

Washington State
Health Care Authority

Apple Health Managed Care

Coordinated Care Corporation
Plan Report

CAHPS® 5.0H

Adult Medicaid

August 2016

This report was prepared under a subcontract with Qualis Health under contract K1324 with the Washington State Health Care Authority to conduct External Quality Review and Quality Improvement Activities to meet 42 CFR §462 and 42 CFR §438, Managed Care, Subpart E, External Quality Review.

As Washington's Medicaid External Quality Review Organization (EQRO), Qualis Health provides external quality review and supports quality improvement for enrollees of Washington Apple Health managed care programs and the managed mental healthcare services. For more information, visit us online at: www.QualisHealth.org/WAEQRO.

Using This Report

The Consumer Assessment of Healthcare Providers and Systems survey (CAHPS® 5.0H) is the most comprehensive tool available for assessing consumers' experiences with their health plans. CAHPS® 5.0H provides consumers, purchasers, health plans and state Medicaid programs with information about a broad range of key consumer issues. The survey instrument consists of fifty-eight questions addressing areas such as getting care quickly, how well doctors communicate, making decisions about health care, overall satisfaction with health care and overall satisfaction with the health plan. A set of questions collecting demographic data and additional supplemental items completes the survey.

This report summarizes the findings of the CAHPS® 5.0H Adult survey conducted by Coordinated Care during the spring of 2016. It is designed to identify key opportunities for improving members' experiences. Member responses to survey questions are summarized as achievement scores. Responses that indicate a positive experience are labeled as achievements, and an achievement score is computed as the proportion of responses qualifying as achievements. In general, somewhat positive responses are included with positive responses as achievements. For example, a member response of 'Usually' or 'Always' to the question "How often did you get care as soon as you needed?" is considered an achievement, and the achievement score for this question is equal to the proportion of respondents who answered the question with 'Usually' or 'Always'. Because achievement scores for survey questions are computed as the proportion of members who indicate a positive experience, the lower the achievement score, the greater the need for improvement.

Achievement scores are computed and reported for all pertinent survey items. In addition, composite scores are built from achievements for groups of survey items that make up broad domains of members' experience: getting needed care, getting care quickly, how well doctors communicate, customer service and shared decision making.

The HEDIS-CAHPS® survey results are presented here in a format that is optimized for use in practical decision-making. These reports:

1. Assist Coordinated Care in identifying strengths and weaknesses in their quality of care and services.
2. Provide Coordinated Care with a way to assess where resources are needed to improve weaknesses.
3. Show Coordinated Care the effects of their efforts to improve over time.

In the *Graphs* section of the report, composite scores and the achievement scores for their component questionnaire items are presented in the form of bar charts to facilitate comparison of scores. Correlations with overall health plan satisfaction are computed for each composite score and each achievement score of the composite's individual questionnaire items. In the *Priority Matrices* section of the report, these correlations are plotted against the achievement scores to help isolate specific areas where improvement efforts might have the greatest chance of increasing overall satisfaction among members.

Conclusions based on the information presented in this report should be tempered by a few caveats. First, for some survey items, relatively small numbers of responses could be collected due to skip patterns inherent in the instrument. Conclusions based on analysis of fewer than 30 observations should be viewed with caution. Second, in some of the data presentations included in this report, correlation coefficients are computed to explore the relationship between different measures. High correlations, however, do not necessarily indicate causation.

Methodology and Definitions

The survey drew, as potential respondents, the adult members enrolled in Coordinated Care Corporation. Respondents were surveyed in English or Spanish.

The survey was administered over a 10-week period in the spring of 2016. A pre-approved enhanced mixed-mode protocol was used based on NCQA HEDIS® guidelines. The four-wave mixed-mode protocol consisted of an initial survey mailing and reminder postcard to all respondents, followed by a second survey mailing and second reminder postcard to non-respondents, and finally a phone follow-up to non-respondents with a valid telephone number.

Sampling Frame

A random sample of 1,620 cases was drawn of adult members from Coordinated Care Corporation. The plan opted to do an additional oversample to reach a higher number of completed surveys. To be eligible, adults had to be over the age of 18, and had to be continuously enrolled for at least six months as of December 31, 2015, with no more than one enrollment gap of 45 days or less.

Selection of Cases for Analysis and Response Rate

NCQA protocol was used to define complete surveys. Surveys were considered complete if respondents did not say 'No' to Q1, and if they provided a valid response to at least three of the five key questions. The key questions are: Q3, Q15, Q24, Q28 and Q35. Complete interviews were obtained from 378 adults enrolled in Coordinated Care. The response rate, defined as the number of completed surveys divided by the number of eligible enrollees, was 24.2%. Detailed information regarding protocols and methods can be found in *HEDIS® 2016 Volume 3* and the *HEDIS® 2016 Quality Assurance Plan*.

Questionnaire

The survey instrument selected for the project was the CAHPS 5.0H Adult Survey. The core questions in the survey were developed and tested nationally as an adaptation of the CAHPS 5.0H Adult Survey for use in assessing the performance of health plans. Sixteen (16) supplemental questions were added which were consistent across all participating plans.

