance states copay is 100% or claim is paid at zero?

Contact the insurance carrier. Examples of when the insurance states copay is 100% are:

- A prepay plan. **Prepay** means the client's insurance coverage requires the client to pay at the time of service, and the insurance reimbursement is made to the subscriber. In this instance, reverse your billing to the primary insurance, and call COB for billing assistance at 1-800-562-3022. Do not bill the insurance, and do not bill HCA with an **Other Coverage Code**.

- Less than copay, benefits are exhausted, or any other paid at zero response. Bill HCA using **Other Coverage Code 4**.

How are after hour services billed?

After hours services means prescriptions filled outside of COB regular business hours. After making reasonable attempts to meet the primary insurance carrier's billing requirements, proceed with filling what is necessary to meet the client's immediate needs.

What is "meeting client's immediate needs?"

Immediate needs means pharmacists are to use their professional judgment to determine the quantity to dispense to best meet the client's needs in an emergency. Contact COB within 7 days for billing assistance. Examples may include:

- HCA indicates the client has insurance, but you cannot identify the coverage.

- The client has HMO private insurance or has a closed pharmacy network.

What is the service area?

Service area means the nearest pharmacy that accepts the insurance within 25 miles or 45 minutes in one direction from the client's address.

What if POS will not accept an Other Coverage Code, or a field is not provided to enter an Other Coverage Code?

Contact your pharmacy software or switch vendor.

Why does a claim get a rejection code missing/invalid code?

If there is a rejection code DV, you have indicated that insurance made payment by entering 2 in the Other Coverage Code field, but the payer amount was entered as 0.00.

If there is a rejection code E8, an insurance payment was entered, but a 2 in the Other Coverage Code field was not.

Verify the insurance carrier has made payment and enter the amount in the **other payer** amount field. If there is no insurance payment, **do not enter a 2** in the

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Other Coverage Code field; contact the insurance carrier to find out why the payment was not made. If you have verified the insurance amount paid and the payment amount is not displayed on the POS system, contact your software or switch vendor.

If the claim does not go through, is entering $.01 in the insurance paid field allowed?

No. Enter an amount only if $.01 or another amount is the actual amount paid by the insurance. Entering any amount paid by the insurance carrier other than the actual amount paid could be considered fraudulent.

When can Other Coverage Code 8 be used?

For non-Medicare Part D billing, HCA allows only pharmacy providers that have a capitated service agreement with an insurance carrier to use this Other Coverage Code. At this time, only Group Health and Kaiser are known to have capitated service agreements.

How is a claim submitted to HCA when the insurance allowed amount is less than or equal to the copay amount?

The copay is the amount that private insurance has determined the person with the private insurance coverage is expected to pay per prescription.

> **Note**: Eligible Medicaid clients with private insurance are not expected to pay a copay. When the insurance allowed or payable amount is less than or equal to the copay amount, the insurance non-payment reason is less than the copay. Bill HCA, after you bill the insurance. Use a 4 in the **Other Coverage Code** field.

What is a closed pharmacy network?

A closed pharmacy network means an insurer restricting prescription coverage to an exclusive list of pharmacies. This arrangement prohibits the coverage and/or payment of prescriptions provided by a pharmacy not included on the exclusive list. HCA may pay for the prescription without requiring the client to use a participating network pharmacy ONLY in the following situations:

- When the prescription is not covered by the policy.
- If the client is out of the service area.
- If you provided medications to meet a client's immediate need for services.

If you are not a participating pharmacy, do not bill with an **Other Coverage Code** prior to contacting COB.

Does HCA require clients to use pharmacy providers that are contracted with the client's private insurance carrier?

HCA requires clients to use pharmacy providers contracted with their private insurance carrier. Clients with managed care private insurance will have an HM, HI, or HO identifier on the client benefit inquiry screen in ProviderOne.

If the insurance carrier provides pre-pay plan coverage for non-contracted pharmacy providers, contact COB for billing assistance.

