Include such activities as all direct administrative support activities, contract monitoring, program planning, budgeting and evaluation, plan implementation, and program coordination. Also includes support services normally identified with County department program administration. This would include services provided by the County Auditor, Treasurer, Prosecutor, Purchasing Department, Personnel Department, etc., which have been either billed or allocated per a cost allocation plan.

566.12 CONTINUING EDUCATION/TRAINING

Costs incurred to support educational programs, training projects, and/or other professional development programs directed toward: 1) improving the professional and clinical expertise of prevention and treatment facility staff, 2) the knowledge base of county employees who oversee the program agreement; and 3) to meet minimum standards and contract requirements. 566.2X PREVENTION

566.21 PREVENTION COMMUNITY BASED COORDINATION

These activities, as provided by the county-identified prevention specialist, are directed to enhance the ability of the community to effectively provide prevention services for alcohol, tobacco, and other drug abuse. Activities include organizing, planning, and enhancing the efficiency and effectiveness of primary prevention services provided. Appropriate methods include: community and volunteer training, systematic planning (system and program model development), multi-agency coordination and collaboration, accessing services and funding, and community team building.

**566.22 CENTER FOR SUBSTANCE ABUSE PREVENTION (CSAP)
STRATEGIES AND ACTIVITIES**

CSAP Strategies and Activities designed to prevent or delay the misuse and abuse of Alcohol, Tobacco, and Other Drugs (ATOD) as described in the County Implementation Guide for Prevention. Includes the following six strategies:

1. Information dissemination: This strategy provides awareness and knowledge of the nature and extent of substance use, abuse, and addiction and their effects on individuals, families, and communities. It also provides knowledge and awareness of available prevention programs and services. Information dissemination is characterized by one-way communication from the source to the audience, with limited contact between the two. [Note: Information dissemination alone has not been shown to be effective at preventing substance abuse.]
2. Education: This strategy involves two-way communication and is distinguished from the information dissemination strategy by the fact that interaction between the educator/facilitator and the participants is the basis of its activities. Activities under this strategy aim to affect critical life and social skills, including decision-making, refusal skills, critical analysis (e.g., of media messages), and systematic judgment abilities.
3. Alternatives: This strategy provides for the participation of target populations in activities that exclude substance use. The assumption is that constructive and healthy activities offset the attraction to – or otherwise meet the needs usually filled by – alcohol and drugs and would, therefore, minimize or obviate resort to the latter. [Note: Alternative activities alone have not been shown to be effective at preventing substance abuse.]
4. Problem identification and referral: This strategy aims at identification of those who have indulged in illegal/age-inappropriate use of tobacco or alcohol and those individuals who have indulged in the first use of illicit drugs in order to assess if their behavior can be reversed through education. It should be noted, however, that this strategy does not include any activity designed to determine if a person is in need of treatment.
5. Community-based process: This strategy aims to enhance the ability of the community to more effectively provide prevention and treatment services for substance abuse disorders. Activities in this strategy include organizing, planning, enhancing efficiency and effectiveness of services implementation, interagency collaboration, coalition building, and networking.
6. Environmental: This strategy establishes or changes written and unwritten community standards, codes, and attitudes, thereby influencing incidence and prevalence of substance abuse in the general population. This strategy is divided into two subcategories to permit distinction between activities that center on legal and

regulatory initiatives and those that relate to the service and action-oriented initiatives.

7. Other: Can include Community Prevention Training and Mentoring.

566.26 TOBACCO INITIATIVES/SYNAR

- Tobacco Initiative: Costs incurred to provide special projects devoted to implementing and/or administering tobacco-related compliance monitoring. Projects related to the monitoring of retail outlets not selling tobacco products to minors.

 - (b) If the subcontract is cost related, the reimbursable cost of the subcontract shall be the share of payments to the subcontractor for subcontractor costs which are necessary for the proper and efficient performance of the contract, are reasonable and allocable to the subcontract and are allowable under the provisions of this exhibit. If the cost-related subcontractor is a for-profit entity, reimbursable costs may also include payments for ordinary profit, provided such profit is computed on a basis other than a percentage of contract costs. Costs used to determine subcontract payments may be either actual costs during the contract period or estimated costs for the contract period based on actual costs in a prior period, and may be either costs of the subcontractor or costs of a class or subclass of facilities providing similar services, activities or procedures.
 - (c) If the subcontract is fee for service, the reimbursable cost of the subcontract shall be the share of the payments based on an established rate structure set by laws, regulation or policy, or may be based on cost information provided by the contractor during a competitive solicitation or contract negotiations.

REASONABLENESS

- (1) A cost is reasonable if, in its nature and amount, it does not exceed that which would be incurred by a prudent and reasonable person under circumstances prevailing at the time the decision was made to incur the cost.
- (2) In determining the reasonableness of a given cost, the following shall be given careful consideration:
 - (a) Whether the cost is of a type generally recognized as ordinary and necessary for the operation of the contractor or the performance of the contract.
 - (b) Whether the cost was incurred after the contractor complied with sound business practices, including arm's length bargaining.
 - (c) Whether the contractor acted with prudence in the circumstances considering its responsibilities to the organization, its members, employees, clients, the public at large, and the Department.
 - (d) Whether the contractor deviated from established practices of the contractor, which may unjustifiably increase the cost.