Definition of Achievement Scores

Member responses to survey questions are summarized as achievement scores. Responses that indicate a positive experience are labeled as achievements, and an achievement score is computed equal to the proportion of responses qualifying as achievements. In general, somewhat positive responses are included with positive responses as achievements. For example, a member response of 'Usually' or 'Always' to the question "How often did you get care as soon as you thought you needed?" is considered an achievement, and responses of '8', '9', or '10' to ratings questions are also considered achievements. Because achievement scores for survey questions are computed as the proportion of members who indicate a positive experience, the lower the achievement score, the greater the need for the health plan to improve. See the *Responses by Question* section for assignment of achievement responses for each question. For some survey items, relatively small numbers of responses were collected due to skip patterns inherent in the instrument. Conclusions based on analysis of fewer than 30 observations should be viewed with caution.

Definition of Achievement Scores: Alternate Top Box Method

For questions with response options 'Never,' 'Sometimes,' 'Usually,' and 'Always', alternate achievement scores are also calculated using only the response option 'Always' (instead of both 'Usually and 'Always') as an achievement. For questions with the response options 0-10, alternate achievement scores are calculated using only response options 9+10 as achievements. Top Box scores are displayed in the *Executive Summary* section and as hollow bars in the *Graphs* section of the report.

Composites

Five composite scores summarize responses in key areas: Getting Needed Care, Getting Care Quickly, How Well Doctors Communicate, Shared Decision Making and Customer Service. Following is a list of the questions that comprise each composite:

Getting Needed Care

- Q14. Usually or always got care, tests or treatment you thought you needed
- Q25. Usually or always get an appointment to see a specialist as soon as you needed

Getting Care Quickly

- Q4. Usually or always got care right away as soon as you needed
- Q6. Usually or always got an appt. for routine care as soon as you needed

How Well Doctors Communicate

- Q17. Personal doctor usually or always explained things in way that was easy to understand
- Q18. Personal doctor usually or always listened carefully to you
- Q19. Personal doctor usually or always showed respect for what you had to say
- Q20. Personal doctor usually or always spent enough time with you

Customer Service

- Q31. Health plan's customer service usually or always gave needed information or help
- Q32. Usually or always treated with courtesy and respect by health plan's customer service staff

Shared Decision Making

- Q10. Doctor/provider definitely talked about the reasons you might want to take a medicine
- Q11. Doctor/provider definitely asked about the reasons you might not want to take a medicine
- Q12. Doctor/provider definitely asked what you thought was best for you

Correlation

Correlation is the degree to which two or more variables can change together. When the relationship is linear, which is the assumption in the CAHPS survey, the degree of association can be measured by a number called Pearson's correlation coefficient. This number can vary between -1 and +1. The closer the correlation coefficient is to -1 or +1, the stronger the associations. A positive coefficient means that as one variable increases, the other increases as well. If there is no relationship between two variables, the correlation coefficient is zero.

Correlation to Satisfaction

To understand the relationship between performance in particular areas of enrollee experience and overall satisfaction with the health plan, correlations are computed between responses to specific performance-related items and Q35, which is the rating question in the survey instrument measuring overall satisfaction with the health plan. In the context of this report, coefficients greater than or equal to .4 are considered more highly correlated with satisfaction (medium to high); coefficients less than .4 represent lower correlations with satisfaction (medium to low).

Comparisons

In this report, Coordinated Care results are compared to Apple Health Managed Care overall results, with statistical significance testing. The Apple Health Managed Care (AHMC) overall results represent the combined scores of the five participating health plans.

Statistical Significance Testing

Significance testing is a way to measure the probability that two different measures of a population represent a true difference or are the result of chance. When comparing two random samples from a population, as we do between health plans or within a health plan over time, for example, we often want to know if there is any meaningful change. If there is a difference, then we evaluate if it is simply by chance, or if it is a true difference using statistical significance tests. When the term `statistically significantly different' is used in this report, it means that we can be 95% sure that the difference between the two measures is not simply due to chance.

Throughout this report, statistically significant differences between scores were determined using binomial and t-tests. If the test was valid, a significance level of .05 or less was considered statistically significant, and "↑" or "↓" was placed at the end/top of the appropriate bar. Tests were considered valid when the number of cases used to compute each score was 30 or greater and there was variation in the tested groups.

Executive Summary

The Consumer Assessment of Healthcare Providers and Systems survey (CAHPS® 5.0H) is the most comprehensive tool available for assessing consumers' experiences with their health plans. CAHPS® 5.0H provides consumers, purchasers, health plans and state Medicaid programs with information about a broad range of key consumer issues.

This report summarizes the findings of the adult survey conducted by Coordinated Care Corporation for Apple Health Managed Care. Attempts were made to survey 1,620 Coordinated Care member households by mail and telephone during the spring of 2016, using a standardized survey procedure and questionnaire. Complete interviews were obtained from 378 selected respondents.