If a pharmacy is not contracted and the coverage is not pre-pay, HCA may pay for the prescription without requiring the client to use a contracted pharmacy ONLY in the following situations:

- When the prescription is not covered by the policy
- If the client is out of the service area
- If you provided medications to meet a client's immediate need for services

Do not bill with an **Other Coverage Code** prior to contacting COB.

What if a client's insurance coverage requires paper billing and the pharmacy only bills electronically?

The pharmacy must meet all third-party billing requirements prior to billing HCA.

If the insurance coverage is a pre-pay plan for paper billers, contact COB for billing assistance. Do not bill with an **Other Coverage Code** prior to contacting COB.

If the client is enrolled in an HCA-contracted MCO and private insurance, is the MCO billed for the service or the private insurance?

If a client is enrolled in an HCA-contracted managed care organization (MCO) **and** also has private insurance for the date of service, the pharmacy bills the MCO. Contact the MCO for billing assistance and information about the primary coverage.

If I bill the insurance carrier and the denial reason is "plan limits exceeded," can I bill HCA with an Other Coverage Code?

If the client has exceeded their insurance benefit, it is appropriate to bill HCA with an **Other Coverage Code 3**. The pharmacy must meet all third-party billing requirements prior to billing HCA.

How do I bill if the insurance carrier requires authorization?

The primary insurance carrier requirements must be met. Contact the insurance carrier for authorization review, and to determine if, and how the medication is covered by the insurance plan. If the primary insurance carrier's authorization process has been followed to completion and authorization is denied, bill HCA with **Other Coverage Code 3**.

The insurance carrier requires authorization. The prescriber will not provide information to the pharmacy or insurance carrier and authorization cannot be obtained. Can HCA be billed directly?

No. The insurance carrier requirements must be met. It is not appropriate to bill HCA with an **Other Coverage Code** unless the billing conditions of the insurance carrier have been met.

How long does documentation need to be kept? (WAC 182-502-0020)

Providers are required to make documentation available to HCA for six years from the date of service. Pharmacy providers who submit their claims through the POS system are not required to submit third-party EOB documents. However, the provider must retain documentation for audit purposes.

The client has insurance coverage through multiple carriers. Am I required to bill all potential payers? (WAC 182-502-0150)

Yes. It is the provider's responsibility to seek timely reimbursement from a third-party when a client has available third-party resources.

How do you bill clients who are eligible for both Medicare and Medicaid?

Some Medicaid clients are also eligible for Medicare Part B or Part D benefits. Bill Medicare first. The following instructions will assist in billing for dual eligible clients.

Medicare Part B

Some Medicaid clients are also eligible for Medicare benefits. Benefits under Medicare Part B cover some drugs and drug-related supplies. When you have a client who is eligible for both Medicaid **and** Medicare benefits, you should submit claims for that client to your Medicare intermediary or carrier **first**. Medicare is the primary payer of claims.

HCA cannot make direct payments to clients to cover the deductible and coinsurance amount of Medicare Part B. HCA **can** pay these costs to the provider on behalf of the client when:

- The provider accepts assignment.
- The total combined reimbursement to the provider from Medicare and Medicaid does not exceed Medicare's allowed amount.

HCA will pay up to Medicare's allowable, or HCA's allowable, whichever is less.

ProviderOne will indicate whether the client is Medicare-eligible.

What about clients covered under the Categorically Needy Program or Medically Needy Program, as well as Qualified Medicare Beneficiaries?

- If Medicare **and** Medicaid cover the service, HCA will pay only the deductible and/or coinsurance up to Medicare or Medicaid's allowed amount, whichever is less.
- If Medicare **and not Medicaid** pays for the product, HCA will pay the deductible and/or coinsurance up to Medicare's allowed amount.
- If Medicaid covers the service and Medicare does not cover the service, HCA will reimburse for the service.

