

P&T Archived Drug Classes Motion

Drug Classes	Motion	Date Reviewed	Decision
Antiemetics Asthma/COPD controllers Asthma quick relief Long-acting opioids Overactive bladder	<p>After considering the archive reports presented today, I move to archive the following drug classes from further regular review by the P&T Committee:</p> <p>Antiemetics 06/26/2024* Asthma/COPD controllers 06/26/2024* Asthma quick relief 06/26/2024* Long-acting opioids 06/26/2024* Overactive bladder 06/26/2024*</p> <p style="text-align: center;">*(date = last motion)</p> <p>The drug classes will remain on the PDL, and the committee's last motion will remain in effect until changed by the committee. The agencies may conduct updated cost analyses of these drug classes without additional committee approval so long as any resulting changes in the preferred status of a drug remains consistent with the committee's last motion for that drug class.</p> <p>The committee may review the archive status of a drug class upon its own initiative or by request of the participating agencies at any time.</p> <p>Motion: Hudson 2nd: Beste</p>	June 26, 2024	Passed unanimous
