

## Appendix C: MCO Comparison Results

*Appendix C contains a subset of the information included in Appendix B for all the performance measures by MCO and by region and is available publicly.*

**Legend:**

Measure result is statistically significant above prior year (p < 0.05)

Measure result is statistically significant below prior year (p < 0.05)

Can report benchmark

Rotated measures\*

† Statewide Weighted Rate

\* In March 2020, NCQA recognized that COVID-19 would likely impact plans' ability to collect medical record data due to travel bans, quarantines, and efforts to minimize risk to staff. Therefore, NCQA allowed Medicaid plans participating in HEDIS reporting the option of submitting 2019 rates for their hybrid measures ("rotated measures").

\*\* 2021 performance indicates whether a measure is statistically different than national benchmarks.

\*\*\* Rates suppressed when the denominator is less than 30.

NR There was no data to report.

Measure Description	MCO	MY 2018 Rate	MY 2019 Rate	MY 2020 Rate	MY 2020 Performance**