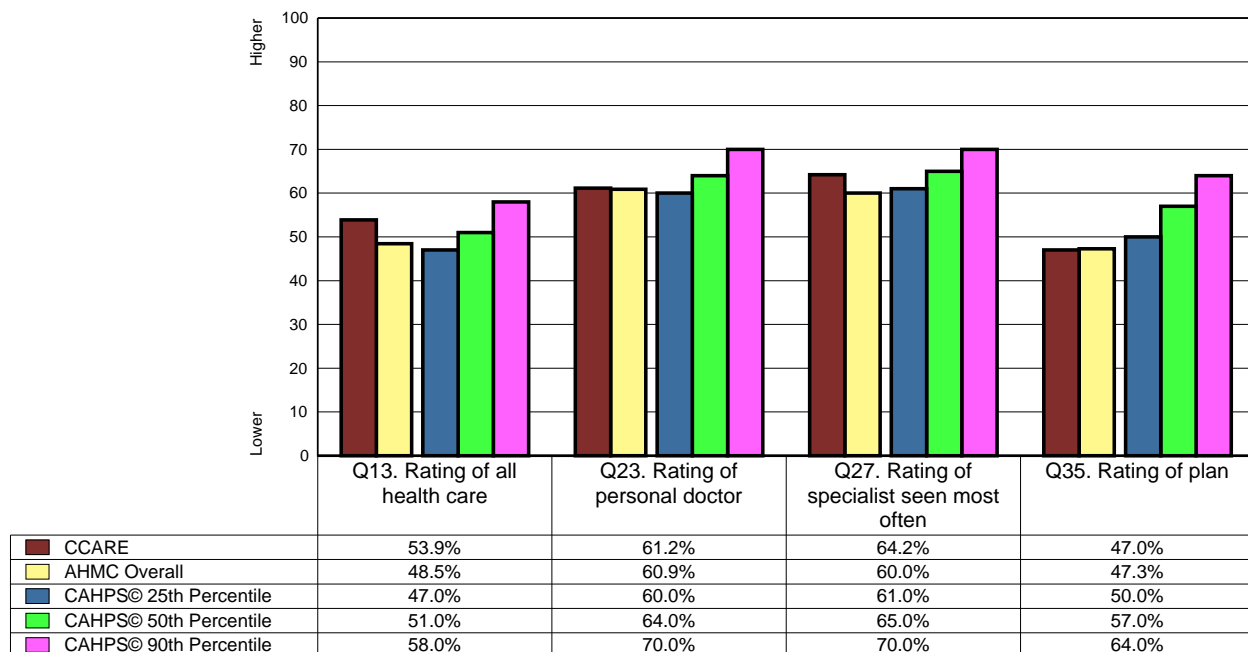

Both the survey procedure and the questionnaire were developed jointly by the Agency for Healthcare Research and Quality and NCQA, the National Committee for Quality Assurance. NCQA is an independent not-for-profit organization dedicated to measuring the quality of America's health care. Detailed information regarding protocols and methods can be found in *HEDIS® 2016 Volume 3* and the *HEDIS® 2016 Quality Assurance Plan*.

SUMMARY OF OVERALL RATING QUESTIONS

Response options for overall rating questions range from 0 (worst) to 10 (best). In the following tables, ratings of 9 or 10 are considered top box achievements, and the achievement score is presented as a proportion of members whose response was an achievement. The following tables present the Coordinated Care (CCARE) top box scores. The Apple Health Managed Care top box scores are presented for comparison. The combination of all five Apple Health Managed Care plans is presented as AHMC. Significance testing is done between the plan scores (CCARE) and the AHMC overall scores. When the term 'statistically significantly different' is used in this report, it means that we can be 95% sure that the difference between the two measures is not simply due to chance. Additional information regarding significance testing can be found in the *Methodology and Definitions* section of this report.

The 2015 CAHPS® database top box scores are also presented for visual comparison. No significance testing was possible, given the formats for these data. The adult CAHPS® scores were obtained from data submitted directly to the CAHPS® Database by State Medicaid agencies and individual health plans.

Overall Rating Questions

↕ Statistically significantly higher/lower than AHMC Overall

SUMMARY OF COMPOSITES

For each of five domains of member experience: Getting Needed Care, Getting Care Quickly, How Well Doctors Communicate, Customer Service, and Shared Decision Making, a composite score is calculated. The composite scores are intended to give a summary assessment of how the services for adults under Coordinated Care performed across the domain.

The 2016 Coordinated Care adult top box composite scores are presented in the following tables. In these tables, proportions of the most positive response are reported as achievement scores. For the Getting Needed Care, Getting Care Quickly, How Well Doctors Communicate and Customer Service composites, responses of 'Always' are considered achievements. Responses of 'Yes' are considered achievements for the Shared Decision Making composite. The combination of all five Apple Health Managed Care plans is presented as AHMC. The AHMC top box scores are presented for comparison. Significance testing is done between the plan (CCARE) score and the AHMC overall score. When the term 'statistically significantly different' is used in this report, it means that we can be 95% sure that the difference between the two measures is not simply due to chance. Additional information regarding significance testing can be found in the *Methodology and Definitions* section of this report.

The 2015 CAHPS® database top box scores are also presented for visual comparison. No significance testing was possible, given the formats for these data. CAHPS® benchmarks are not available for the Shared Decision Making composite.

Standard Composites

■ CCARE	47.7%	59.3%	67.2%	62.3%	77.7%
■ AHMC Overall	47.8%	53.9%	71.1%	63.2%	80.7%
■ CAHPS@ 25th Percentile	49.0%	55.0%	70.0%	62.0%	-
■ CAHPS@ 50th Percentile	54.0%	59.0%	73.0%	66.0%	-
■ CAHPS@ 90th Percentile	60.0%	64.0%	77.0%	73.0%	-