Part B—Medical Insurance

Medicare Part B covers a limited set of drugs. Medicare Part B covers injectable and infusible drugs that are not usually self-administered and are furnished and administered as part of a physician service. If the injection is usually self-administered (e.g., Imitrex) or is not furnished and administered as part of a physician service, it may not be covered by Part B. Medicare Part B also covers a

CPT® codes and descriptions only are copyright 2021 American Medical Association.

limited number of other types of drugs. (Regional differences in Part B drug coverage policies can occur in the absence of a national coverage decision.) For more information visit the **Medicare coverage database** website.

What about Medicare Part B medications (not covered through Part D)?

After Medicare Part B has processed the claim, and if Medicare has allowed the medication, in most cases Medicare will forward the claim to HCA for any supplemental Medicaid payment. When the words, **"Claim information forwarded to Medicaid,"** appear on the Medicare remittance notice, it means that the claim has been forwarded to HCA or a private insurer.

- If **Medicare Part B has paid** for a medication and the Medicare crossover claim does not appear on HCA Remittance and Status Report within 30 days of the Medicare statement date, bill HCA.

  Providers have six months from the Medicare process date to submit their initial crossover claim, and two years from Medicare's process date to re-bill or resubmit a crossover claim.

- If **Medicare Part B has denied** a medication:
  - o Retail and specialty pharmacies may bill HCA through the POS system using the appropriate DUR result of service code.
  - o For professionally administered drugs, bill HCA electronically through ProviderOne and include the Explanation of Benefits (EOB) or Medicare denial letter as supporting documentation. See HCA's **ProviderOne Billing and Resource Guide** for general billing instructions.

> **Note**: When Medicare denies a service that requires authorization, HCA waives the prior requirement, but authorization is still required.

Medicare Part D

Are copayments covered?

Medicare Part D copayments are the responsibility of the client.

What prescription drugs are covered?

Medicare Part D-covered drugs are:

- Biological products
- Insulin and medical supplies associated with the injection of insulin (syringes, needles, alcohol swabs, and gauze)
- Vaccines
- Drugs that are:
  - o Available only by prescription
  - o Used and sold in the United States
  - o Used for a medically accepted indication

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Certain drugs or classes of drugs, or their medical uses, are excluded by law from Medicare Part D coverage. Visit the **Medicaid Covered Drugs for Part D Dual Eligibles** for more information.

While these drugs or uses are excluded from basic Medicare Part D coverage, drug plans may choose to include them as part of supplemental benefits, not covered by Medicare.

What if Medicare denies a prescription as non-formulary?

When the client is covered by Medicare Part D, Medicaid does not pay for any prescriptions that are the responsibility of Medicare Part D. Contact the prescription drug plan for authorization for non-formulary drugs. Due process under the Medicaid appeal rules such as an administrative hearing and Exception to Rule are not available to the client under this circumstance.

Therapeutic Interchange Program

What is the Therapeutic Interchange Program?

The Therapeutic Interchange Program (TIP) is a process developed by the Department of Social and Health Services, the Health Care Authority (HCA or HCA), and Labor and Industries to allow physicians and other prescribers to endorse the Washington Preferred Drug List (PDL). TIP is intended to streamline administrative procedures and make prescription drugs more affordable to Washington residents and state health care programs. TIP applies only to drugs in drug classes on the Washington PDL prescribed by an endorsing practitioner and not to other drugs requiring authorization.

What is an endorsing practitioner?

An **endorsing practitioner** is a provider who has reviewed the Washington PDL, signed up as an endorsing provider, and agrees to allow therapeutic interchange of a preferred drug for any non-preferred drug in a given therapeutic class on the Washington PDL.

What does this mean to pharmacies?

When an endorsing practitioner issues a prescription to a medical assistance client for a non-preferred drug in a drug class on the Washington PDL, the filling pharmacist must dispense the preferred drug in that therapeutic class in place of the non-preferred drug. When this therapeutic interchange is made, the pharmacist must notify the endorsing practitioner of the specific drug and dose dispensed.

