- Two words
 describing your day
 so far

Meeting Goals

Share project updates

Talk about what behavioral health services look like in our state and community

Discuss the landscape assessment

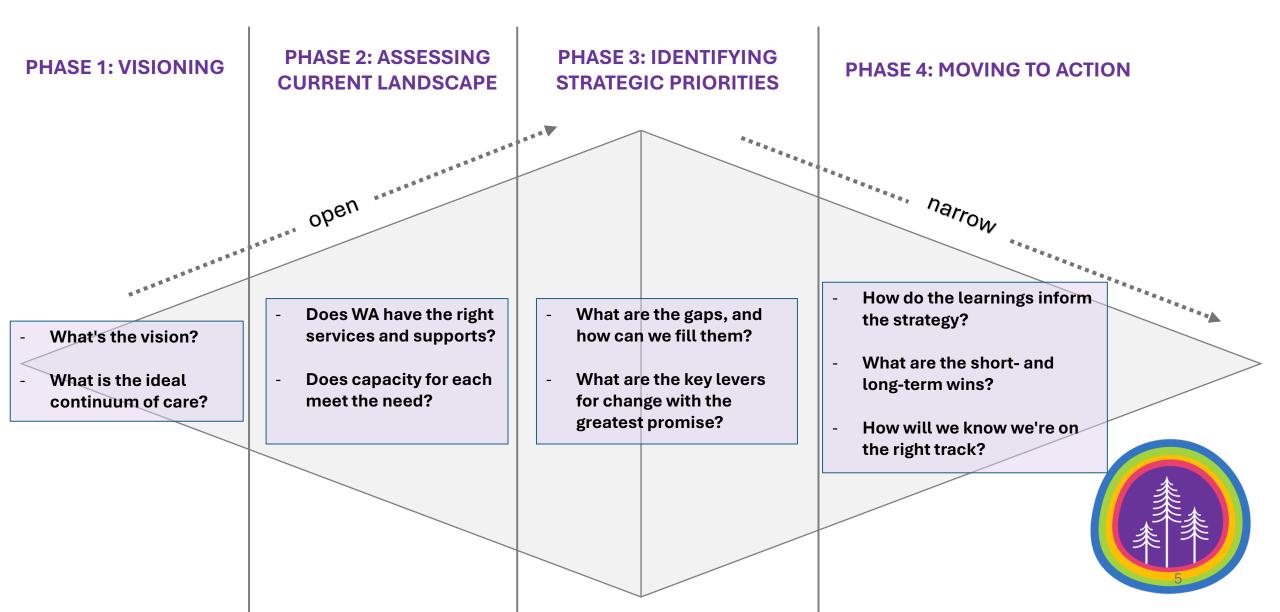

Full Value Agreement

- Use plain language (explain acronyms, if used)
- Use first names
- Encourage grace, respect, compassion, patience and kindness for self and others
- Be open, be brave
- Embrace uncertainty, sit with discomfort
- Step up then step back so that everyone has a chance to be heard one at a time when speaking & give attention to facilitators/speakers
- Honor this time as a space for you and others to share perspectives across differences without judgment while acknowledging your own lenses
- Assume best intentions and that everyone is doing the best they can with the tools they have. Keep an open mind and listen
 actively to understand.
- Speak your truth, from your own experience- your story matters; so does your knowledge and experience
- Stories stay private, but lessons carry forward
- Affirm and validate one another
- Everyone is a teacher, everyone is a learner
- Be mindful of trauma and recognize the impact of that trauma- trigger warnings
- Take accountability
- Receive feedback without defensiveness, show humility
- Address issues collectively and repair early

Strategic planning process – phases and key questions

WA Thriving is being informed by two broad, interacting areas of work that cut across all phases

PHASE 1: VISIONING

PHASE 2: ASSESSING CURRENT LANDSCAPE

PHASE 3: INDENTIFYING STRATEGIC PRIORITIES

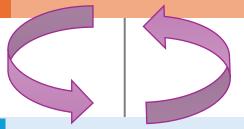

PHASE 4: MOVING TO ACTION

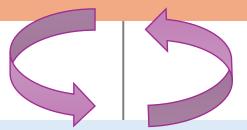

PEOPLE CENTERED:

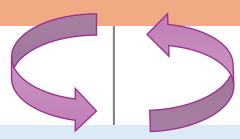

COMMUNITY ENGAGEMENT & FEEDBACK

Activities include:

- Gathering success stories and inspiring examples from other contexts
- Regional in-person listening events, individualized by community
- Targeted conversations with relevant agencies and subject matter experts
- Attendance and input gathering at coalition & provider meetings and workgroups
- Ongoing engagement & feedback from advisory groups, subcommittees, and discussion groups

DATA INFORMED:

EVIDENCE & RESEARCH

Activities include:

- Cross-functional **discovery sprints** to further understand complex areas of system
- Gather statistics and qualitative data & insights
- Review of reports and studies, peer-reviewed publications, evidence-based practices & guidelines, and other literature
- Model the system to organize, clarify, and unify behavioral health system knowledge into useable data
- Targeted discussions with subject matter experts to deepen understanding in key areas
- Design of data dashboard responsive to ongoing insight and changing system dynamics

Updates: Discovery Sprints

- Community Engagement
 - Week of 10/14: East Side and West Side FFI In Person Engagement
- Discovery Sprints
 - First 2 sprints completed
 - Behavioral health in K-12
 - Behavioral Health in K-12 Deliverables
 - Behavioral health during pregnancy
 - Behavioral Health during Pregnancy Deliverables
 - Second 2 sprints launching
 - Complex Hospital Discharge
 - Transitional Age Youth

Future Vision (1)

Every Washingtonian understands how behavioral health affects well-being and recognizes when young people need help.

Funding and systems work together so that services are seamless, accessible, and adapt to changing needs.

Behavioral health services and supports:

- Address mental health, substance use, developmental, and co-occurring needs.
- Connect into people's communities where they spend time.
- Are available when needed.
- Are available for all developmental stages, all cultures and languages, in all parts of the state.

Informed by children, youth, caregivers and families

All doors lead to support

Offers services to meet everyone's needs

Equitable, anti-racist, and culturally and linguistically responsive

Changes in response to new information

Invests in prevention and well-being

Includes families and communities as key contributors to well-being

Future Vision (2)

Every Washingtonian understands how behavioral health affects well-being and recognizes when young people need support.

Funding, providers and systems work together so that services are seamless, accessible, and adapt to changing needs.

Behavioral health services and supports:

- Address mental health, substance use, developmental, and co-occurring needs.
- Connect into people's communities where they spend time.
- Are available when needed.
- Are available for all developmental stages, all cultures and languages, in all parts of the state.

The Prenatal to 25 behavioral health system in Washington:

Is informed by children, youth, caregivers and families

Ensures that all doors lead to support

Offers services to meet the individual needs of children, youth, families and caregivers

Is equitable, anti-racist, and culturally and linguistically responsive

Changes in response to new information

Invests in prevention and well-being

Includes families, caregivers and communities as key contributors to well-being

Behavioral Health: Proposed Definition (from August)

Behavioral health includes the **emotions and behaviors that affect one's overall well-being**, including mental health and substance use, life stressors and crises, relational health and physical symptoms of stress and trauma. Behavioral health involves the interaction between **biological**, **psychological**, **social**, **and environmental factors**.

- Mental health encompasses a broad spectrum of conditions ranging from anxiety and depression to schizophrenia and bipolar disorder
- Substance use includes alcohol and drug use and recovery

Children, youth, and young adults experiencing behavioral health challenges may **struggle to navigate life, maintain positive relationships, and adapt to change**. Intellectual and developmental disabilities can intersect with and compound behavioral health challenges.

Behavioral health challenges often **coincide with other stressors**, including the impacts of communities' being under-resourced, homelessness, disruption of schooling, challenges finding employment, and youth being at risk of incarceration.