↑↓ Statistically significantly higher/lower than AHMC Overall

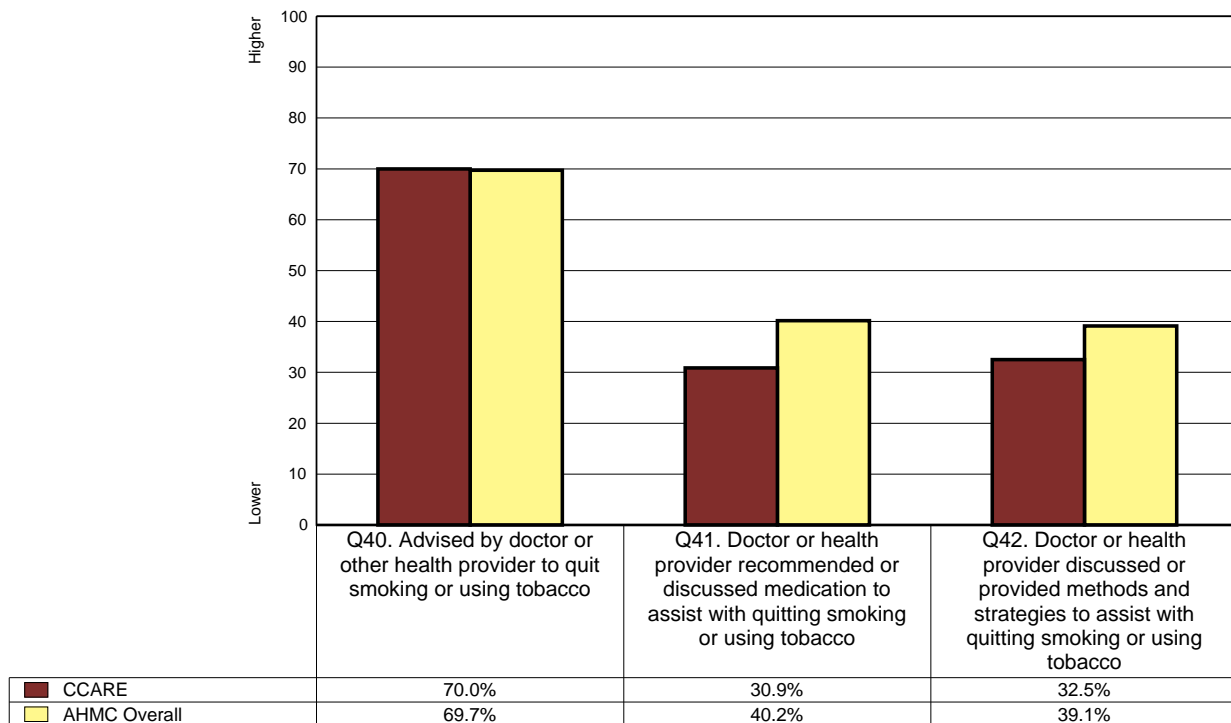

X Comparative data not available

SUMMARY OF EFFECTIVENESS OF CARE MEASURES

Three Effectiveness of Care Measures are presented below. Two of the measures, Aspirin Use and Discussion and Medical Assistance with Smoking and Tobacco Use Cessation, typically use a rolling-average methodology, where scores are computed using two years of response data. For the purpose of this report, these measures are presented as single-year scores, rather than rolling averages.

The Medical Assistance with Smoking Cessation and Tobacco Use Cessation measure is composed of three questions. Scores represent the proportion of adult members whose provider advised them to (1) quit smoking or using tobacco; (2) recommended or discussed medication to assist with quitting smoking or using tobacco; (3) discussed or provided methods and strategies other than medication to assist with quitting smoking or using tobacco. For each question, a response of "Sometimes", "Usually", or "Always" is considered an achievement.

Medical Assistance with Smoking and Tobacco Use Cessation (MSC)