When are substitutions not required?

In some instances, the endorsing practitioner may determine that the non-preferred drug is medically necessary and instruct the dispensing pharmacist to dispense the non-preferred drug as written (DAW). When an endorsing practitioner indicates **"DAW"** on a prescription for a non-preferred drug, HCA will not require authorization, and the dispensing pharmacist will dispense the non-preferred drug as prescribed.

Exemptions from TIP

RCW 69.41.190 exempts the following drug classes from TIP when the drug classes are placed on the Washington PDL:

- Antipsychotic
- Antidepressant
- Chemotherapy
- Antiretroviral
- Immunosuppressive

CPT® codes and descriptions only are copyright 2021 American Medical Association.

- Immunomodulator/antiviral drugs used to treat hepatitis C for which an established, fixed duration of therapy is prescribed for 24-weeks but no more than 48 weeks. (See RCW 69.41.190)

Not all of these drug classes are on the Washington PDL, and unless the drug class is on the Washington PDL, it is not eligible for the continuation of therapy privilege.

Continuation of therapy privilege for exempted drug classes

Pharmacists must not substitute a preferred drug if the prescription is for a refill or continuation of therapy in any of the exempted drug classes on the Washington PDL.

What if a non-endorsing practitioner issues a prescription for a non-preferred drug?

When a non-endorsing practitioner issues a prescription for a non-preferred drug, HCA requires authorization, and the dispensing pharmacist must fax a completed *Pharmacy Information Authorization* (HCA 13-835A) form (see **Where can I download HCA forms**?) to 866-668-1214, or call HCA at 800-562-3022 to request authorization by providing medical justification. See HCA's **Pharmacy** website for further information.

How does the pharmacy bill for a DAW prescription written by an endorsing practitioner?

Point-of-sale billers must enter "**1**" in the Dispense as Written (DAW)/Product Selection Code field.

CPT® codes and descriptions only are copyright 2021 American Medical Association.

Apple Health Preferred Drug List

What is the preferred drug list?

HCA has developed a list of preferred drugs within a chosen therapeutic class that are selected based on clinical evidence of safety, efficacy, and effectiveness. The drugs within a chosen therapeutic class are evaluated by the Drug Use Review Board, which makes recommendations to HCA regarding the selection of the preferred drugs.

The Apple Health Preferred Drug List (PDL) is used by Apple Health managed care plans and the Fee-For-Service program. The Therapeutic Interchange Program (TIP) only applies to drug classes that are also included on the Washington Preferred Drug List (PDL).

What is the process to obtain drugs on the preferred drug list?

- Prescription claims for **preferred drugs** submitted to HCA are reimbursed without authorization requirements unless the drug requires authorization for the following:

    o   Safety criteria

    o   Special subpopulation criteria

    o   Limits based on age, gender, dose, or quantity

- Prescription claims for **non-preferred drugs** submitted to HCA are reimbursed only after all authorizing criteria are met.

- Prescription claims submitted to HCA for **non-preferred drugs** that are subject to the Therapeutic Interchange Program (TIP) are reimbursed without authorization requirements when written by an endorsing practitioner who has indicated "DAW" on the prescription, unless the drug requires other restrictions as listed above. See WAC 182-530-4150.

- **Pharmacies** must call HCA for required authorization. Call 1-800-562-3022.

What are the authorization criteria to obtain a non-preferred drug?

- To obtain a nonpreferred drug, a client must have tried and failed, or is intolerant to, a designated number of preferred drugs within the drug class unless contraindicated or not clinically appropriate. The designated number of preferred drugs is listed on the Apple Health PDL. Pharmaceutical samples given to the client do not apply toward the number of preferred drugs tried. Some drugs have additional criteria that must be met for approval.

HCA requires pharmacies to obtain authorization for non-preferred drugs on the Apple Health Preferred Drug List.

Where is the Apple Health Preferred Drug List?

See HCA's Apple Health Preferred Drug List webpage.