Defining Behavioral Health Updated

- Behavioral health involves the interaction between a person's body, brain, and the people and places around them and includes the feelings and actions that can affect one's overall well-being.
- Behavioral health can:
 - Impact how a person relates to and interacts with their families and communities and maintain long-term positive relationships that are vital for well-being
 - Affects a person's physical body and overall well-being in the same way that a short-term or long-term illness might
 - Stem from many things including a broad range of diagnoses, the stress and trauma they are experiencing or challenges with substances or other ways of coping that get in the way of overall well-being
 - **Coincide with other things**, including the impacts of communities' being under-resourced, homelessness, disruption of schooling, challenges finding employment, and youth being at risk of incarceration. These other things can be both a "cause of" or "result of" behavioral health challenges
 - Lead to children, youth, and young adults struggling to navigate life, maintain positive relationships, achieve their educational goals, and adapt to change
 - Intersect with intellectual and developmental disabilities and compound their behavioral health. Over time, as children and youth grow and develop, these challenges change
 - Be impacted even before birth and through exposure to maternal stress or substances and/or poor social and emotional connections during the earliest months and years of life

Group Discussion 1

Representing the Range/Continuum of Services

Washington **Thriving**

Developing a strategic plan for prenatal through age 25 behavioral health.

A Robust Continuum of Care

A key element of achieving this vision is ensuring a robust continuum of care. When Washington Thriving talks about a "robust continuum of care" this means that Washington offers **services and supports** to address the broad range of behavioral health and co-occurring needs, in **the settings that work** best for children, youth, families and caregivers – home, daycare, school, a provider's office or in some cases, inpatient or residential settings. It recognizes that there are **services that all will need, services that some will need and services that only a few will need.**

The envisioned behavioral health continuum of care for children, youth, families and caregivers:

- Includes prevention and well-being and identifies risks early
- Offers age-appropriate, culturally-relevant mental health and substance use supports at every stage of early life
- Offers integrated support that recognizes and addresses co-occurring challenges, including intellectual and development disabilities
- Offers ongoing support to prevent crisis and ongoing support for recovery after a crisis
- Includes navigation support and coordination between services and levels of care
- Integrates with physical healthcare

Developing a Framework for Describing the Range of Services: Why

- Allows for a common way to understand and categorize the array of services and supports
 across funders, systems, providers, state agencies, ages, developmental stages in support
 of the Vision for children, youth, families and caregivers
- Can then be used to identify gaps, pool resources, align policies and programs in a common effort to achieve the Vision for children, youth, families and caregivers
- Some specifics:
 - Identify if there any eligibility requirements or limitations to providing the service (income, Medicaid, age, etc.)
 - Quantify how much of the service is currently available
 - Quantify how much demand there is for the service
 - Identify if requirements or limitations in access can be addressed via policy changes
 - Quantify how much the service costs and how much is being paid for the service to identify funding gaps

Discussion Notes (1)

Screening (developmental, behavioral, caregiver mental health) in pediatrics and primary care Warmline Mental Health and SEL through Early Childhood Education and Assistance Program (Early ECEAP Birth to 3 and ECEAP 3-5) Home visiting programs Perinatal Mental Health Promotion Social and Emotional State Standards through OSPI Essentials for Childhood Child Abuse/Neglect Prevention State Substance Use Prevention Plan State Substance Use Project AWARE grants Project AWARE grants Western and Eastern State hospitals Promotion, Prevention & Early Intervention Screening lendvious of the Mental Health Support of Child reviews (ECLIPSE) Outpatient & Integrated Care Comprehensive Crisis Care Ryan White HIV/AIDS program Ancillary Therapeutic Services Ancillary Therapeutic Services Pregnant Parenting Individuals' Substance Use Disorder Family Preservation Model Combined In-home Services Discharge and housing supports for youth and emerging adults Community Assisted Care Preventing Opioids Through Supported transition (POST) Outpatient competency restoration Trueblood Recovery and resiliency support Transition / aftercare Behavioral Rehabilitation Services Prometion, Prevention & Early Intervention Few Comprehensive Crisis Care Rany White HIV/AIDS program Ancillary Therapeutic Services Pregnant Parenting Individuals' Substance Use Disorder Family Preservation Model Community Assisted Care Discharge and housing supports for youth and emerging adults Community Assisted Care Prevention Opioids Through Supported transition (POST) Outpatient Competency restoration Trueblood Recovery and resiliency support Transition / aftercare Behavioral Rehabilitation Services Forensic Mental Health Services F	21004001011	110100 (1)