↕ Statistically significantly higher/lower than AHMC Overall

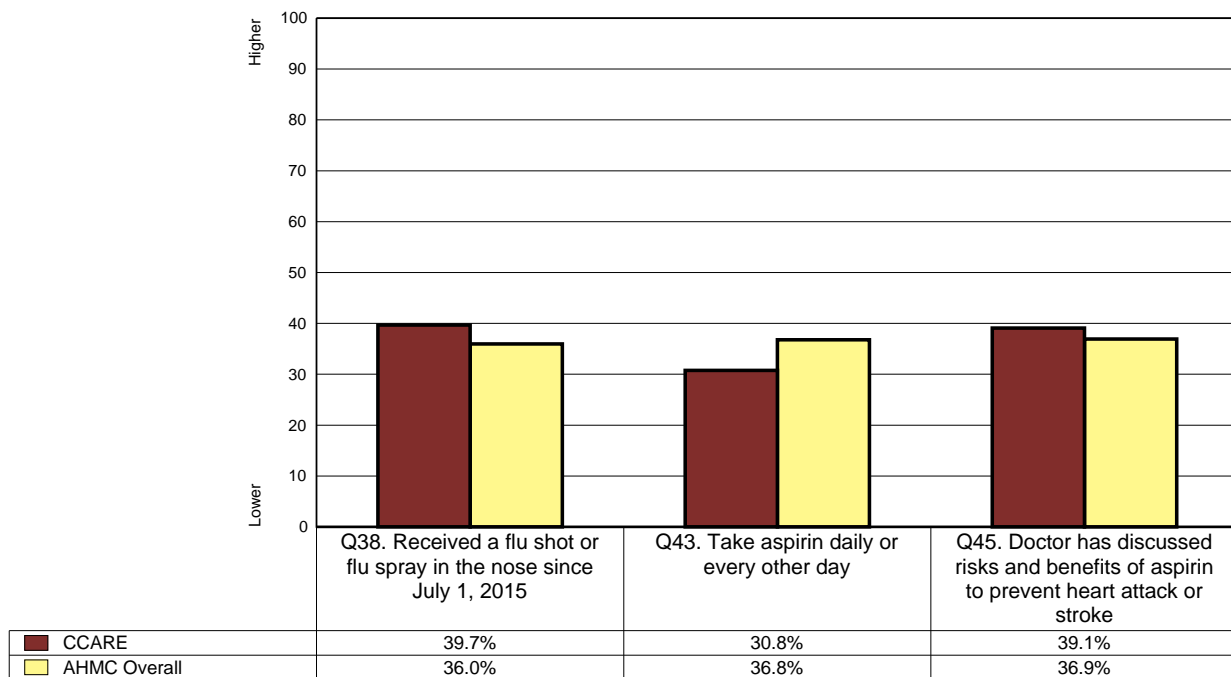

The Flu Vaccinations for Adults Ages 18-64 measure is based on a single question about getting a flu shot or flu spray. The score represents the proportion of members age 18-64 who received an influenza vaccination since July 1 of the measurement year.

The Aspirin Use and Discussion measure assesses different facets of aspirin use in the primary prevention of cardiovascular disease. The measure is based on two questions, one assessing current aspirin use, and the other asking whether a health provider discussed the risks and benefits of taking aspirin to prevent heart attack or stroke.

The Aspirin Use component includes members in certain risk factor categories who could safely take aspirin (based on the response to Q44), had no cardiovascular disease exclusion (based on the response to Q47), and who answered Q43. The rate represents the proportion of these members who indicated they take aspirin daily or every other day.

The Discussing Aspirin Risks and Benefits component includes members in certain age/gender categories who had no cardiovascular disease exclusion (based on the response to Q47), and who answered Q45. The rate represents the proportion of these members who indicated that a health provider had discussed the risks and benefits of aspirin with them.

Flu Shot for Adults Ages 18-64 (FSA) / Aspirin Use and Discussion (ASP)

↑↓ Statistically significantly higher/lower than AHMC Overall

Key Strengths and Opportunities for Improvement

The following table displays the ten HEDIS-CAHPS® 5.0H questions most highly correlated with Coordinated Care members' satisfaction with the health plan along with their corresponding achievement scores and correlations. Achievement scores are considered "high" when the score is 80% or higher. A correlation coefficient of 0.40 or greater indicates a relatively high correlation with health plan satisfaction.

Among the ten items, the five questions with the highest achievement scores are presented first as Key Strengths. These are areas that appear to matter the most to members, and where the health plan is doing well. The five questions with the lowest achievement scores are presented second, as Opportunities for Improvement. These are areas that appear to matter the most to members, but where the health plan is not doing as well and could focus quality improvement efforts.

Note that the global rating questions for personal doctor, specialists, and overall health care have been excluded from this analysis. By their nature, global ratings tend to be more highly correlated with overall satisfaction with a health plan, and are typically not specific enough to provide clear pathways to action for improvement.

Key Strengths

Question	CCARE Achievement Score	Correlation w/ satisfaction
Q19. Personal doctor usually or always showed respect for what you had to say	91.5	0.33
Q18. Personal doctor usually or always listened carefully to you	89.7	0.45
Q17. Personal doctor usually or always explained things in way that was easy to understand	88.6	0.34
Q32. Usually or always treated with courtesy and respect by health plan's customer service staff	87.5	0.37
Q20. Personal doctor usually or always spent enough time with you	87.2	0.37

Opportunities for Improvement

Question	CCARE Achievement Score	Correlation w/ satisfaction
Q31. Health plan's customer service usually or always gave needed information or help	74.3	0.52
Q25. Usually or always get an appointment to see a specialist as soon as you needed	75.4	0.31
Q12. Doctor/provider definitely asked what you thought was best for you	76.6	0.27
Q14. Usually or always got care, tests or treatment you thought you needed	81.8	0.51
Q4. Usually or always got care right away as soon as you needed	84.8	0.30

PRIORITY MATRICES

Priority matrices help focus improvement activities by graphically juxtaposing two kinds of information: the magnitude of the health plan's achievement scores and their correlation with overall plan satisfaction. For ratings questions, composites, and the questions on which composites are based, achievement scores are plotted against their correlation with overall health plan satisfaction.

With respect to achievement scores, higher scores are obviously better. With respect to correlations however, their magnitude is best considered not in terms of better or worse, but rather in terms of importance. In the context of quality improvement activities, the most important composites or ratings are those which are most highly correlated with overall health plan satisfaction. For example, if one composite is more highly correlated with overall health plan satisfaction than the others, improving service in that particular area is more likely to improve ratings of overall plan satisfaction over time. Conversely, if an item is weakly correlated with overall plan satisfaction, altering services in that domain won't significantly alter ratings of the health plan.

Overall satisfaction with the Coordinated Care's services for adults is based on Q35, which asks respondents to rate their experience with their health plan, using a 0-10 scale, from "Worst health plan possible" to "Best health plan possible".

