Medicaid refers to individuals with Medicaid-paid perinatal care claims/encounters or individuals who were enrolled in a state-contracted capitated managed care plan for at least three of the last six months before delivery. Calculations for the percent of pregnant individuals with first trimester prenatal care (% First Trimester) are based on totals which exclude records with missing prenatal care initiation information (10.1% of total records, with Medicaid percent missing noted in final column). The Avg. # Visits refers to the average (mean) number of prenatal care visits reported on the birth certificate. The percent difference is the difference between the percent of Medicaid individuals receiving first trimester prenatal care and the percent of Non-Medicaid individuals receiving first trimester prenatal care. Positive numbers indicate a greater proportion of Medicaid individuals, compared to Non-Medicaid individuals, who are receiving first trimester prenatal care. ** = suppressed due to small numbers or for secondary suppression.

First Trimester Prenatal Care by County For Medicaid-paid Perinatal Care Washington Individuals with Births in 2022

"WA State" includes all Washington individuals with in-state deliveries for the year, regardless of Medicaid status. Calculations for the percent of individuals with first trimester prenatal care are based on totals which exclude records with missing prenatal care information. County is as of month of delivery.
