

Reentry Initiative Carceral Facilities

Medicaid Transformation Project (MTP 2.0)

The Reentry Initiative under the Medicaid Transformation Project (MTP 2.0) provides essential, pre-release services for individuals leaving incarceration. These services will ensure a person's health and successful reentry to their community.

The Health Care Authority (HCA) invited carceral facilities across the state to participate in this initiative. There are three cohorts — groups of participating facilities — that go live at different times. This document lists the carceral facilities that have completed an Intent to Participate form, which expresses their commitment and intent to participate in the Reentry Initiative. HCA is working collaboratively with participating facilities to help complete their unique implementation plans and determine their readiness to go live. Go live for an individual facility may occur after the cohort launch date, based upon a facility's readiness status.

Cohort 1

The following carceral facilities have completed an Intent to Participate form for Cohort 1, which launches **July 1, 2025**.

- Benton County Corrections