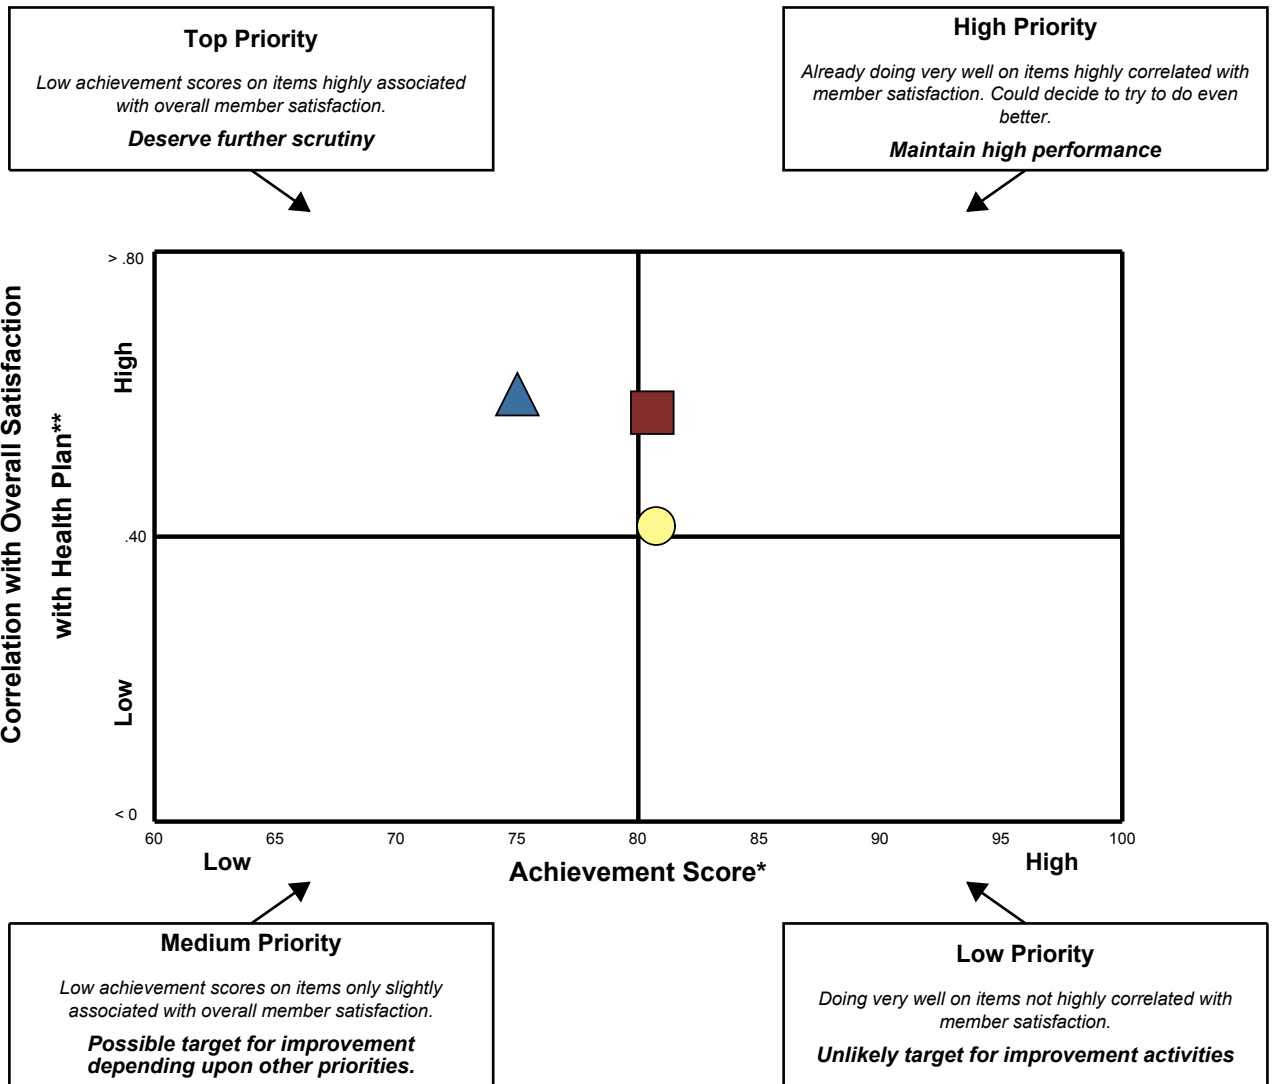

For the purposes of the priority matrix, an achievement score is considered "high" when the score is 80% or higher. Correlation coefficients greater than or equal to .4 are considered "highly correlated" with health plan satisfaction; coefficients less than .4 are considered lower correlations with plan satisfaction. The plot of scores against correlations thus falls into a four-quadrant matrix, where the four quadrants are determined by an 80% score vertical axis and a .4 correlation horizontal axis.

Association with Overall Satisfaction**	High	<p>Top Priority</p> <p><i>Low achievement scores on items highly associated with overall member satisfaction.</i></p> <p>Deserve further scrutiny</p>	<p>High Priority</p> <p><i>Already doing very well on items highly correlated with member satisfaction. Could decide to try to do even better.</i></p> <p>Maintain high performance</p>
	Low	<p>Medium Priority</p> <p><i>Low achievement scores on items only slightly associated with overall member satisfaction.</i></p> <p>Possible target for improvement depending upon other priorities.</p>	<p>Low Priority</p> <p><i>Doing very well on items not highly correlated with member satisfaction.</i></p> <p>Unlikely target for improvement activities</p>

* An achievement score is ranked "high" when score is 80 or higher.
 ** An association with Overall Satisfaction is ranked "high" when correlation is .4 or higher.

Items Most Highly Correlated with Satisfaction

Overall satisfaction with the health plan is based on Q35, which asks respondents to rate their experience with their health plan, using a 0-10 scale, from "Worst health plan possible" to "Best health plan possible".