Group Discussion 2

Discussion Notes (2)

All CYFC

- Screening (developmental, behavioral, caregiver mental health) in pediatrics and primary care
- Warmline
- Mental Health and SEL through Early Childhood Education and Assistance Program (Early ECEAP Birth to 3 and ECEAP 3-5)/ Head Start
- Home visiting programs
- Perinatal Mental Health Promotion
- Social and Emotional State Standards through OSPI
- Essentials for Childhood Child Abuse/Neglect Prevention
- State Substance Use Prevention Plan
- ESD/OSPI Behavioral Health Navigators
- Project AWARE grants
- Promotion, Prevention & Early Intervention
- Education and training on referral to services and resources for school personnel
- Community Partners PTAs, Food banks, etc.
- All persons that do anything with children, youth and families.
- Religious Groups
- Navigation, care coordination,
- Provider network directory
- PCIT
- Incredible Year

- What is missing?
- Are all systems represented?
- What about settings?
- By age?
- Special needs?

Discussion Notes (3)

Some CYFC

- Outpatient & Integrated Care
- Comprehensive Crisis Care
- Ryan White HIV/AIDS program
- Ancillary Therapeutic Services
- Pregnant Parenting Individuals' Substance Use Disorder Family Preservation Model
- Combined In-home Services
- Mental Health Support via Early Support for Infant and Toddlers (ESIT) (Move to All?)
- Infant and Early Childhood Mental Health Consultation
- Mental Health treatment continuum while in carceral settings
- Plan of Safe Care
- Transitional Specialists (kids going from high school)- OSPI- DVR
- Refugee Specialists

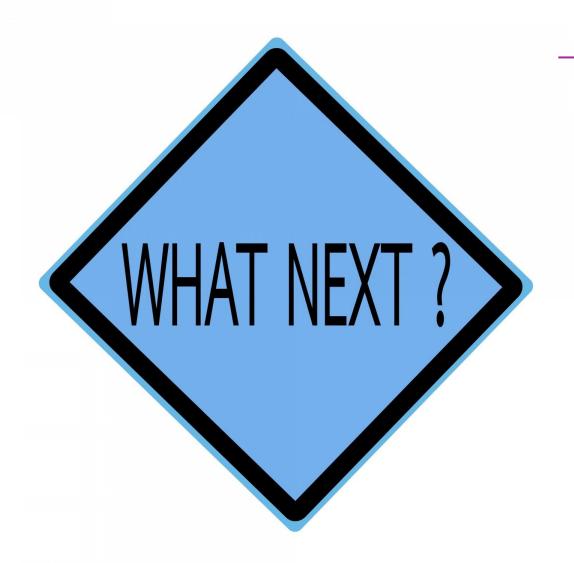

- What is missing?
- Are all systems represented?
- What about settings?
- By age?
- Special needs?

Discussion Notes (4)

Few CYFC

- Wraparound with Intensive Services (WISe)
- Early Childhood Intervention and Prevention Services (ECLIPSE)
- Parent Child Assistance Program (PCAP)
- Residential Treatment
- Intensive Services
- Discharge and housing supports for youth and emerging adults
- · Community Assisted Care
- Preventing Opioids Through Supported transition (POST)
- Outpatient competency restoration Trueblood
- Recovery and resiliency support
- Transition / aftercare
- · Behavioral Rehabilitation Services
- · Forensic Mental Health Services
- Western and Eastern State hospitals
- Child study and treatment center (part of Children's Long-term Inpatient Program system)
- Special Commitment Centers
- State Developed Facilities for 90 and 180 day beds
- Pregnant Parenting Individuals' Substance Use Disorder Family Preservation Model

- What is missing?
- Are all systems represented?
- What about settings?
- By age?
- Special needs?

Next Discussion Group:

Wednesday, October 16

4:00 PM - 5:30 PM

2024 Washington Thriving AG & Discussion Group Meetings

Date	Time	Meeting
Wednesday, October 16 th	10 – 11:30 AM PST	Parent/Caregiver Discussion Group
	4 – 5:30 PM PST	Youth/Young Adult Discussion Group
Thursday, October 17 th	1 – 2:30 PM PST	Provider/System Partner Discussion Group