ALLOCABLE COSTS

- (1) A cost is allocable to the contract if all of the following conditions are met:
 - (a) It is assignable or chargeable to the contract in accordance with the relative benefit received because either:
 - (i) It was incurred specifically and solely for the performance of the contract; or
 - (ii) It benefits both contract and non-contract objectives and can be distributed between them in reasonable proportion to the benefits received; or
 - (iii) It is necessary for the overall operation of the contractor even if a direct relationship to the contract cannot be shown.
 - (b) It is not allocable to or included as a cost of any other contract, grant, agreement or program in either the present or any prior period, or used as cost-sharing or matching for another contract or grant, except when the contract specifically authorizes such duplicate allocation.
 - (c) It is accorded consistent treatment with costs of a similar nature.
- (2) Contract-Specific Direct Costs: If a cost is allocable to the contract pursuant to subsection (l)(a)(i) of this section, the entire amount may be charged to the contract.
- (3) Shared Direct Costs: If a cost is allocable to the contract pursuant to subsection (l)(a)(ii) of this section, the charge shall be considered to be in reasonable proportion to the benefits received if the charge is based on time distribution records, random moment time samples, equivalent work units, or space utilization. Other equitable methods may be used with the prior approval of the Department. Allocation of charges based on revenue distribution is not an acceptable method.
- (4) Indirect Costs: If a cost is allocable to the contract pursuant to subsection (l)(a)(iii) of this section, the charge shall be considered to be in proportion to benefits received if it is based on the total distribution of costs allocated pursuant to subsections (2) and (3) of this section, or if it is based on staff time directly spent in contract and non-contract activities. Other equitable methods may be used with the prior, written approval of the Department.
- (5) Contractors and cost-related subcontractors shall maintain a current cost allocation plan describing how costs are allocated.
- (6) Department approvals required in subsections (3) and (4) of this section shall be obtained by submitting a cost allocation plan to the contract manager. The cost allocation plan shall identify the period of time covered by the plan, the cost items to be allocated, the allocation method, the program areas to which costs are allocated, and the resulting allocations using budgeted costs. Copies of indirect cost allocation plans submitted for federal grant purposes may be used to apply for Department approval under subsection (4) of this section.

ALLOWABLE COSTS

A cost is allowable if:

- (1) It is authorized or not prohibited by federal, state, or local laws and regulations.
- (2) It conforms to any limitations or exclusions set forth in the contract terms and approved budget, or in applicable state or federal law or regulation.
- (3) It is approved in advance and in writing by the Department, if it is a cost requiring approval.
- (4) It is not an unallowable cost.
- (5) It is consistent with policies, regulations, directives, and procedures of the contractor.
- (6) It is accorded consistent treatment through application of generally accepted accounting principles.
- (7) It is adequately documented in source records such as payroll registers and invoices.

Costs described in this section are allowable only if they are approved in advance by the Department. Approval shall be deemed given if the cost is specifically identified in the contract budget or other clause or attachment to the contract. Approval of costs not specifically identified in the contract shall be made by letter or other document which sets forth the nature and amount of the approved cost and the contract for which it is allowed.

- (1) Client cash payments: Any direct cash payments to departmental clients are allowable only with prior written approval of the Department.
- (2) Capital expenditures: Cost of acquiring by purchase or capitalized lease land, buildings, or equipment and cost of repair, remodeling, renovation, or improvements which would materially increase the value or useful life of buildings are allowable only with the prior written approval of the Department.

INTEREST EXPENSE

- (a) Costs incurred for interest on borrowed capital or temporary use of endowment funds, however represented, are unallowable as reimbursable costs against a federal grant.
 - (b) Interest on borrowed funds is allowable against state funding if the interest expense meets the applicable requirements of this section.
- (2) Interest on borrowed funds used to purchase equipment or real property is allowable against state funding with the prior written approval of the Department.
 - (3) Interest on borrowed funds used to create, replenish, or maintain working capital is allowable against state funding, if the following conditions are met:
 - (a) Working capital is depleted due to unusual cash flow, such as abnormally high costs or delays in reimbursement; or working capital has been insufficient for an extended period of time, because the contractor or subcontractor has insufficient eligible income in excess of expenses to accumulate adequate working capital.
 - (b) The borrowed funds are not used to supplant funds which otherwise would be available to finance working capital. Borrowed funds shall be considered to supplant contractor working capital if a decision to deplete working capital is evident, whether the working capital is depleted before or after the arrangements to borrow funds are made.
 - (c) The working capital in aggregate does not exceed ninety days cash flow.
 - (d) The interest expense is approved in advance and in writing by the Department.
 - (4) Approval shall be deemed given if the interest cost is specifically identified in the contract budget or other clause or attachment to the contract. Approval of interest cost not specifically identified in the contract shall be made by letter or other document which sets forth the nature and amount of the approved cost and the contract under which it is allowed.

UNALLOWABLE COSTS