The following table displays the ten HEDIS-CAHPS® 5.0H questions most highly correlated with Coordinated Care enrollee satisfaction, in rank order of the correlation coefficient, highest to lowest. For each question, the table displays the Coordinated Care overall adult achievement score, and the correlation with overall satisfaction with the services under Coordinated Care. Achievement scores are considered "high" when the score is 80% or higher. Achievement scores less than 80% on the following questions represent opportunities for improvement activities. Correlation coefficients greater than or equal to .4 are considered more highly correlated with satisfaction (medium to high); coefficients less than .4 represent lower correlations with satisfaction (medium to low).

The Apple Health Managed Care achievement scores are presented for comparison. The combination of all five Apple Health Managed Care plans is presented as AHMC.

Question	Coordinated Care Achievement Score	Correlation w/ satisfaction	AHMC Achievement Score
Q13. Rating of all health care	75.0	0.60	71.2
Q23. Rating of personal doctor	80.6	0.57	79.1
Q31. Health plan's customer service usually or always gave needed information or help	74.3	0.52	75.3
Q14. Usually or always got care, tests or treatment you thought you needed	81.8	0.51	81.5
Q29. Written materials/Internet usually or always provided needed information about how health plan works	54.9	0.50	60.2
Q18. Personal doctor usually or always listened carefully to you	89.7	0.45	91.5
Q27. Rating of specialist seen most often	80.7	0.41	75.8
Q20. Personal doctor usually or always spent enough time with you	87.2	0.37	88.7
Q32. Usually or always treated with courtesy and respect by health plan's customer service staff	87.5	0.37	91.0
Q17. Personal doctor usually or always explained things in way that was easy to understand	88.6	0.34	91.6

Overall Rating Questions

The CAHPS 5.0H survey uses a 0-10 rating for assessing overall experience with health plans, providers, specialists, and health care. In the following tables, proportions of respondents (N) assigning ratings of 8, 9, or 10 are reported as achievement scores (Score). Alternate top box achievement scores are calculated using only response options 9+10 as achievements. These are presented as hollow bars. In each graph, the combination of all five Apple Health Managed Care plans is presented as AHMC.

When the term 'statistically significantly different' is used in this report, it means that we can be 95% sure that the difference between the two measures is not simply due to chance. Additional information regarding significance testing can be found in the *Methodology and Definitions* section of this report.

■ Coordinated Care ■ AHMC Overall

COMPOSITES

The CAHPS 5.0H survey has five standard composites, each representing a domain of enrollee experience. An achievement score is calculated for each composite item; the mean of these achievement scores is presented in this section.

The achievement scores presented on the following pages reflect responses of 'Usually' or 'Always' to the questions comprising the Getting Needed Care, Getting Care Quickly, How Well Doctors Communicate and Customer Service composites and 'Yes' for the Shared Decision Making composite. For the questions that use a 'Never' to 'Always' scale the alternate top box scores of 'Always' are presented as hollow bars. For full detail of response options for each question and which responses qualify as achievements, please refer to the *Responses by Question* section. In each graph, the composite score for the combination of all five Apple Health Managed Care plans is presented as AHMC.

When the term 'statistically significantly different' is used in this report, it means that we can be 95% sure that the difference between the two measures is not simply due to chance. Additional information regarding significance testing can be found in the *Methodology and Definitions* section of this report.

Responses by Question

The *Responses by Question* section shows the proportions of respondents (N) and the associated percentage (%) of whom selected each response option for each question in the survey.

When applicable the achievement score, correlation with satisfaction and priority rating are presented. An achievement score is computed as the proportion of responses qualifying as achievements. In general, somewhat positive responses are included with positive responses as achievements. Achievement scores are considered "high" when the score is 80% or higher. Correlations are computed between responses to specific performance-related items and Q35, which is the rating question in the survey instrument measuring overall satisfaction with the health plan. A correlation coefficient of 0.40 or greater indicates a relatively high correlation with health plan satisfaction. The priority rating corresponds to which quadrant the question falls in on the priority matrix. Please see the *Priority Matrices* section for the full plot graph for each composite.

In each table, the combination of all five Apple Health Managed Care plans is presented as AHMC.

Q1. Our records show that you are now in [HEALTH PLAN NAME]. Is that right?

1. **Our records show that you are now in Coordinated Care.**
 Is that right?
 1 Yes → If Yes, Go to Question 3
 2 No
2. **What is the name of your health plan? (Please print)**

YOUR HEALTH CARE IN THE LAST 6 MONTHS

- These questions ask about your own health care. Do not include care you got when you stayed overnight in a hospital. Do not include the times you went for dental care visits.
3. **In the last 6 months, did you have an illness, injury, or condition that needed care right away in a clinic, emergency room, or doctor's office?**
 1 Yes
 2 No → If No, Go to Question 5
4. **In the last 6 months, when you needed care right away, how often did you get care as soon as you needed?**
 1 Never
 2 Sometimes
 3 Usually
 4 Always
5. **In the last 6 months, did you make any appointments for a check-up or routine care at a doctor's office or clinic?**
 1 Yes
 2 No → If No, Go to Question 7
6. **In the last 6 months, how often did you get an appointment for a check-up or routine care at a doctor's office or clinic as soon as you needed?**
 1 Never
 2 Sometimes
 3 Usually
 4 Always
7. **In the last 6 months, not counting the times you went to an emergency room, how many times did you go to a doctor's office or clinic to get health care for yourself?**
 1 None → If None, Go to Question 15
 2 1 time
 3 2
 4 3
 5 4
 6 5 to 9
 7 10 or more times
8. **In the last 6 months, did you and a doctor or other health provider talk about specific things you could do to prevent illness?**
 1 Yes
 2 No
9. **In the last 6 months, did you and a doctor or other health provider talk about starting or stopping a prescription medicine?**
 1 Yes
 2 No → If No, Go to Question 13
10. **Did you and a doctor or other health provider talk about the reasons you might want to take a medicine?**
 1 Yes
 2 No
11. **Did you and a doctor or other health provider talk about the reasons you might not want to take a medicine?**
 1 Yes
 2 No
12. **When you talked about starting or stopping a prescription medicine, did a doctor or other health provider ask you what you thought was best for you?**
 1 Yes
 2 No
13. **Using any number from 0 to 10, where 0 is the worst health care possible and 10 is the best health care possible, what number would you use to rate all your health care in the last 6 months?**
 Worst health care possible Best health care possible
 0 1 2 3 4 5 6 7 8 9 10
14. **In the last 6 months, how often was it easy to get the care, tests, or treatment you needed?**
 1 Never
 2 Sometimes
 3 Usually
 4 Always

YOUR PERSONAL DOCTOR

15. **A personal doctor is the one you would see if you need a check-up, want advice about a health problem, or get sick or hurt. Do you have a personal doctor?**
 1 Yes
 2 No → If No, Go to Question 24

16. In the last 6 months, how many times did you visit your personal doctor to get care for yourself?
- 1 None → If None, Go to Question 23
- 2 1 time
- 3 2
- 4 3
- 5 4
- 6 5 to 9
- 7 10 or more times

17. In the last 6 months, how often did your personal doctor explain things in a way that was easy to understand?
- 1 Never
- 2 Sometimes
- 3 Usually
- 4 Always

18. In the last 6 months, how often did your personal doctor listen carefully to you?
- 1 Never
- 2 Sometimes
- 3 Usually
- 4 Always

ABOUT YOU

36. In general, how would you rate your overall health?
- 1 Excellent
- 2 Very Good
- 3 Good
- 4 Fair
- 5 Poor

37. In general, how would you rate your overall mental or emotional health?
- 1 Excellent
- 2 Very Good
- 3 Good
- 4 Fair
- 5 Poor

38. Have you had either a flu shot or flu spray in the nose since July 1, 2015?
- 1 Yes
- 2 No
- 3 Don't know

39. Do you now smoke cigarettes or use tobacco every day, some days, or not at all?
- 1 Every day
- 2 Some days
- 3 Not at all → If Not at all, Go to Question 43
- 4 Don't know → If Don't know, Go to Question 43

40. In the last 6 months, how often were you advised to quit smoking or using tobacco by a doctor or other health provider in your plan?
- 1 Never
- 2 Sometimes
- 3 Usually
- 4 Always

41. In the last 6 months, how often was medication recommended or discussed by a doctor or health provider to assist you with quitting smoking or using tobacco? Examples of medication are: nicotine gum, patch, nasal spray, inhaler, or prescription medication.
- 1 Never
- 2 Sometimes
- 3 Usually
- 4 Always

42. In the last 6 months, how often did your doctor or health provider discuss or provide methods and strategies other than medication to assist you with quitting smoking or using tobacco? Examples of methods and strategies are: telephone helpline, individual or group counseling, or cessation program.
- 1 Never
- 2 Sometimes
- 3 Usually
- 4 Always

43. Do you take aspirin daily or every other day?
- 1 Yes
- 2 No
- 3 Don't know

44. Do you have a health problem or take medication that makes taking aspirin unsafe for you?
- 1 Yes
- 2 No
- 3 Don't know

45. Has a doctor or health provider ever discussed with you the risks and benefits of aspirin to prevent heart attack or stroke?
- 1 Yes
- 2 No

46. Are you aware that you have any of the following conditions? Mark one or more.
- A High cholesterol
- B High blood pressure
- C Parent or sibling with heart attack before the age of 60

47. Has a doctor ever told you that you have any of the following conditions? Mark one or more.
- A A heart attack
- B Angina or coronary heart disease
- C A stroke
- D Any kind of diabetes or high blood sugar

48. In the last 6 months, did you get health care 3 or more times for the same condition or problem?
- 1 Yes
- 2 No → If No, Go to Question 50

49. Is this a condition or problem that has lasted for at least 3 months? Do not include pregnancy or menopause.
- 1 Yes
- 2 No

50. Do you now need or take medicine prescribed by a doctor? Do not include birth control.
- 1 Yes
- 2 No → If No, Go to Question 52

51. Is this medicine to treat a condition that has lasted for at least 3 months? Do not include pregnancy or menopause.
- 1 Yes
- 2 No

52. What is your age?
- 1 18 to 24
- 2 25 to 34
- 3 35 to 44
- 4 45 to 54
- 5 55 to 64
- 6 65 to 74
- 7 75 or older

53. Are you male or female?
- 1 Male
- 2 Female

54. What is the highest grade or level of school that you have completed?
- 1 8th grade or less
- 2 Some high school, but did not graduate
- 3 High school graduate or GED
- 4 Some college or 2-year degree
- 5 4-year college graduate
- 6 More than 4-year college degree

55. Are you of Hispanic or Latino origin or descent?
- 1 Yes, Hispanic or Latino
- 2 No, Not Hispanic or Latino
